

Power Platform Maturity Assessment

An assessment designed to analyse your Power Platform maturity levels, explore the art-of-the-possible, and provide you with the insights, controls and recommendations needed to drive real value from the Power Platform.

The overarching goal of the Power Platform Maturity Assessment is to support you think through how you can improve your current capabilities and prioritise activities, according to your business requirements. These decisions should be based not just on the technology's capabilities, but fit into your broader, digital transformation strategy.

Expected outcomes

- ✓ A greater understanding of how you can leverage the capabilities of the Power Platform to maximise your investment in the platform
- ✓ The Power Platform Centre of Excellence Starter Kit deployed to your environment
- ✓ An environment analysis report, detailing insights and recommendations for platform management best practices
- ✓ An actionable, prioritised list of governance and adoption recommendations to bring both order and flexibility to your environment
- ✓ A clear understanding of how to deploy and manage enterprise applications within the Power Platform

Analyse your current Power Platform landscape

We'll take a deep dive into your environment and perform an analysis, alongside your IT stakeholders, mapping out the landscape and identifying any areas

Explore the 'art-of-the-possible'

We'll showcase and pinpoint scenarios that can result in increased efficiency, productivity, and management within your platform

Governance and adoption recommendations

We'll highlight key themes and findings, recommending areas for improvement, such as quick wins through to first successes and business transformation initiatives, and how this fits into your broader digital strategy.
