TrnDigital

Microsoft 365 - SharePoint Intranet

Microsoft SharePoint enables organizations drive excellence by offering a comprehensive solution that constitutes of Information Sharing, Top-notch Security, Communication & Collaboration, Scalability, Workflow Automation and Seamless Integration with Microsoft 365 apps.

TrnDigital helps organizations transform into **Modern Workplaces** that house **State-of-the-Art Intranets** powered by Microsoft SharePoint. Our Intranet solution helps increase **Collaboration** and **Productivity** with essential features like file & document management, knowledge sharing and employee engagement. Our VIVA platform services augment SharePoint's capabilities with a more personalized and accessible experience for every employee making them efficient, effective, and more engaged. Our Intranet solution also covers configuring the Home Sites and Viva Connections Dashboard.

Our Modern Intranet Approach caters to the most crucial aspects of the intranet that garners organization-wide acceptance.

User-centric design > It is of utmost importance to take into consideration the requirements of users. We make sure to identify all stakeholder groups across the organization and design an intranet that meets their specific requirements.

Information Governance > Microsoft Purview for Data Lifecycle Management comes as a standard offering with Microsoft SharePoint. It allows to implement company specific Retention policies that helps organizations comply with applicable data governance policies.

Personalization > A personalized intranet experience to keep users motivated and connected to the organization's goals and values. This helps employees stay engaged with the company, whether they are at the office or working remotely from anywhere across the globe.
