digital  
experiences

## Accessibility Assessment 2-Day Workshop

In today's interconnected world, accessible technology isn't just a consideration, it's a fundamental necessity.

Ensuring that the systems you use within your organisation are accessible to individuals with diverse abilities is not only a matter of inclusivity and social responsibility, but also a legal requirement in the UK.

Inclusive technology doesn't just enhance the lives of people with disabilities, it enriches the experiences of all users and contributes to a more equitable and cohesive organisational culture.

**Empower your people** with our 2-day accessibility assessment for inclusive digital experiences

Our 2-day accessibility assessment workshop is designed to review your Microsoft Dynamics 365 and/or Power Platform solutions, as well as the accessibility requirements you have within your organisation. From here, solutions will be suggested to ensure your Microsoft systems are accessible to everyone.

You can expect discussions and demonstrations around:

- The benefits of screen readers: how the use of an audio guide that interacts with browsers and with forms, fields, grids, dashboards and tabs in the Power Platform, for example JAWS, Windows Narrator and NVD can allow users to navigate easily around these components.
- Simplifying form design: enabling options like ToolTips and Validation Summary Links to make forms more accessible, looking at colour contrast tools in compliance with WCAG standards, the use of icons, and responsive size layouts for varying devices.
- Keyboard shortcuts and navigation: ensuring users with limited mobility have access to full navigation capabilities for all elements within your Dynamics 365 or Power Platform solution and can accomplish any given task with keyboard commands.

---

We are a Microsoft Solutions Partner and leading provider of cloud-based Microsoft Dynamics solutions. What's more, because we've worked in this space for over 20 years, we understand the obstacles and challenges that organisations face and how our solutions can help to overcome them.

Let us assist you with your accessibility journey for Dynamics 365 and the Power Platform and book a 2-day Accessibility Assessment workshop to discuss your organisation's specific requirements.
