

## WORKSHOP FOR ADMINISTRATORS AND DEVELOPERS MAXIMIZING GITHUB'S POTENTIAL

Welcome to our hands-on workshop, designed specifically for administrators and developers aiming to enhance their GitHub environment. We offer **customized workshops** that can be conducted in your own setting, tailored to meet your unique needs. Our services include two distinct paths for **GitHub Administration**: setting up a fresh environment or refining an existing one using industry best practices. The outcome? **A well-managed**, optimally functioning **GitHub environment** with streamlined repository flow and robust security at the organizational level.

Tailored  
to your needs

Boost

Developer  
Efficiency

A well-managed GitHub environment can significantly benefit customers in numerous ways. It fosters a culture of **collaboration and efficiency**, enabling teams to work seamlessly on projects without worrying about version control or access issues. Robust security measures **protect sensitive data** and prevent unauthorized access, providing peace of mind for organizations. Furthermore, a well-managed environment adheres to industry best practices, ensuring compliance and enhancing the overall quality of the codebase. Ultimately, these benefits lead to **increased productivity**, **improved code quality**, and a more enjoyable and stress-free experience for developers.

DexMach, **Belgium's first GitHub-verified partner**, expertly guides organizations through cloud migration and process automation. We leverage GitHub's robust tools for centralized code management, quality assurance, project coordination, and community engagement. Our commitment to excellence drives digital transformation. At DexMach, we're not just partners; we're enablers of innovation, empowering businesses to thrive in the ever-evolving tech landscape.
