Power BI

Real-time dashboards
Live dashboards that maintain a real-time pulse on the business and provide critical insights.

Natural Language query
Natural language query that enables users to simply and intuitively ask questions of their data, including through Cortana.
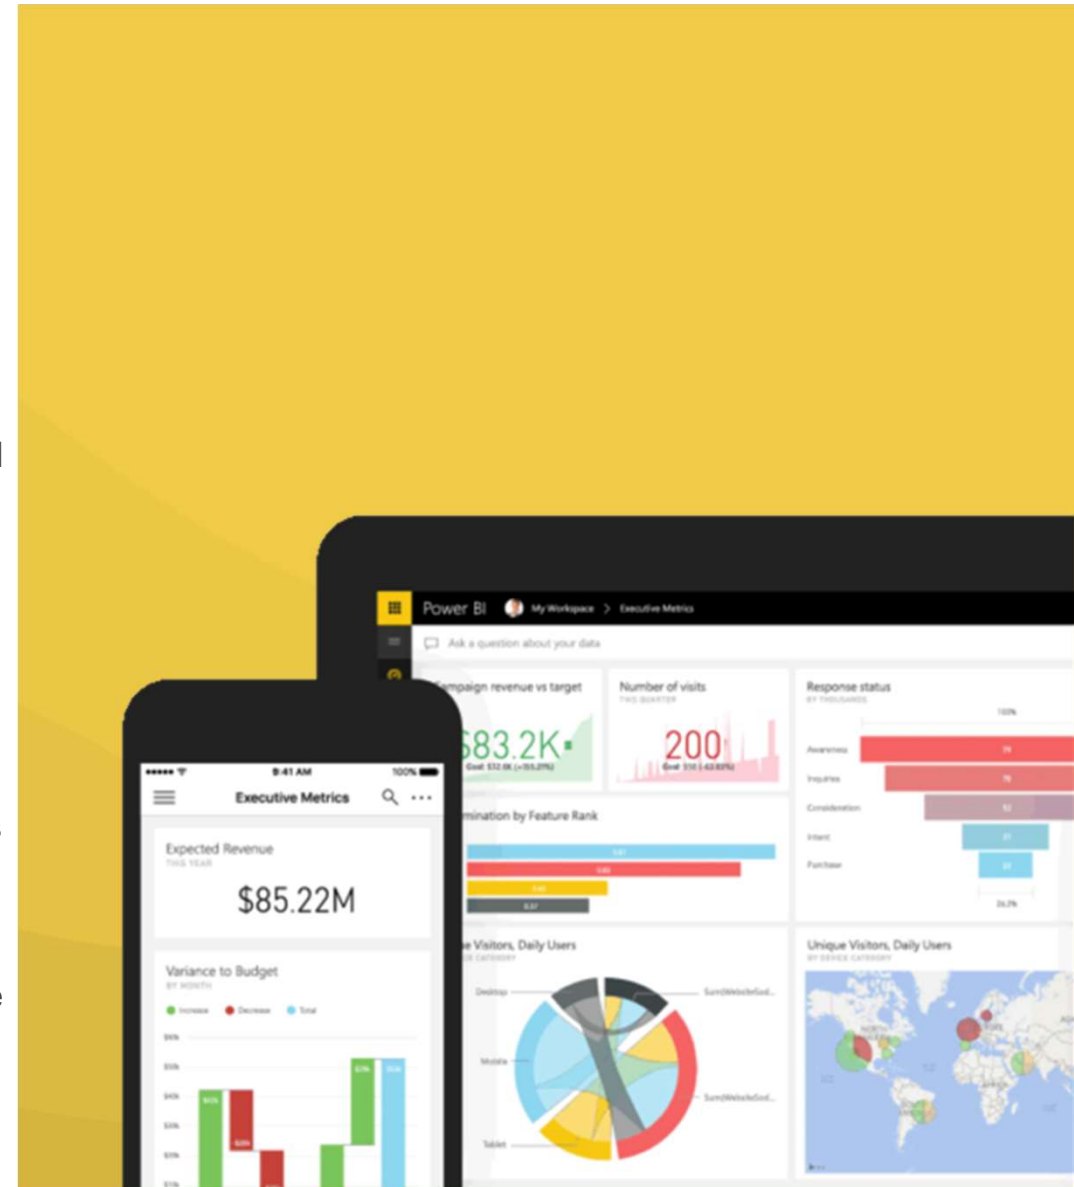

Custom visualizations
Bring data to life with the Power BI visualization stack to create new ways to visualize data in a way that makes more sense.

Integration of Power BI with the Microsoft stack
Power BI is part of larger ecosystem that integrates with services like Microsoft Teams, Office 365, and Dynamics 365.

Anywhere access to insights
Whether in the office or on-the-go, Power BI provides anywhere access to insights with dashboards accessible via the desktop, on the web, or across mobile devices.

Power Automate

Automate workflows
Create automated workflows between your favorite apps and services to get notifications, synchronize files, collect data, and more.

Multistep flows
Turn repetitive tasks into multistep workflows.

Approve requests
Create, use, and share automated approval workflows.
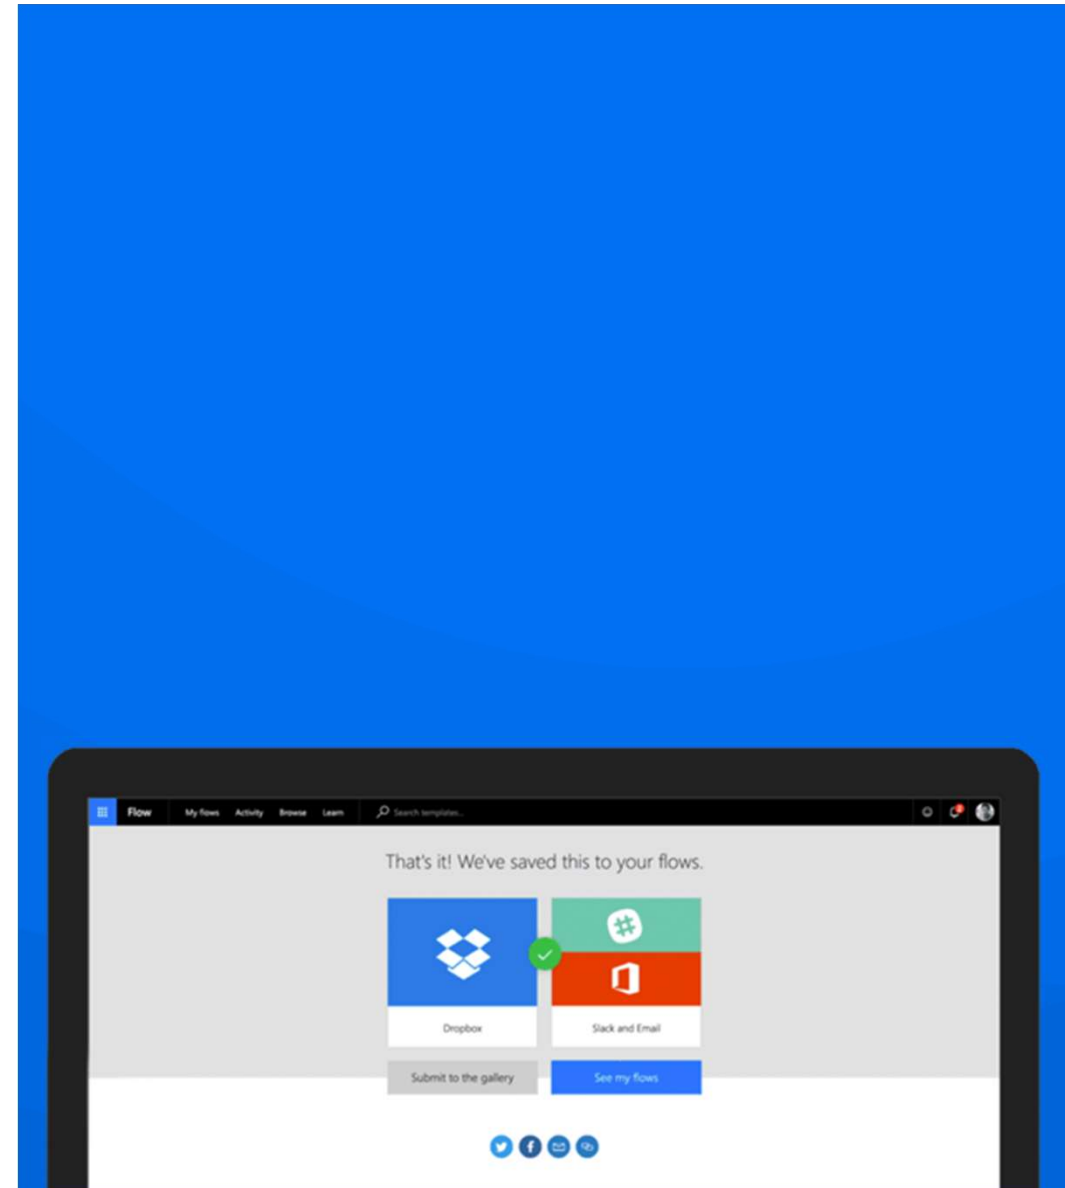

Adding conditions
Make decisions in your workflow, like running an action only when certain conditions are met.

Using on-premises data
Securely connect to on-premises data and cloud-based services.

Working securely
Prevent sensitive data from leaving your company using built-in or customized data loss prevention policies.
Attributes of Power Automate

Hundreds of triggers
Triggers start your flow, initiated from buttons, connected cloud apps, and schedules.

Share flows like documents
Collaborate on building flows and distribute flow templates to your organization.

Seamless integration
Directly integrated with PowerApps, Power BI, Microsoft Teams, Office 365, Dynamics 365, and Azure.

Extensibility model
No limits. Automate advanced scenarios with multiple steps, branching conditions, and more. Seamlessly synchronize files between first- and third-party systems.

Thousands of actions
Choose from built-in actions or create your own, using cloud services or on-premises solutions.

Data connectivity
Connect to over 275+ services with built-in connectors for everything from Adobe to Zendesk to on-premises solutions.

Built-in data platform
Use the Common Data Service to store app data in a standardized Common Data Model.
Intelligent automation
Build flows that leverage AI Builder to process unstructured data and continually improve processes.

Benefits of Low-code App Development

Increased Development Agility

Automate and enhance repetitive and time-consuming processes and reduce errors across your organization.

Speed & Savings

Reduce time & cost building web and mobile applications, enabling you to get through your development backlog.
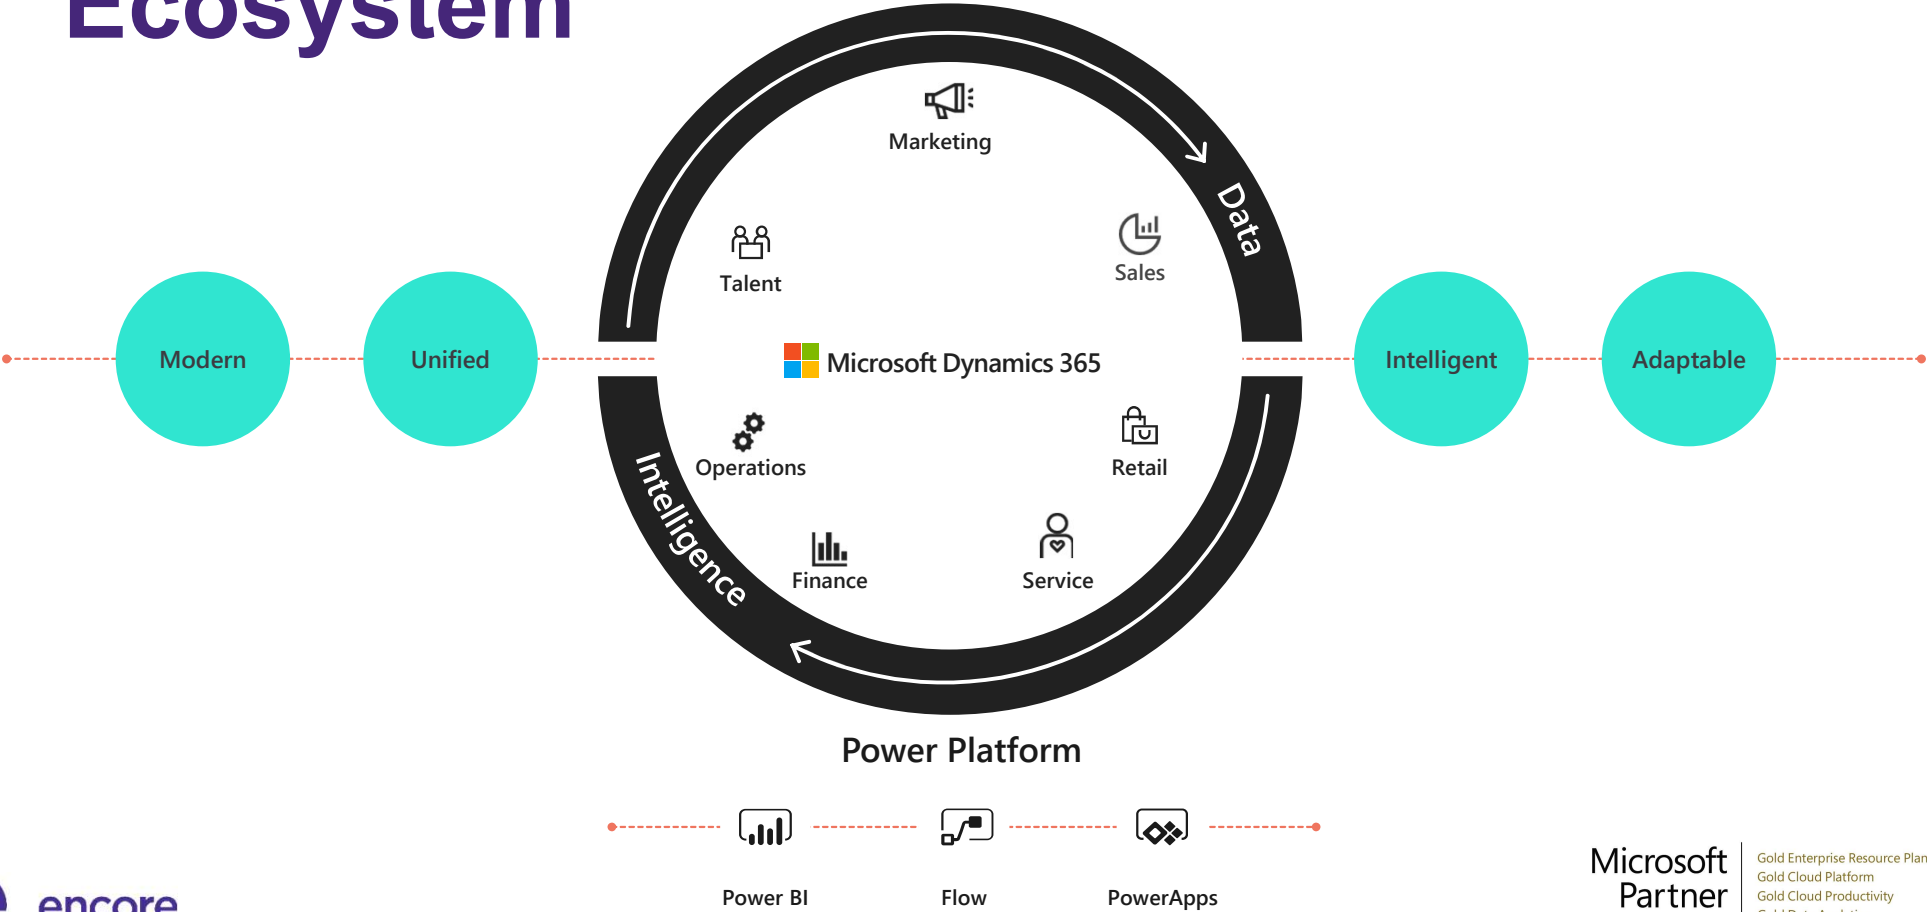

Efficiency

Effortless Dynamics 365, Office 365, and Azure integration. Remove your data siloes through low-code with Common Data Service and AI Builder.

Gartner estimates that 65% of all app dev will be low code by 2024
