

Migrating to the cloud is a technological and organizational change that requires thorough planning. At Cloud Target, we combine our deep migration experience with the most advanced tools and the expertise of our experts to guide organizations on their ongoing cloud journey.

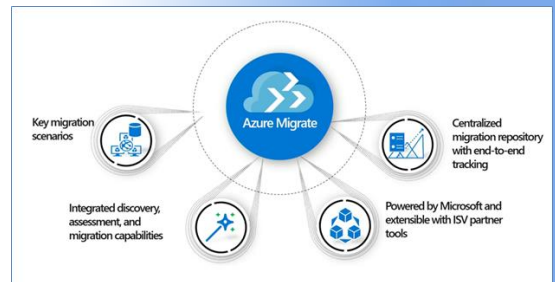

We accelerate **cloud adoption with a comprehensive methodology** business strategy that aligns business strategy with a detailed plan and application of best practices in migration.

Our goal is to make your organization quickly realize the benefits of the cloud, through insights for an agile and effective modernization of infrastructure and applications.

See what analysts are saying:

"By 2025, 80% of enterprises will shut down their traditional data centers."

- Gartner

What we offer → An assessment of your environment!

CT Azure Rapid Migration accelerates and simplifies your migration and modernization projects.

After an in-depth analysis of your IT infrastructure, we provide a detailed report using Azure Migrate, covering workloads, SQL services, backup solutions, and recovery strategies.

Our goal is to clarify the benefits and savings that Azure offers by comparing the current costs with the advantages of migration.

To ensure quality of service, we strictly follow Microsoft guidelines and tools, including the Cloud Adoption Framework (CAF) and the Well-Architected Framework (WAF).

Key Challenges of Migrating to Microsoft Azure

Lack of Expertise

Rely on our experts for data center migrations, exit strategies, and cloud transitions.

Time-consuming migrations

Automated migrations and streamlined assessment process save time, reduce costs, and decrease human error.

Organizational Risks and Cost

Security and reliability by adjusting and improving the efficiency of your cloud operations.

Inadequate Security Planning

Establish a robust cloud presence, with security and pilots for technical validation so as not to compromise the business.
