

# Collaboration Services – MS365 Azure Tenant Management – Entra ID

## Managed Entra ID

QuickStart Bundle	Light Service Bundle	Full Service
The package is a one-time service. Telekom sets up Microsoft 365 Entra ID with the basic functions and instructs key users of the customer, in a dedicated appointment, to administer, to respond to user requests and to enable further admins to familiarize themselves with Entra ID functionality.	Telekom designs and implements the entire service and provides operational guidance as part of its consulting services. Furthermore, in addition to the services already included, individual services for operation can be called up by the customer as part of changes for which a charge is made.	Telekom designs, implements and operates the entire service.
		Customer centric Module-based bundle
		Telekom designs and formulate a custom module based bundle that fits customer's need and requirements

## Challenges

- Need for stable, customized, flexible and future ready solution to be ready for the Digital Edge
- Lack of information and experience around Data privacy and security guidelines
- Need for custom managed solutions (business oriented) instead of standard out of the box Microsoft solutions.
- Know-How to customize, manage, operate and governance
- Central Identity management
- Risks involved using Third party tool integration
- Scope for cost reduction and optimization
- Integrating existing interfaces like IAM, Order shop, ITIL and more
