

Microsoft CloudWell – Cloud Security Wellness Check

A consulting engagement that provides the foundation for secure cloud operations and resilience.

What We Offer

Discovery and Analysis

- Architecture review
- Stakeholder interviews
- Review and compare against risk profile, best practices, and our cloud security IP

Insight and Action

- Executive report and recommendations
- Workshops for customer implementers and administrators

Delivery and Execution

- Cloud Security Plan – “Playbook” for managing cloud security
- Plan of Action and Milestones (POAM) – Prioritized work packages for remediation
- Implemented controls matrix – Controls identified in place

“ An expert in complete protection across Microsoft Azure and multi-cloud environments

“With over 180 Microsoft-certified security experts, Microsoft Cloud Security advanced specialization and world-class cloud security solutions like Managed Detection and Response with Alsaac, Eviden helps our clients securely achieve their transformation journey to Microsoft Azure and gain complete end-to-end visibility and control over their cloud environment.”

– Amo Matharu, Head of Cloud Security & Strategic Initiatives at Eviden

Microsoft CloudWell – Cloud Security Wellness Check

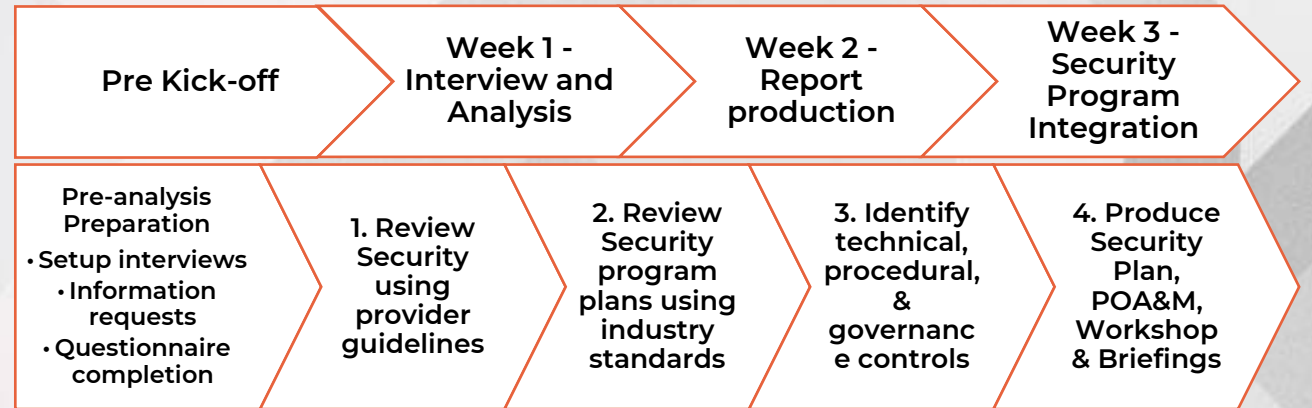

How it Works

Eviden leverages Microsoft's documentation and tools for:

- Cloud Adoption Framework for Azure
- Azure Well-Architected Framework
- Microsoft Cybersecurity Reference Architecture
- Microsoft Cloud Native tools (Microsoft Defender, Microsoft Sentinel, Microsoft Entra.)

Execution Strategies and Solutions

- Project Initiation
- Discovery & Analysis
- Findings Documentation and Recommendations
- Presentation, Workshops, and Next Steps

Outcomes include recommendations to mitigate risks, improve the security posture and increase confidence in data protection.

Business impact delivered reduces risk to the cloud environment and digital transformation enablement.

Microsoft CloudWell – Cloud Security Wellness Check

Customer Outcomes

Strengthen your security posture rapidly by identifying vulnerabilities

Optimize your security investments with expert remediation recommendations

Meet requirements by aligning your cloud infrastructure with industry best practices

Customer Success

Company: European Sports Governing Body

Solution: Management and security governance of the organization functions on the underlying hybrid-cloud environment and infrastructure
