readiness.

Application Assurance Guaranteed

- **Migrate** your application portfolio to Windows 11, Server 2022 and Azure.

- **Keep applications running** through every Patch Tuesday and every software and security update.

- **Replaces** technically challenging, consultancy-based application repackaging services.

- No client requirements and **zero infrastructure** required.

- **Eliminates** downtime.

Readiness de-risks change.

Faster change, less risk.

Backed by some of the world's leading application packaging experts, Readiness can test thousands of applications per day against over **300,000 rules**. It delivers best quality, consistent standards-compliant packaging, faster and at a much lower cost per application.

Change is constant and more frequent in this era of "Windows-as-a-Service" (evergreen). Readiness delivers continual risk assessment of the changes to your application portfolio and allows you to fully understand the risk of every patch and security update.

With Readiness, you can accurately predict the scope of problems that will be encountered when installing new Windows updates. It also allows you to re-assess your "what if" scenarios as often as you need to—the assessment is done in real-time.

readiness.

> "If there's a pattern, it can be repeated. If it can be repeated, it can be AUTOMATED."

Automated:

DISCOVERY

ASSESSMENT + FIXING

TESTING + PUBLISHING

PACKAGING AND CONVERSION

"Working with the automated patch testing, we've seen the number of application crashes and start-up issues steadily decrease. Actually, we wondered if the reporting was not working as **the crashes have now just stopped**."

Unique Partner Benefits

Partners can offer clients a comprehensive annual overlay service that imports and repackages their applications to the desired format, then continually checks and protects against all Microsoft's patch and security updates.

There is no need for dedicated hardware, database servers, backup systems, or on- site specialists—**just a browser**.

Readiness offers partners new revenue opportunities and greater customer loyalty.
