The actions done during the sprint and the timeline of the sprint

04

Deliverables

The outcome of the Insight Sprint and the guaranteed deliverables

A decorative graphic on the right side of the slide consisting of several overlapping, semi-transparent geometric shapes in shades of gray and teal, creating a modern, abstract background element.

Applications Powering Business

Line of Business Applications

LOB applications automate and streamline business operations, improve efficiency, collaboration, and provide valuable insights for informed decision-making. They are essential tools for business success.

External-facing Applications

External-facing applications such as customer portals, e-commerce platforms, and mobile apps can improve customer engagement, loyalty, and satisfaction, driving revenue growth and increasing brand reputation.

Internal Applications

Internal applications such as HR systems, project management tools, and accounting software improve operational efficiency, collaboration, and data analysis, enabling informed decision-making, and increasing productivity and profitability.

- **Optimize and Modernize:
The Value Proposition**

Business Goals

Customer experience, revenue generation, and cost reduction

IT Simplification

Security and Compliance

Time to market

Scalability, Resiliency, and Performance

Integration

API integration, data integration, and workflow integration

Agility

DevOps Capabilities

Data management

Data privacy, data retention, and data access control

Total Cost of Ownership

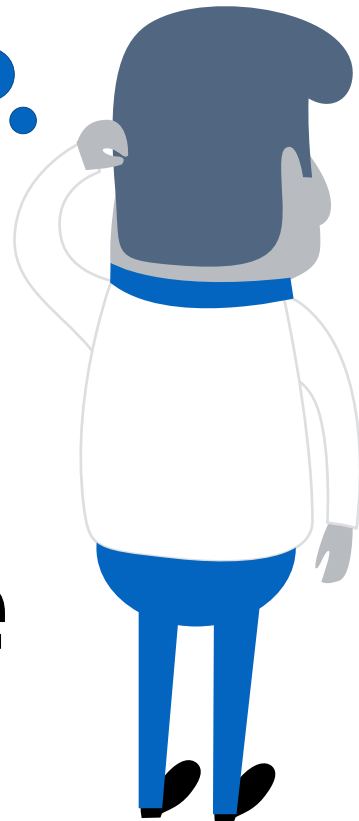

Infra cost & ongoing maintenance

I don't have the luxury of creating a new app from scratch. What can I do?

Can I reuse my existing codebase? I would love to build from there

Do I really need to learn new languages and new tooling to use the cloud?

Enterprise Dilemma?

How do we solve the Enterprise Dilemma?

Cloud Maturity Model: The possibilities
