Data will talk if you're willing to listen to it.

Jim Bergeson

Analyzing and drawing conclusions are very important business skills. Appropriate "listening in" to the data collected by your company is the key to improving financial results. If you are looking for specialists in the field of Business Intelligence solutions who are real passionate about data analysis, you are in the right place!

Members of the **EBIS team** have many years of experience in the implementation of Business Intelligence systems in a number of companies around the world. We will help you efficiently change data into insights. All in one view, anytime you need them and anywhere you are.

EBIS is a proven partner in business

Power BI

Power BI

Power BI is a system that offers a comprehensive set of business analytical tools that provide information for the entire organization. It combines many data sources, simplifies their preparation and analysis.

What Power BI **can do for your business?**

- **Compare data from various sources**

  Excel spreadsheets, e-mail marketing systems, social media, streaming data, cloud services and others. All in one place.

- **Business data on one dashboard**

  Get access to all your business data from one management dashboard on desktop and mobile version.

- **Interactive reports**

  Creating clear reports, with an interesting graphic layout, takes little time, and they are available immediately for the whole company.

- **Consistent analysis**

  Power BI is a set of analytical tools for every department of your organization that provide a 360-degree view for business users.

- **Constant access to data**

  Follow the results live using data stream and review them from "general to specific" model.

WHY CHOOSE US?

Specialization

EBIS specializes only in the implementation of data analytical systems.

Experience

we know the system's functionality very well. EBIS implements Power BI from the first versions of the system.

Customer centric

we always stand close to the customer and respond quickly to all questions and requests, so you never have to wait.

Commitment

a strong sense of identification with our clients' projects means that we are constantly striving to be one step ahead of your needs.

Responds to needs

we will configure the Power BI system according to your needs so that it becomes your personal report and will also serve as an analytical and decision-making tool for the whole company.

Transparency

each stage of cooperation is clearly defined, you get constant insight into the progress.

Profitability

we offer competitive and cost-effective solutions to help you maximize your return on investment in new technologies.
