

Business Central – Discrete Manufacturing Workshop

A 4-day on-site engagement using your data and industry best practices to show you how to streamline your discrete manufacturing operations.

Naviona is a Microsoft partner with a long history of implementing Dynamics 365 Business Central (formerly known as Dynamics NAV) in manufacturing environments.

The workshop will be led by one of our advisory level consultants with more than 15 years' experience in manufacturing implementations. The approach of the workshop is to interactively configure sample products and walkthrough the manufacturing processes using your data in Dynamics 365 Business Central with the Advanced Manufacturing Package.

Agenda

Day 1

*Identify Your Overall Processes
Analyze Organizational Goals and Objectives
Determine Manufacturing Requirements
Collection of Sample Data*

Day 2 & 3

Configuring of Sample Products

Day 4

Walkthrough of Processes in Business Central using Your Data

Topics*

*Inventory Configurations
Item Tracking / Serializations
Checklist Configuration
Dynamics Bill of Materials
Cost Calculations and Roll-Ups
Supply and Capacity Planning
Outsourced Production
Order Executions
Inventory Movements
Quality Inspections
Prototypes
Spare parts and Aftermarket Services*

Deliverables

*Business Central Demonstration with Your Data
Requirements Traceability Matrix
Identification of any GAPS*

After completing the 4-day workshop you will have a good understanding on how to configure Dynamics 365 Business Central to cover your discrete manufacturing needs.

**Topics may vary based on your requirements*
