

Build your own apps without using code

ABOUT ENLIGHTEN DESIGNS:

As Managed Microsoft Gold partners, we're equipped with the best Microsoft technology platforms, innovation and software to deliver across New Zealand, Australia and the rest of the world.

Our Modern Work team have been running App in a Day workshops since 2018 and were first to convert from face-to-face training to virtual delivery in March 2020. We can deliver this hands-on workshop in the style that best suits you and your team – face to face or online.

Here's what participants have said:

"I like that I could complete the labs at my own pace and that we had an environment already set up to trial for 28 days. The lab manuals were very detailed and excellent to follow."

"By using the tools and asking questions I was able to understand Power Apps for the 1st time, understood how they fit together with other parts of the MS environment"

"The whole course was well structured. Plenty of notes to go away with and a nice learning curve, starting off simple and later on ramping up to more in-depth functions."

WHAT WE OFFER

Our one-day workshop delivers full immersion into the creation of custom mobile business applications using the Power Apps, Dataverse and Power Automate tools in the Microsoft Power Platform.

Our App in a Day workshop can be delivered by our Modern Work team either face-to-face or virtually. We'll provide you with a trial tenancy environment and guide you through the labs to get the full Power Apps experience.

In our workshop, you will learn how to:

- Create an environment to work in
- Build a canvas app
- Connect to data sources
- Filter data
- Understand and experience the power of Dataverse
- Build a model-driven app
- Customize forms and create business process flows
- Build a workflow using Power Automate

You'll leave this workshop with a comprehensive understanding of how Power Apps could drive productivity and automate your business processes.

This course suits all skill sets - from 'Power what?!' to old-school Dynamics 365/CRM experts.
