

The OutThink Platform

1. Phishing & Security Awareness Training

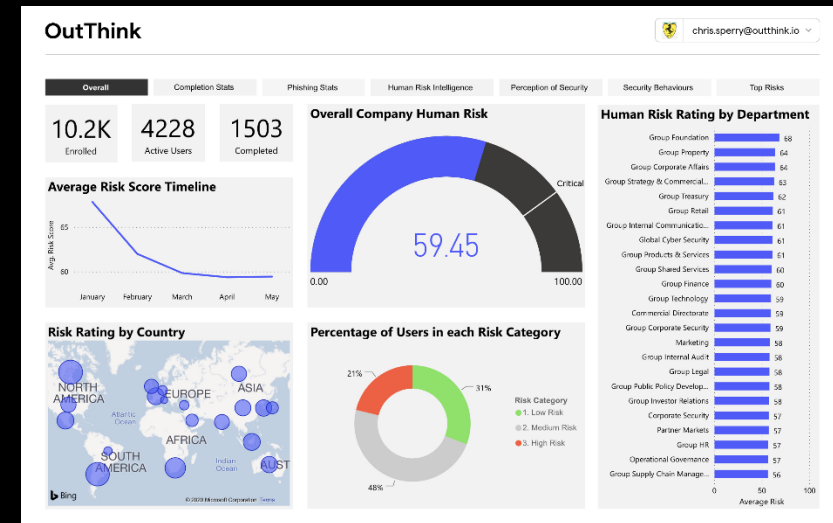

OutThink delivers targeted phishing simulations and security awareness training (GCHQ / NCSC certified) based on employees' needs and risk.

[Click here to see a sample.](#)

In the process, the algorithms measure learning success and things that really matter, such as employees' attitudes, sentiment towards security, intention to comply with the security policy, level of engagement, human risk score, etc.

Human risk management platform (SaaS)

2. The "Wow" Factor, Human Risk Intelligence

OutThink presents live dashboards that answer three fundamental questions:

1. Who are my high risk employees and groups?
2. Why are these people more likely to cause a security breach?
3. How can we support them better?

Based on the human risk intelligence collected, the OutThink platform suggests easy to deploy (one click) improvement actions.

Or leave it on auto-pilot. With fully-automated workflows, OutThink continues to educate your employees. It's all secure, ethical and GDPR-compliant!

Gartner

OutThink receives "representative vendor" recognition in Gartner's Market Guide for Security Awareness Computer-Based Training, July 2020

Industry Validation

OutThink is named a representative vendor* for “... **unique** and **innovative** approach to delivery of security awareness training content to end users across the organization”.

OutThink is the **highest rated security awareness solution**, with a perfect 5.0 score**. This score is based on customer reviews independently verified by Gartner. Read all user [reviews](#).

A revolution in online information security awareness training!

— Head Of Information Security & Data in the Finance Industry

Wow! OutThink are providing an amazing piece of technology that's indistinguishable from magic! The training is individually tailored to each of our employees by their awesome machine learning algorithms and we find out how people feel about security, what their attitudes are. This is super important, because it's what drives their security behaviours.
