# Microsoft 365 Copilot – Accelerator Plan, Pilot, Roll-out and Adoption

Ready for more than "just getting an introduction to Microsoft 365 Copilot"? Is your organization ready to take the next steps and start with a pilot on Copilot?

At Innofactor we are ready to help you with everything you need to get you started on a successful implementation. From learning about the possibilities with the new technology and how to get started, to getting the required support to run a successful pilot before a full implementation. Innofactor will be there every step of the way with ready workshops, tools, procure ment support and adoption resources to ensure a successful start to reaping the benefits of Microsoft 365 Copilot.

#### What's included:

Copilot 365 Workshop, developed by Microsoft and delivered by Innofactor to give you the best possible overview and get vou started on vour journey.

Assisted pilot on Microsoft 365 Copilot, to ensure a successful to start, develop early insights and pave the way for a larger organizational adoption.

Licenses for Microsoft 365 Copilot\*, installed, enabled and distributed to designated pilot users.

Adoption and change management support, to boost your implementation and measure success.

## Set Goals and KPI's

During the first phase we identify target groups, agree on use cases, set goals and agree on how success is measured. We kick-off the project with a Microsoft 365 Copilot workshop, getting everyone in the project onboard and aligned on the way forward.

## Pilot: Setup, Run, Learn and Plan

During the pilot agreed use cases are tested out with a defined pilot group. Continuous feedback and experiences are collected, and necessary adjustments made. During this phase we also start building the adoption plan, including communication and training.

#### Organizational roll-out

After a successful pilot, you have the tools to start a rollout to your entire organization. Activities detailed in the adoption plan will be implemented, including communication and learning activities. We also start measuring adoption early to take necessary actions and ensure a successful implementation.

- Fast facts:
- 16-18 weeks project duration from start to finish
- · An integrated project team with participants from both client and Innofactor
- · Proven methodology, with assets build by both Microsoft and Innofactor
- · Concept built from significant investments in AI technologies
- A dedicated team of experts from Innofactor to support the project

#### You get:

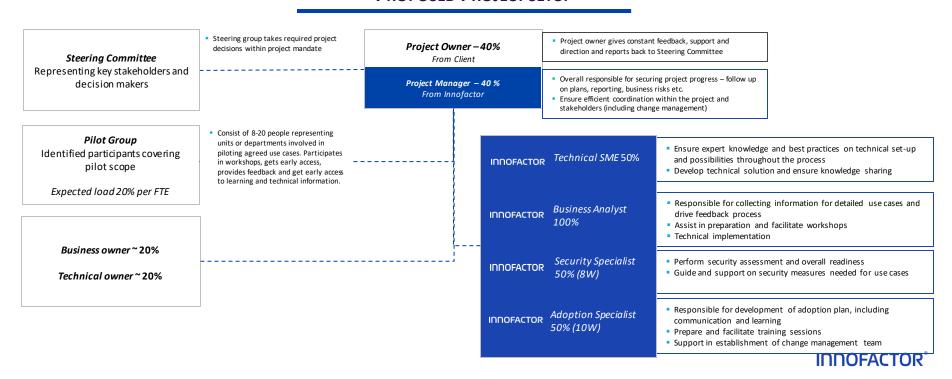

- An agreed roadmap for implementation with defined use
- · Technical enablement of Microsoft 365 license
- A completed pilot
- An adoption plan, including training and communication
- 2 weeks of roll-out support
