

# Microsoft Strategic Solutions Partner

**FAST FORWARD**  
YOUR LEGACY

TL Consulting Group is strategically partnered with Microsoft as a Solutions Partner in the Azure Digital & App Innovation and Data & AI domains.

We leverage our multi-cloud & data expertise to design, implement and operationalise scalable & resilient data platforms and solutions to enable our customers to make faster and better-informed data-driven decisions with confidence.

Our expansion in Australia is propelled by diverse clients and strategic partnerships.

## Our Experience

- Australian professional services company established in 2008
- Accomplished 30+ Cloud-Native projects serving 20+ customers covering various industry sectors
- Expertise in BFSI, Government, Education and Entertainment sectors
- Complete Enterprise IT Service Management lifecycle solutions from conception to operationalization
- Flexible engineering services and delivery models to support modern application development needs
- Qualified and dedicated CNCF, Multi-Cloud and data experts

 **Microsoft**  
Solutions Partner  
Digital & App Innovation  
Azure

 **Microsoft**  
Solutions Partner  
Data & AI  
Azure

 **CLOUD NATIVE**  
**COMPUTING FOUNDATION**  
SILVER MEMBER

## Service Areas

- Cloud-Native Advisory and Architecture
- Cloud-Native Implementation
- Data Engineering & DataOps
- Data Analytics & BI
- Machine Learning & AI
- Kubernetes Advisory and Implementation
- DevSecOps & CI/CD Pipeline using Azure & GitHub

**Azure Databricks**

**Azure**  
Data Factory

# Outcomes We Deliver

**We deliver solution blueprints to accelerate time-to-value**

**We help you & your teams build advanced platforms & software**

**We transform your IT operations, embedding DevOps & Security**

*TL Consulting offer specialised and cost-effective data analytics & engineering services tailored to our customers to extract maximum business value. Our certified cloud platform & data engineering team are tool-agnostic and have high proficiency working with traditional data platforms and open-source tools.*

## **DECREASED TIME TO VALUE**

Our blueprints, automation, and cloud-native practices accelerate time-to-market and value delivery

## **REDUCED OPEX**

Cut operational expenses through efficient automation and cloud-native solutions

## **AUTOMATION EXPERTS**

Automate your software delivery lifecycle using CI/CD tools and Infrastructure as code practices

## **CERTIFIED ENGINEERS**

Certified multi-cloud engineers with transformational expertise in DevSecOps, CI/CD, Kubernetes and Data platforms

## **SCALABLE ON DEMAND MODEL**

On-demand specialised resource models to help Support capability uplift, advisory and implementation services in a flexible capacity.

# Our Azure Data Service Capabilities

## Data Platform Service Areas

Data Ingestion

Data Storage / Lakes

Data Processing/  
Transformation

BI & Visualisation

Data Science / AI

DataOps &  
CI/CD

Tools & Technologies

DataOps practices & CI/CD

Data Quality & Security best practices

Public Cloud

## Public Cloud

Modernise your data workloads on Microsoft Azure with our **specialised** Azure Data Platform & Engineering services. Our team are tool-agnostic and are experts working with Azure services, open-source & modern technologies to deliver to our customer's goals and objectives.

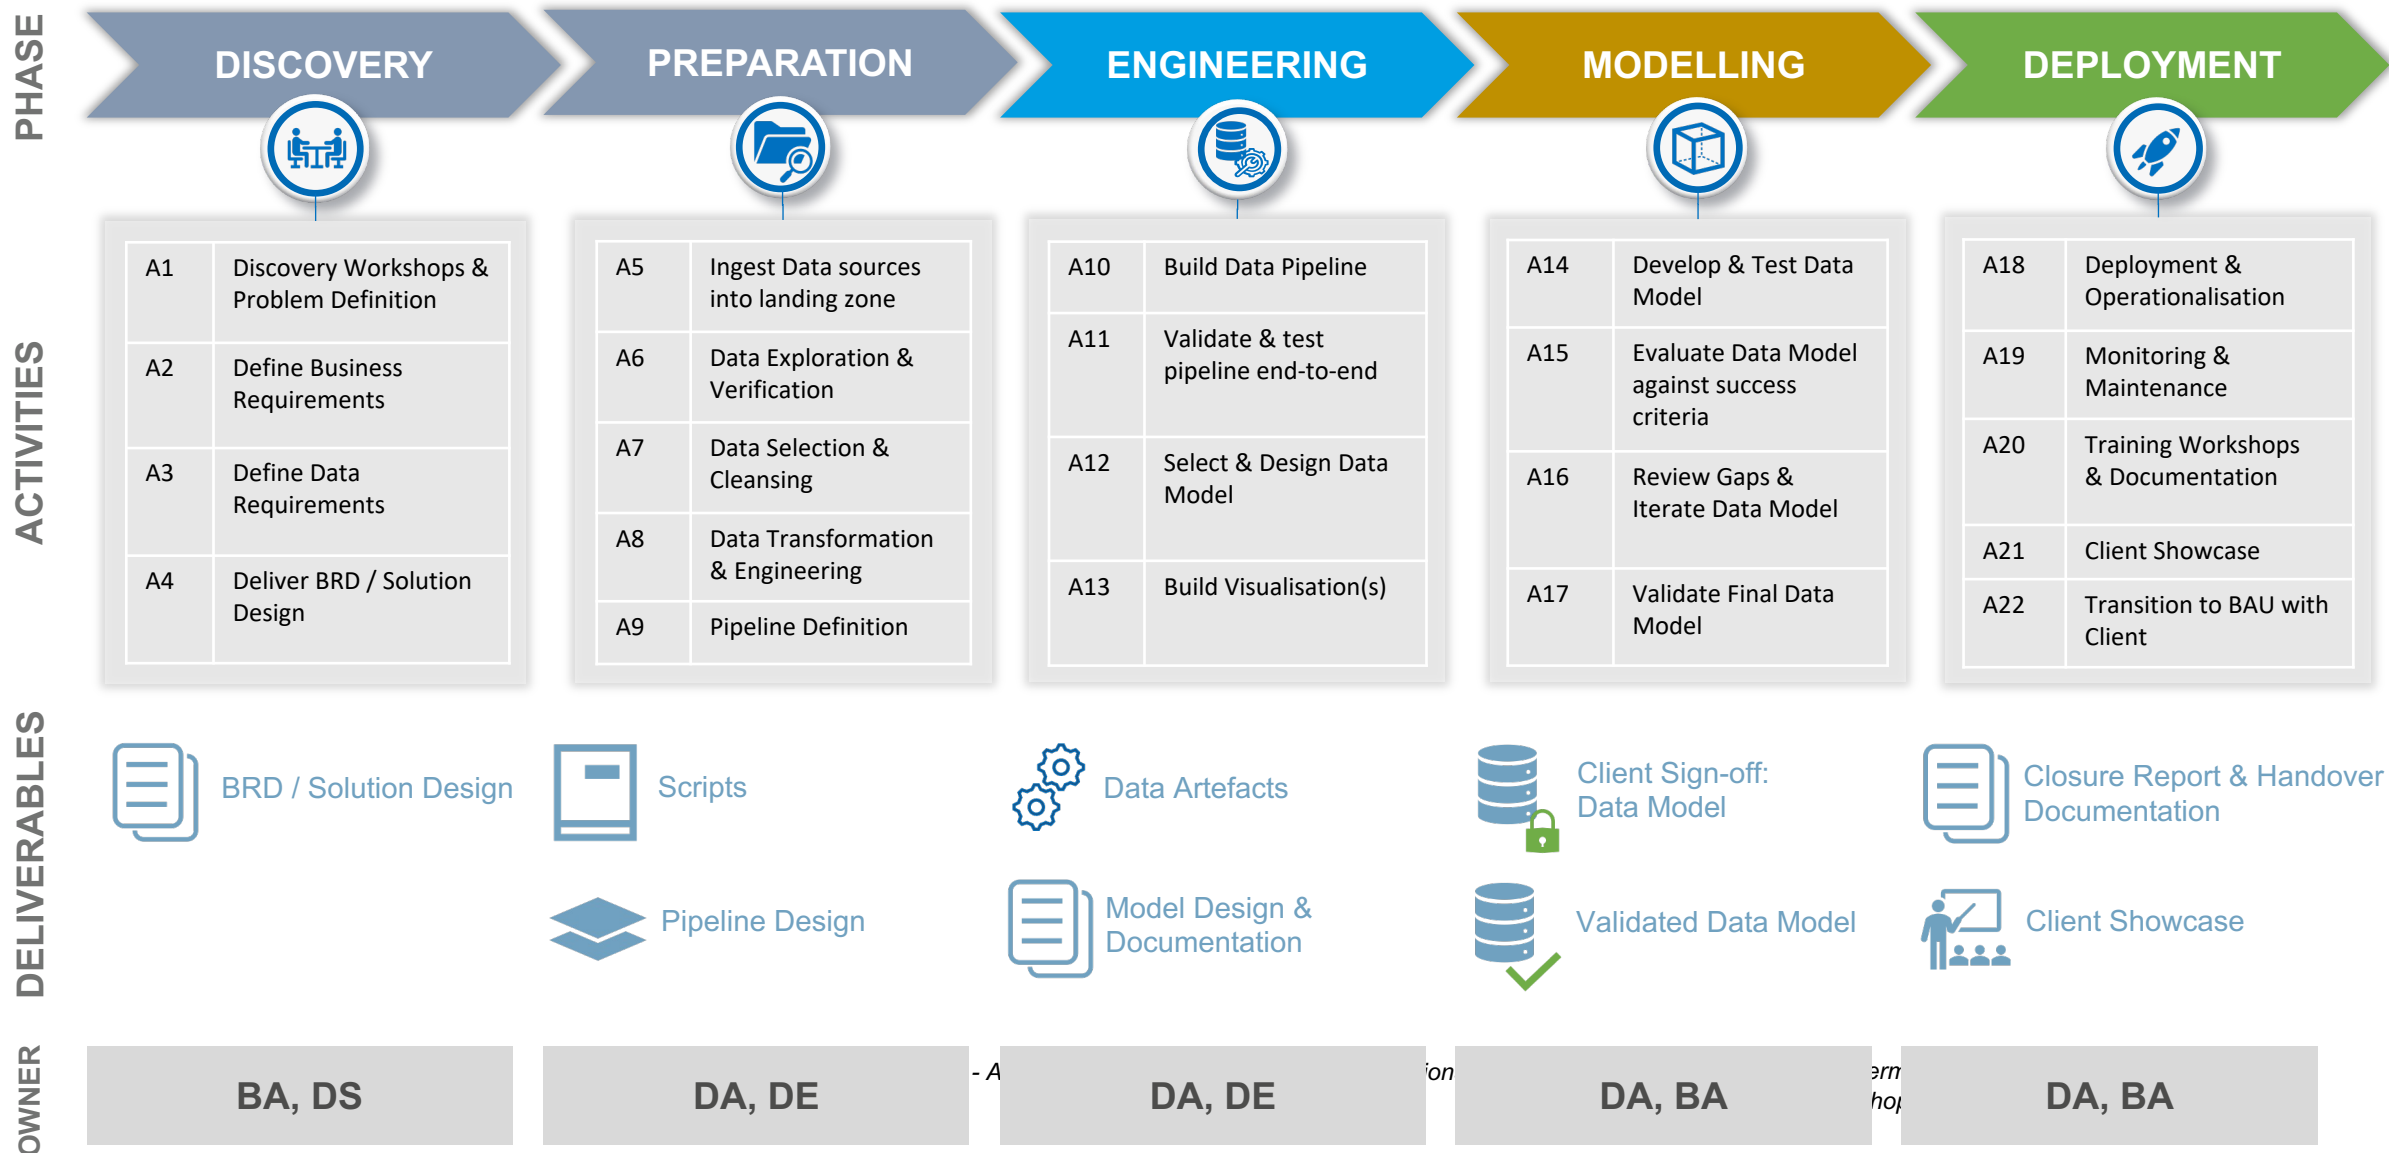

Commercial in Confidence

**Fully Deployed**  
Used extensively across the business

**Active**  
Deployment in progress across the business

**Unplanned**  
Relies on partners to complement
