

ALWAYS LEADING

Adopt Cloud With Ease!

The Cloud Adoption Workshop aligns your use of cloud services and concepts with industry best practices.

While most organizations understand the basic benefits and requirements of cloud adoption, this workshop takes an in depth look at the impact it will have on your people, processes, technologies, and business goals. Our consultants ask questions you may not have considered and provide analysis to help get the most from your cloud investments.

Workshop Overview

Sentinel's Cloud Adoption Workshop focuses on critical pieces that indicate success with the adoption of Infrastructure as a Service (IaaS) and Platform as a Service (PaaS) from public cloud providers. During this virtual workshop we will focus on areas related to the cost, security, strategy, reliability, performance, and operation of the public cloud as it is deployed within your organization. The Sentinel cloud team will then identify any gaps or issues that may affect your cloud adoption and provide a report featuring recommendations on ways to improve your cloud performance.

Benefits

- Cost Optimization
- Security
- Strategy
- Reliability
- Performance
- Operational Excellence
