

CloudAMQP

[CloudAMQP.com](https://cloudamqp.com) offers fully managed RabbitMQ clusters, perfectly configured and optimized, ready in 2 minutes. With over 50,000 running instances CloudAMQP is the leading hosting provider of RabbitMQ in the world. A lot of our clients like Mozilla, Docker, and Salesforce have stayed with us since the beginning.

Why CloudAMQP?

- Around the clock support
- Easy monitoring via the Control Panel
- Custom RabbitMQ alarms via email, webhooks, and external services
- Diagnostic Tool that checks your RabbitMQ setup against Best Practices
- Team accounts for collaboration between coworkers
- Scale your cluster without downtime
- Plug-ins are easily enabled
- Instant upgrading to new Erlang/RabbitMQ version
- Node specification available (dedicated plans only)
- SOC2 and GDPR compliant
