Our Education Solutions Principles

- Single version of the truth
- Single KPI platform
- Advanced Analytics
- Actionable Insights
- BYOA™ – Build Your Own Analytics (self-service)
- Simplified User Experience
- Inter-operable - modular
- Scalable

OneEd provides real-time data and insights to help education leaders:

- Increase student achievement
- Improved decision-making
- Greater transparency and accountability

Experience ONE Version of the Truth

OneEd is an enterprise cloud-based educational Data Warehouse solution integrated with rich analytics in a collaborative environment that provides advanced analytics and actionable insights across K-12 educational institutions.

- OneEd provides real-time data and insights to teachers, school administrators and educational institutions on how to improve student performance, optimize classroom resources and improve accountability.

- OneEd helps leaders identify where teaching resources are being most effectively used, and where they can be reallocated to have the greatest impact on student's success.

Legend:
- School Level DSS
- Compliance
- Parent Engagement
- School Quality

OneEd (center)

- School Report Card — Assessment Results, Accountability, Academic Results, Per Pupil Expenditures
- Student Profile — Academic Progress, Interests, Social Emotional, Health Indicators

- Accountability Reporting — Academic Achievement, School Quality, Growth
- Dropout Predictive Model — At-Risk Students, Socioeconomic Variables, A-B-C Variables
- Assessment Profile — State Assessment, Interim Assessments, Baseline Assessments

OneEd addresses three main challenges:

- **Data Integration and Management:** Integrating data from multiple sources and managing it effectively to ensure data accuracy, completeness and consistency.

- **Data Analysis and Interpretation:** Analyzing and interpreting large amounts of educational data to make it more accessible and actionable, so that it can be used to drive improvement and support student success.

- **Data Privacy and Security:** Ensuring the privacy and security of student data being collected, stored and shared in secure systems with strict privacy policies to prevent unauthorized access and breaches.

Key Functionalities to Experience a Single Version of the Truth

Integrates data from any source (structured or unstructured data)

Includes more than 10 domains including: Student Academic Record, Enrollment, Attendance, Assessment, Graduation, School Organization, Staff among other

Comes with data integration configurations for major education vendors, including Ed-Fi.

- **Increased student achievement:** By analyzing data on student performance, teachers and student support staff can identify areas where students are struggling and implement targeted interventions to improve their academic success.

- **Better tracking and compliance:** OneEd can help leaders ensure they are meeting all state and federal regulations, and that all students are on track to graduate.

- **Personalization:** By analyzing student data, teachers can provide personalized learning experiences to students, which can lead to greater engagement and success.

- **OneEd provides leaders with easy-to-understand visualizations of student data,** which can be shared with teachers, parents, and other stakeholders to promote transparency and collaboration.
