

Analytics Jump Start

A modern Data Analytics platform is modular and built for rapid development and value-based results; the transition however can seem overwhelming. To ease the move to a modern Data Analytics platform, Covenant has created an “Analytics Jump Start” engagement. This program is a 4-week project that is designed to help an organization in high-level discovery and planning efforts learn how analytics can transform their business, and what concepts must be understood to do more with their data.

Timeline

Education

Overview and training for how analytics can be utilized within an organization to transform how decisions are made.

1 day
