

Copilot Readiness Assessment

Get AI-Ready

Get AI-Ready: Copilot Readiness Assessment by Noventiq

As your organization explores the tremendous potential of Microsoft 365 Copilot, Noventiq's Readiness Assessment provides the essential foundation to maximize its value by getting AI-ready across critical dimensions.

What is Microsoft Copilot for Microsoft 365?

Copilot integrates cutting-edge AI capabilities into familiar Microsoft 365 apps, acting as your own personal AI expert. It helps optimize workflows, uncover data-driven insights, suggest content, and automate manual tasks by understanding your organizational contexts.

The Strategic Need for Copilot Readiness Assessment

Launching an AI journey with Copilot requires strategic readiness evaluation across aspects like:

- Validating alignment of AI strategy with business goals
- Identifying optimal integration points into existing environments
- Assessing technical readiness for AI platform requirements
- Formulating mitigation plans for anticipated risks
- Developing custom roadmaps for unique organizational needs

Steering Change With Insights

The assessment methodology balances strategic insights with pragmatic recommendations to streamline adoption. Joint workshops align stakeholder perspectives, while technical analysis spotlights capability gaps to be addressed.

Key Engagement Highlights

Timeline:

1-2 weeks

Collaborative Discovery:

Joint workshops to align business and AI objectives

Environment Analysis:

Evaluate M365 security, identity and governance readiness

Impact Simulation:

Model AI value through persona and scenario mapping

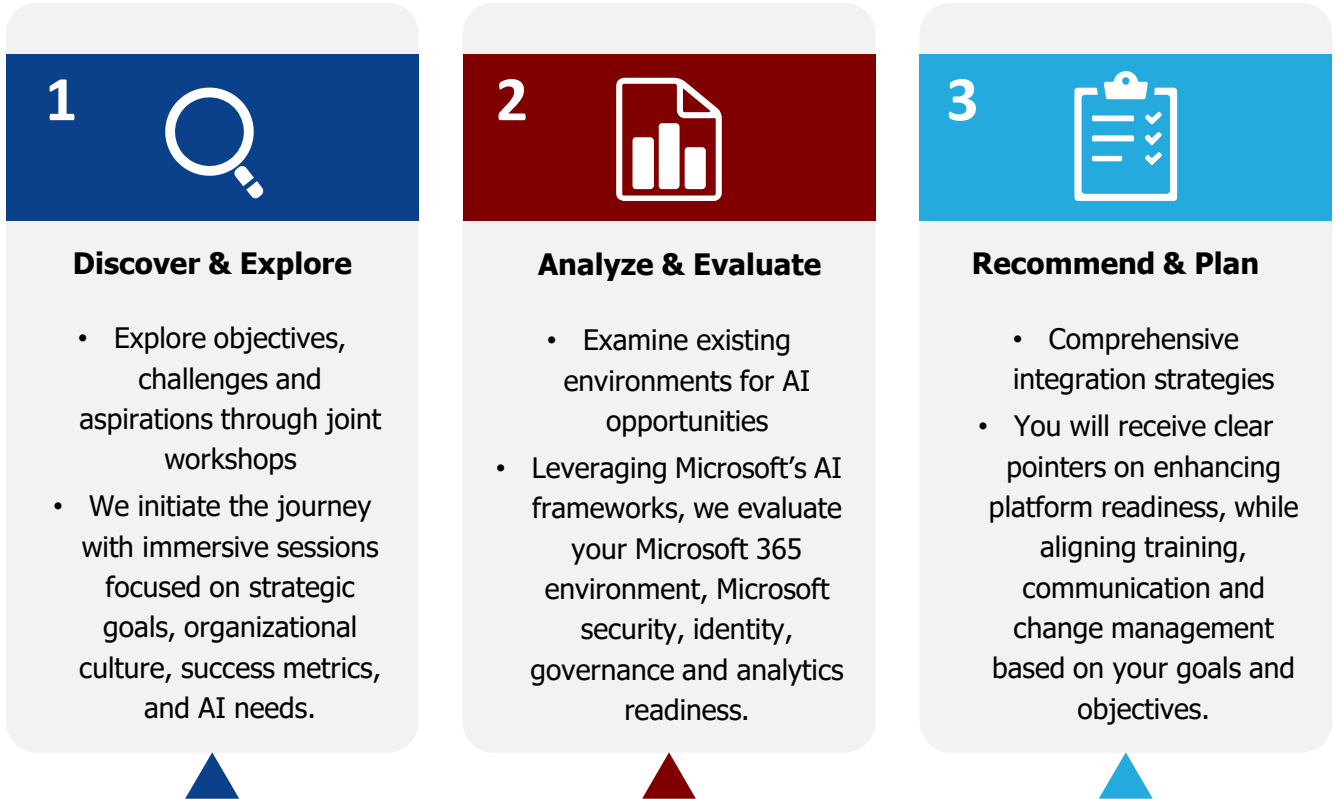

Essential AI Playbook:

Get custom actionable adoption and governance roadmaps, and capability development plans

Noventiq's Unique Copilot Readiness Assessment Approach

The phased approach provides clear visibility into required actions across security, identity, governance and culture. The recommendations activate AI integration, backed by training plans tailored as per your objectives for workplace transformation.

Noventiq's assessment follows an objective methodology and custom advisory service with the following phases:

Bridging Discovery and Action

The assessment findings lead to tangible outputs that serve as the blueprint for your Copilot adoption journey.

Assessment Output

The output serves as your AI adoption playbook, encompassing:

- Technical Recommendations Memo
- Business Priority and Persona Mapping
- AI Governance Guidance
- Customized Integration Roadmaps
- Communication and Training Plans
