

From ZERO to HERO in 14 Weeks with

HCL'S POWER FINANCE ACCELERATOR

For Dynamics 365 Finance

The HCL Technologies Microsoft Business Applications Practice has a strong and sustained reputation for delivering powerful tools that streamline and accelerate Dynamics 365 implementations.

Our newest accelerator tool – **Power Finance** – is designed exclusively for the Finance workload of Dynamics 365 and enables a complete implementation in less than 4 months!

(Without Power Finance, expect a 6-8-month implementation.)

COMPLETE IMPLEMENTATION

NUMBER OF MONTHS

WITH POWER FINANCE

WITHOUT POWER FINANCE

HOW DOES IT WORK?

Power Finance is a **prebuilt solution** with supporting business processes and documentation for rapid deployment of the Core Financial Management system within Dynamics 365 Finance.

Its standardised **best-practice configuration** aligns tightly to the needs of the modern Finance department, regardless of industry or organization size.

Implemented as a **standalone finance solution** or as the **foundation for expanded functionality** across all areas of the business, the fully configurable Power Finance reduces the time and resource requirements for deployment.

HCL's Power Finance shrinks the timeline for full deployment of Dynamics 365 Finance from 6-8 months to less than 4 months. It's why we like to say that in short order, you'll go from ZERO to HERO in your organisation!

CAN MY BUSINESS TRULY GET FROM 'GO AHEAD' TO 'GO LIVE' IN JUST 14 WEEKS?

Absolutely, you can. But you don't have to take our word for it - here's a visual timeline of a typical deployment done with Power Finance:

Phase	Week	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Provision (Pework)		█	█												
Configure (Building)				█	█	█	█	█	█						
Validate (Testing)									█	█					
Deploy (Implementing)											█	█	█		
Hypercare (Maintenance)															█
Project Governance (Compliance)															

Together, HCL's proven process for Dynamics 365 implementations and our lightning-fast Power Finance Accelerator enable a seamlessly speedy deployment.

POWER FINANCE'S IN-SCOPE FINANCE FUNCTIONS

- Budgeting
- Credit & Collections
- Procurement & Sourcing
- Consolidations
- General Ledger
- Purchase Ledger
- Sales Ledger
- Financial Reporter
- Power BI Embedded Reporting
- Treasury Management
- Fixed Assets
- Tax

Of course, **Power Finance can be implemented as a standalone finance solution** with all the in-scope functions listed above. Alternatively, if your organisation's objective is to establish a fully functional foundation for an expanded solution that eventually spans your entire business, Power Finance's in-scope components are precisely what you need to build that strong base.

Why Choose HCL?
