ELEVATOR CONTRACTOR MANAGEMENT SOFTWARE

WHAT'S NEW IN FIELDBOSS 4.0?

Support for the new Dynamics 365 Unified Interface for an improved and modernized user experience on all FIELDBOSS forms.

New "Quick Create Forms" for Quotes, Work Orders, and Invoices.

Supports the new Dynamics 365 Resource Scheduling. This will provide schedulers and dispatchers substantial improvements in flexibility, ease of use, mapping, and scheduling automation.

New Maintenance Contract parent entity to replace the legacy Dynamics 365 Maintenance Contract.

New Safety Testing functionality for quoting, scheduling, and tracking regulated safety tests.

New utilities and tools to help automate installations, upgrades, and data migration.

Contact us for an
online demo or cost
estimate.

TECHNOLOGIES USED

Microsoft
Dynamics® 365

Dynamics 365 is the next generation of intelligent business applications that, together with FIELD BOSS, integrates your CRM, ERP and elevator industry functionality into one connected system.

Microsoft
Dynamics GP

Dynamics GP is an ERP solution for small and medium-sized businesses that helps manage the back-end operations. Reduce training time and disruptions with a similar look, feel, and integration with Microsoft Outlook, Word, and Excel.

Microsoft Azure

Microsoft Azure Cloud is an open, flexible cloud infrastructure and an affordable option for businesses looking to quickly deploy applications and back up data in the cloud.

resco.net

RESCO, with FIELD BOSS Mobile, will boost productivity and improve communication while eliminating duplicate data entry, increasing data accuracy, and mitigating service delivery and other risk factors.

Microsoft 365

Microsoft 365 offers several social and collaboration applications and delivers them in the cloud, so you can be connected anytime anywhere. Plus, with its Pay Per-User Subscription Model, it is cost-effective.

Microsoft Teams

Communicate and collaborate with your teams via group chat, online meetings, calling, web conferences and more. It is customizable for your business, can be accessed anywhere and business data stays protected with top notch Microsoft security.

SharePoint

There is no need to manage paper forms, manuals, instruction guides, or product catalogs and brochures. Collaborate in the cloud by storing and sharing all files, data, news and resources in one central location.
