

# SIEM Pathfinder

## Gain a bird's eye view across your enterprise with SIEM for a modern world.

As the importance of security grows, traditional security information and event management (SIEM) solutions struggle to keep pace with today's challenges. Microsoft addresses this with its fully cloud-native SIEM solution, Microsoft Sentinel.

### See and stop threats before they cause harm with our SIEM Pathfinder

Get an overview of Microsoft Sentinel along with insights on active threats to your Microsoft 365 cloud and on-premises environments with a Sentinel Pathfinder.

- Analyse your requirements and priorities for a SIEM deployment
- Define scope & deploy Microsoft Sentinel in your production environment
- Remote monitoring\* of Microsoft Sentinel incidents and proactive threat hunting to discover attack indicators
- Explore threats and demonstrate how to automate responses and perform threat hunting
- Recommend next steps on how to proceed with a production implementation of Microsoft Sentinel

\*optional component

### What our customers say

“With everything running through Microsoft Sentinel, we’ve reduced the time spent on case management and resolution of alerts by approximately 50 percent”

### Pathfinder Highlights:

Understand the features and benefits of Microsoft Sentinel

Gain visibility into threats across email, identity, and data

Better understand, prioritise, and mitigate potential threat vectors

Create a deployment roadmap tailored to you

Develop joint next steps

# SIEM Pathfinder

## What to expect

Over the 30 day SIEM pathfinder, SCC require just 4 hours of your time to get set up and report back the results of the data collected. You will then take away an actionable tailored plan to improve your security strategy.

## Why SCC?

SCC are a member of Microsoft Intelligent Security Association and a Microsoft Security Solutions Partner.

We are proud to hold all four advanced specialisations in the security space strengthening confidence in our expertise and solidifying our position as a leading provider of managed security services.

SCC Cyber leverage the power of Microsoft Sentinel, Defender for Endpoint, and the Microsoft 365 Defender stack combined with our Security Operations Centre to strengthen your security posture and deliver rapid detection & response across your organisation.
