

# SQL Server Migration and Modernization

Getting a modern database platform

# Database Migration Assessment

Focus on real business value in the migration

Remove the uncertainty and get answers to some of the most important questions ahead of a major database migration to Azure project

With a Database Migration Assessment, we create an overview of your potential to migrate your databases to Azure based on a representative selection of your SQL database servers

- Get solid insights in the real potential of moving databases to Azure
- We focus both on what could and what should *not* be migrated
- Pricing example:  
Review of 10-25 SQL Servers and a final workshop with a review of the findings: 50.000 DKK
