# Strategnos Cloud - BI

Introducing Strategnos Cloud BI Edition: Seamlessly Integrate and Share Power BI and Fabric Embedded Version

Are you looking for a comprehensive business intelligence solution that allows you to leverage Power BI and Fabric Embedded Version? Look no further than Strategnos Cloud BI Edition - the ultimate tool for data-driven decision-making.

Strategnos Cloud BI offers a unique and innovative approach to business intelligence, enabling you to harness the full potential of both Power BI and Fabric Embedded Version. With this powerful integration, you can leverage the most advanced BI tools in the most flexible ways.

The benefit of Fabric/ Power BI Embedded over the SaaS offering lies in its flexibility and scalability. With Power BI Embedded, you have complete control over the integration and customization of Power BI within your own application, giving you the ability to create a seamless and tailored user experience. Don't have your own application?

Additionally, Power BI Embedded allows for unlimited user access, making it ideal for scenarios where you need to share reports and dashboards with a large number of users without incurring additional per-user costs. This empowers businesses to leverage the full power of Power BI while maintaining control and cost-efficiency within their own applications.

Key Features:

1. Seamless Integration: The Strategnos Cloud BI Edition offers seamless integration with both Power BI and Fabric Embedded Version. This integration eliminates the need for multiple software and simplifies your analytics workflow, allowing you to combine the strengths of each tool effortlessly.
2. Enhanced Data Visualization: With advanced visualizations from Power BI and dynamic reporting capabilities from Fabric Embedded Version, Strategnos Cloud BI Edition enables you to present your data in the most impactful and visually appealing way. Engage your audience with stunning dashboards and interactive reports that bring your data to life.
3. Advanced Analytics: Leverage the power of advanced analytics with Strategnos Cloud BI Edition. With features like predictive analytics and machine learning from Power BI, combined with the customizable capabilities of Fabric Embedded Version, you can extract valuable insights from your data and make informed decisions to drive business growth.
4. Scalable and Secure: Strategnos Cloud BI Edition ensures data security and scalability. It allows you to handle large volumes of data without compromising performance. Built-in security measures ensure that your data is protected at all times, providing peace of mind for your organization.
5. Easy Deployment and Management: Strategnos Cloud BI Edition offers a user-friendly interface and intuitive controls, making it easy to deploy, manage, and customize your analytics solution. Spend less time on setup and configuration, and more time analyzing your data and gaining valuable insights.
6. Flexibility in Licensing and Sharing: With Strategnos Cloud BI Edition, you are not restricted by Microsoft licenses. You can procure your own Power BI and Fabric capacity directly from Microsoft. This provides flexibility in managing how reports can be shared internally and with external customers, as the capacity is billed rather than on a per-user basis. This empowers you to share insights with multiple people without restrictive licenses, fostering collaboration and data democratization.
7. Hierarchical Structure for Report Management: Strategnos Cloud BI Edition allows for permission-managed segregation of Power BI reports through a hierarchical structure. This structure includes Business Units, branches, and folders, enabling you to organize and manage your reports effectively. With granular control over permissions, you can share reports with different teams or individuals based on their roles and responsibilities, both internally and externally with customers.

With these key features, Strategnos Cloud BI Edition provides a comprehensive and powerful business intelligence solution that optimizes your data analysis, visualization, and reporting capabilities.

Why Choose Strategnos Cloud BI Edition?

1. Unparalleled Integration: Our Cloud BI Edition provides a seamless integration between Power BI and Fabric Embedded Version, offering a holistic solution for your business intelligence needs.
2. Enhanced Data Visualization: Present your data in the most impactful way with advanced visualizations and dynamic reporting capabilities.
3. Advanced Analytics: Leverage the power of predictive analytics and machine learning to gain valuable insights and make data-driven decisions.

4. Scalable and Secure: Handle large volumes of data securely, without compromising performance.
5. Easy Deployment and Management: Enjoy a user-friendly interface and intuitive controls for effortless deployment, management, and customization.

Unlock the full potential of your data with Strategnos Cloud BI Edition. Experience the power of integrated analytics and drive growth for your business. Contact us today to learn more and request a demo

Share and Managed Report Access

With Strategnos Cloud BI, you have the power to implement permission-managed segregation of Power BI reports through a hierarchical structure. This structure includes Business Units, branches, and folders, allowing you to organize and manage your reports effectively. This hierarchical approach provides flexibility in how reports are shared internally and externally with customers. You can easily define permissions at each level of the hierarchy, granting access to specific reports to different teams or individuals based on their roles and responsibilities. This granular control ensures that sensitive information is kept secure while enabling seamless collaboration and sharing of insights. Whether it's sharing reports within your organization or extending access to external customers, Strategnos Cloud BI offers the flexibility and control you need to manage your reports effortlessly.

Licensing

Strategnos Cloud BI Edition goes beyond traditional licensing restrictions, providing you with the flexibility to procure embedded capacity directly from Microsoft. This eliminates the need for restrictive licenses and opens up a world of possibilities for your business intelligence solution.

With our Cloud BI Edition, the configuration process is simple and hassle-free. Once you have procured the embedded capacity from Microsoft, you can easily set it up within Strategnos Cloud BI Edition, enabling you to start analyzing your data without any delays or complications.

One of the standout advantages of our Cloud BI Edition is the ability to share your insights and reports with multiple people, without the need for individual user licenses. Since the capacity is billed rather than on a per-user basis, you have the freedom to distribute your analytics across your organization, empowering everyone to make data-driven decisions.

This flexibility in licensing and sharing not only saves you money by eliminating the need for additional user licenses, but it also promotes collaboration and data democratization within your organization. Empowering your entire team with the ability to access and engage with the insights provided by Strategnos Cloud BI Edition fosters a culture of data-driven decision-making and innovation.

Experience the freedom and flexibility of Strategnos Cloud BI Edition, where licensing restrictions are a thing of the past. Maximize the value of your data and empower your entire organization to drive growth and success. Contact us today to learn more and request a demo.

Please note that Strategnos Cloud licensing and Power BI/Fabric licensing are separate entities. As a customer, you will be responsible for procuring your own Power BI and Fabric capacity directly from Microsoft. Strategnos Cloud BI Edition seamlessly integrates with these capacities, allowing you to leverage the combined power of both platforms. This separation of licensing ensures that you have the flexibility to choose the appropriate capacity based on your specific needs and scale your analytics solution accordingly. By providing your own Power BI and Fabric capacity, you have full control over the licensing and can optimize costs based on your usage requirements.
