

AZURE WELL-ARCHITECTED FRAMEWORK "YOUR CLOUD JOURNEY THE RIGHT WAY"

WHAT IS THE AZURE WELL-ARCHITECTED FRAMEWORK?

Microsoft Azure Well-Architected Framework (WAF) is a set of guiding tenets that can be used to improve the quality your current Azure deployment. The assessment is used to quickly validate your current architecture and cloud maturity against best practice.

WHAT DOES AZURE WELL-ARCHITECTED FRAMEWORK COVER?

The Azure Well-Architected Framework is divided into five pillars of architectural best practices. These pillars help you effectively and consistently optimise your workloads against Azure best practices and the specific business priorities that are relevant to your cloud journey.

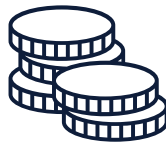

Reliability

The ability of a system to recover from failures and continue to function

Security

Protecting applications and data from threats

Cost

Managing costs to maximize the value delivered

Performance Efficiency

The ability of a system to adapt to changes in load

Operational Excellence

Operations processes that keep a system running in production

WHY CISILION?

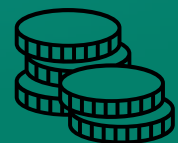

Our mission is simple – to transform and connect business with next-generation IT infrastructure

**GLOBAL
REACH**

**SCALE ON
DEMAND**

**SAVE TIME,
SAVE COST**

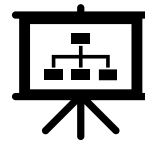

CISILION'S AZURE WELL-ARCHITECTED FRAMEWORK

Interactive Workshops with Experienced Cloud Specialists

EXPLORE

- What is WAF?
- How would it help you?
- Business Justification
- Technical overview
- Define outcomes

PLAN

- Where are you on your cloud journey?
- Where do you want to be?
- In-depth technical analysis

ASSESS

- Prepare recommendations
- Create reports and RAG status

ADOPT

- Identified priority issues
- Share recommendations
- Discuss next steps

Standardised output reports which can be taken to the wider Market

TRIED | TESTED | PROVEN

BENEFITS

- Clearly defined strategy and roadmap
- Standardised yet personalised and agile workshops aligned to industry and Microsoft best practices

BENEFITS

- Cost transparency and agility
- Led by certified Azure Consultants

WHY CISILION?

Cisilion is an award-winning global systems and service enablement partner. In short, we do 4 things:

1. Move our customers to the cloud and hybrid cloud
2. Secure your identities, data, apps and devices
3. Train users so they embrace and adopt the technology
4. Optimise your cloud spend to help you control costs.

Our mission is to inspire intelligent change by delivering next generation IT infrastructure.
