RSM's Blockchain & Digital Asset 1-Week Workshop

Learn the applications of blockchain technologies for your business and develop your digital asset strategy

RSM, the leading middle market consulting, tax, and audit firm has served over 350 digital asset clients nationally. Work together with us to gain valuable industry knowledge, develop your digital asset and blockchain strategy, and take full advantage of RSM's economies of scale.

Workshop Objectives

Take the first step to future-proof your organization. Assess your use case, upskill your teams, and engage with blockchain technologies to establish a foundation for future ventures in Web3.

WHAT WE OFFER

RSM's Blockchain & Digital Asset workshop is a one-week program combining assessments on business requirements, and company-wide upskilling to develop a scalable digital asset strategy.

This workshop is a collaboration between both RSM's Blockchain/Digital Assets and Microsoft/D365 Teams. It combines established industry blockchain experience with the technical understanding of Microsoft's solution suite.

- Day 1: Fundamentals of Blockchain & Digital Assets
- Day 2: Tax Training; Create your Digital Asset Team
- Day 3: Technical Accounting; Demos of Subledger Accounting in Crypto
- Day 4: Assessment and Use Case; Regulatory Landscape
- Day 5: Upskilling Plan, Leveraging Power Platform

Why Dynamics 365?

Modern applications

Modern applications that deliver new experiences and connect with a business' existing systems to allow organizations to digitally transform their way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes

Unified data and processes that enable business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship, and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.

Key use cases

Sales

Respond to changing business requirements with a flexible platform to rapidly create new solutions and ensure old solutions are never truly finished.

Service

Understand your customers better and respond more quickly by accessing internal and external relationship data.

Finance and operations

Increase your return on investment with Microsoft's agile and efficient cloud solution.

Talent

Extend your virtual team and coordinate faster with a consolidated view of team members, activities, and responsibilities.

Marketing

Gain end-to-end visibility by connecting data from external markets, social, and legacy sources.
