

CYTEXTM

UNIFIED RESILIENCE PLATFORM

**Eliminate
App Sprawl**

**Reduce
Misconfiguration Risk**

**Fortify
Security Posture**

AI Powered Advanced Cybersecurity

Cytex Unified Cybersecurity Platform is a patent-pending, full-spectrum solution that addresses cyber-defense by providing a AI-powered suite of proactive security tools.

Cytex AI-Powered Active Defense

A New Age of Cybersecurity

With **CYTEX AI-Powered Unified Platform**, you're not just getting a security solution; you're getting a future-proof digital ally. Welcome to the future of cybersecurity

Real-Time Detection with State-of-the-Art AI Engine

In the evolving realm of cybersecurity, real-time responses are crucial. Cytex proprietary AI engine stands at the forefront of innovation, offering unparalleled speed and precision. Here's how it revolutionizes threat detection:

Identify

Gain a panoramic perspective of your entire supply chain's security posture.

Protect

Our AI-driven tools constantly adapt to new threat vectors, ensuring proactive defense.

Collaborate

Forge stronger partnerships through collaborative auditing and vulnerability management.

Endpoints

Ensure all your user devices, from desktops to mobiles, are safeguarded

Networks

Advanced intrusion detection and prevention across your entire network

Cloud Apps

Secure your SaaS applications and keep your cloud data protected

Cloud Instances

Safeguard your hosted infrastructures, be it on AWS, Azure, Google Cloud, or any other provider

Connected Partners

Extend your cybersecurity shield to your partners, ensuring a holistic security ecosystem

**Full
Spectrum
Visibility**

Navigating through complex cybersecurity data is a challenge. The Cytex Co-pilot is your natural language digital assistant.

Data Access

Simply ask, and Co-pilot fetches the required data for you

Instant Reports

Co-pilot can generate detailed analytics & summaries at your command

Threat Hunting

Co-pilot will search endpoints, cloud apps, & connected partners for threats and vulnerabilities

Anticipating Tomorrow: Evolving AI

Staying ahead of cyberthreats requires more data & better decision making. Cytex Platform is uniquely positioned to turn data into insights.

Learning from the Past

Our AI meticulously analyzes historical data to recognize the 'steady state' – the baseline of normal operations. Any deviation from this steady state suggests potential anomalies or threats, ensuring quick intervention

Updating with Global Threat Intelligence

By continuously integrating data from global sources, our AI remains current against malicious strategies before they reach your organization.

Evolutionary Preparedness

Cytex AI is designed to evolve with every threat it encounters. This continuous learning approach ensures that the platform remains several steps ahead of threat actors.

The Cytex Unified Cybersecurity Platform protects your organization from ever-evolving cyber threats. By centralizing and automating cybersecurity with the power of AI, Cytex keeps your organization at the leading edge of cyber-defense.

Unlocking a Safer Tomorrow: Trust as a Competitive Advantage

The Essence of Security Frameworks

A security framework isn't just a set of policies or checklists—it's the bedrock on which we build a secure, resilient, and trusted infrastructure for our partners. Cytex supports SOC 2, NIST CSF, NIST 800-53, ISO 27001, CIS, PCI, HIPAA, CMMC, GDPR, CCPA, FINRA, OFDSS, and bespoke frameworks.

Enhanced Protection

Guard against data breaches, reducing potential financial liabilities and reputation damage

Regulatory Compliance

Ensure that all connected partners meet local, state, and federal cybersecurity standards

Operational Efficiency

Establish clear protocols and responsibilities, streamlining security processes

Stakeholder Trust

Increase confidence among citizens, partners, & other stakeholders in the security of your digital services

Future Proof

Stay ahead of emerging threats with a structured approach to adapt & evolve

Audify

Breakthrough in Continuous Compliance Attestation

Audify is a patent-pending solution that bridges the gap between compliance and security eliminating the need for self-reporting and point-in-time audits by providing real-time control attestation.

**CYTEX
EXCLUSIVE
INNOVATION**

Real-Time Monitoring

Audify constantly scans & assesses your security posture, ensuring that you're always in compliance & prepared for threats

Automated Reporting

Receive automated, detailed reports that offer insights & actionable steps

Scalability

Whether for a single department or across multiple connected partners, Audify grows with your needs

Strengthened Defense

Leverage Audify to fortify your defenses, prioritize security tasks, & optimize your resources

Trust Through Transparency

Provide stakeholders with up to date compliance data, reinforcing trust.

Real-Time Compliance Assurance

With Audify, continuous compliance attestation is no longer an aspiration—it's a reality.

Cytex

Data Supply Chain Security

Trusted. Dynamic. Collaborative.

Cytex is at the forefront of securing the data supply chain to ensure uncompromised business continuity.

Comprehensive View

Gain a panoramic perspective of your entire supply chain's security posture.

Adaptive Technology

Our AI-driven tools constantly adapt to new threat vectors, ensuring proactive defense.

Enhanced Collaboration

Forge stronger and more secure partnerships through collaborative auditing and vulnerability management.

Continuous Evaluation

Real-world Threat Scenarios

Cytex continuously evaluates the security posture of connected partners in real-time

Continuous Assurance

Cytex data partner testing exposes potential vulnerabilities before they can be exploited

Dynamic Trust Scoring

Partner Risk Stratification

Risk stratification for connected partners based on the latest threat intelligence, historical data, and penetration testing results

Temporal Risk Tracking

Trust scores are reevaluated with changes in new data, ensuring that you always have a current view of the partner's security posture.

Collaborative Vulnerability Management

Partner Notification

Our system promptly informs partners of any detected vulnerabilities, ensuring swift remediation

Collaborative Audits

Work hand-in-hand with partners to address security concerns, utilizing our streamlined collaborative tools

Stay Connected. Stay Secure.

Cytex ensures a holistic and adaptive approach to supply chain security through the integration of continuous penetration testing, dynamic trust scoring, and AI powered collaboration tools.

Advantages of the Cytex Unified Cybersecurity Platform

Full-Spectrum Protection

Cytex offers a complete range of security capabilities, including a DNS firewall with Traffic Monitoring & Threat Blocking, Cyber Risk Scoring, Data Supply Chain Security, EDR, CSPM, DLP, ZTNA, and Phishing Simulator. This holistic approach ensures that your organization is protected from every possible angle, leaving no vulnerability unchecked.

Integrated Cybersecurity

Cytex streamlines your cybersecurity infrastructure by consolidating multiple security solutions into one integrated platform eliminating app sprawl. Combining network protection, cloud app security, and sys-log ingestion provides unprecedented visibility and enhanced cyber protection .

Enhanced Efficiency

Cytex eliminates the burden of managing multiple tools and vendor relationships resulting in optimized workflows, faster threat detection & response, and reduced operational overhead.

Cost Effectiveness

Combining multiple security solutions into one reduces licensing costs, training expenses, and hardware requirements.

Framework Automations

Cytex understands the importance of compliance in today's regulatory landscape. Cytex provides automation for various frameworks like SOC 2, NIST CSF, NIST 800-53, ISO 27001, CIS, PCI, HIPAA, CMMC, GDPR, CCPA, FINRA, OFDSS, and CMMC.
