NICE®

Universal platform connector

Weavee, a product from Onetree, is designed to tackle our clients' technological challenges in connecting their systems and facilitating their management.

Weavee is crafted to provide scalability in system architectures, built on a modular concept that allows for the swift integration of new systems and workflows.

Data security is first

Security partners

Our services comply with advanced security features like Azure AD, Cosmos DB, and Key Vault to ensure that both our systems and your data are safe.

Standards of data encryption

Security is our top priority at Weavee, and as Azure partners, we're committed to providing our clients with the highest level of protection by using the highest standards in data encryption across all our system.

Azure active directory

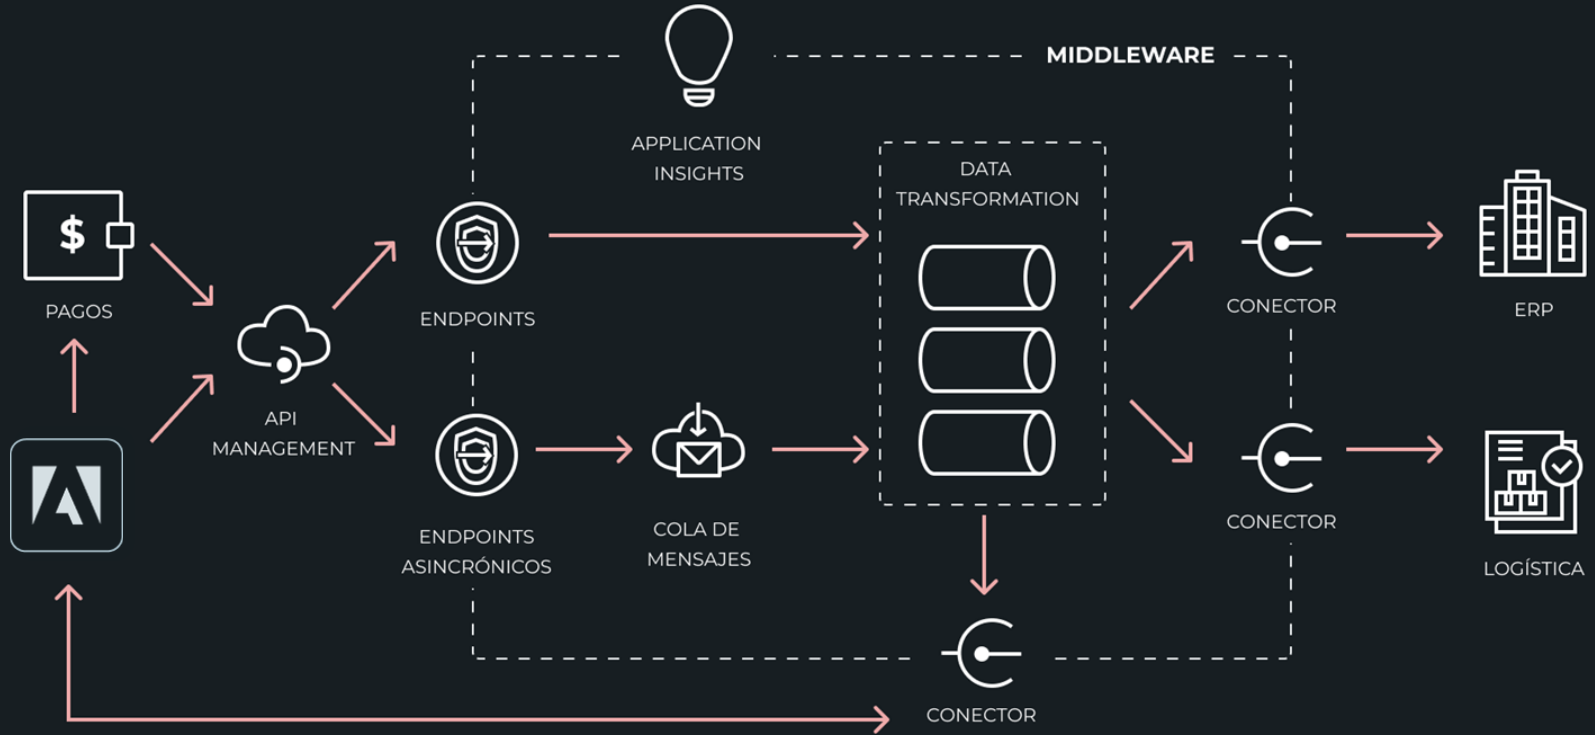

Data encryption

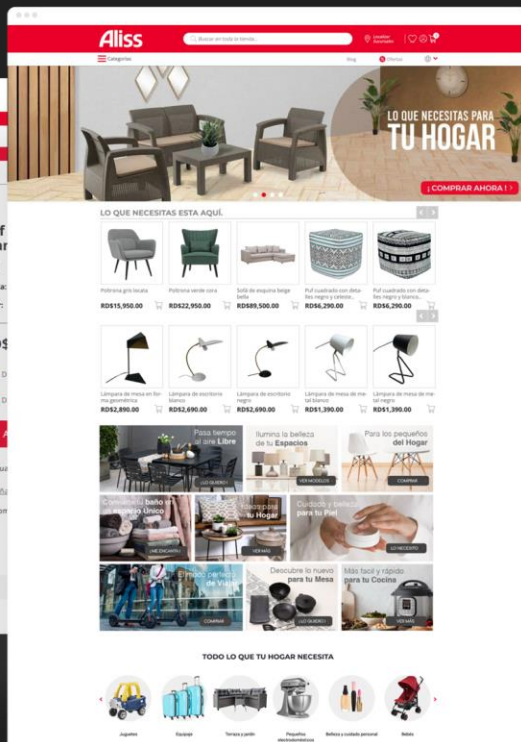

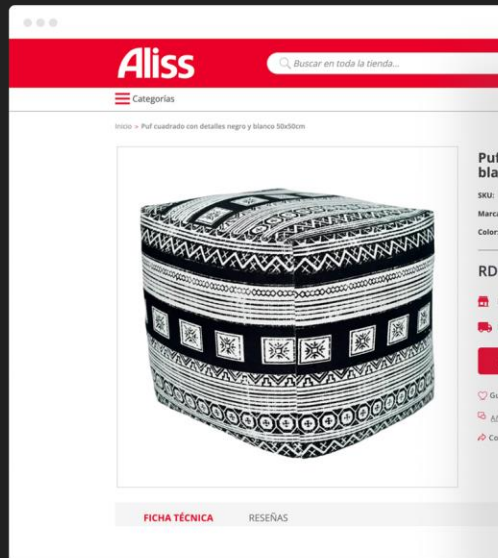

Security in Azure Cosmos DB

Azure Key Vault security

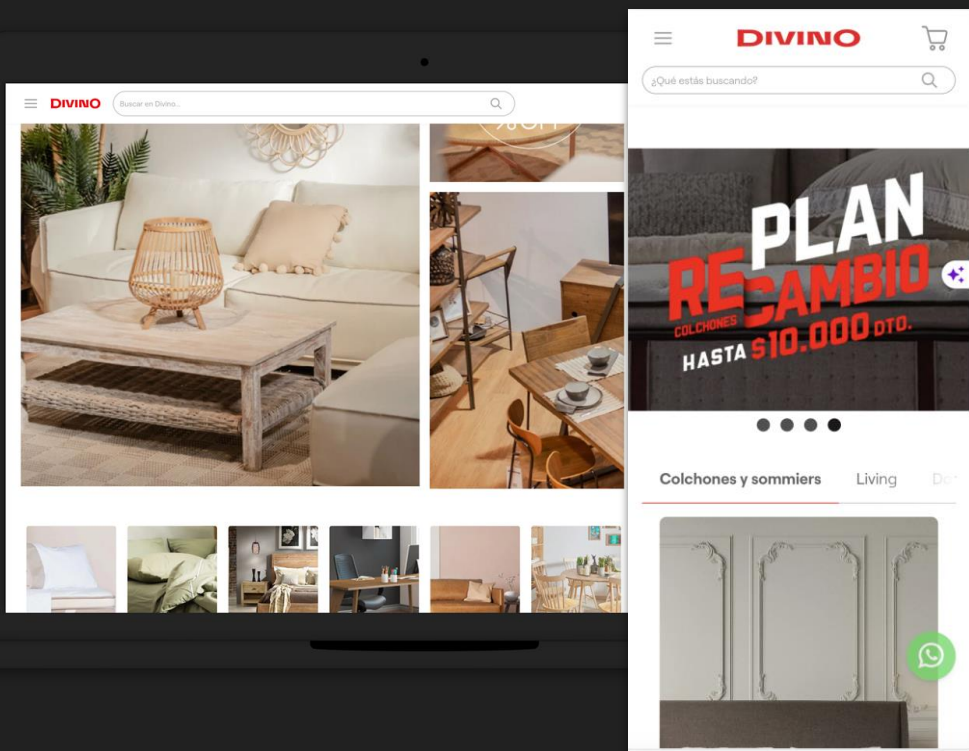

Aliss

Aliss approached Onetree to improve their development which had many issues. We identified problems in their code and scalability, leading to a ground-up redevelopment of their ecommerce solution.

We proposed a custom middleware solution and developed using best practices from Adobe Commerce. The site's launch in Costa Rica exceeded previous performance by 220%, ahead of schedule. Development in 4 countries is complete, with plans to expand further.

Multi-website country (4 sites)
 Magento 2.4 Frontend and backend
 Customized functionalities, Full ERP
 integration.

Divino

ERP/POS/CS integration

Divino needed to integrate a complex architecture of 4 brands connected to SAP, and address an updated data flow with their POS present in over 10 stores nationwide.

Using Weavee, we prioritized services to provide real-time flows where necessary, and asynchronous for non-essential ones. This architecture allowed for an efficient system, resource-wise, tailored to the data needs of Divino's users and customers.

Multi-website architecture (4 marcas)
Magento 2.4 backend - PWA frontend
Customized functionalities, Full ERP and POS integration. Company process automation

Multi-región architecture
