PROTECT SERVICE

MICROSOFT AZURE SENTINEL MXDR SERVICE

Discover how you can achieve advanced 24/7/365
protection across your entire estate

Securing your business with Microsoft Sentinel-based MXDR services

A huge number of businesses globally depend on Microsoft solutions and security. However, many business operate other cloud, SaaS, on-premise, network, and application services.

The cyber threats to your business, data, users, supply chains, and services are becoming increasingly agile - fuelled by artificial intelligence and automation. The the demands of a highly responsive, continually-updated cyber posture have never been so important. To achieve this, Microsoft launched the SIEM and SOAR solution that is Microsoft Sentinel.

Sentinel is as powerful as the engineers and analysts that run it. CloudGuard have developed enhanced automations, which accelerate its detection, protection, response and remediation through our complementary MXDR service.

Our goal is to work in partnership with each customer to understand their business dynamics and incorporate these into optimal cyber security and cost management controls.

CLOUDGUARD

What we include in the MXDR Service

One-click deployment

1-hour automated deployment for immediate best practices and optimisations ahead of fine tuning.

Continual protection

Our automated monitoring Guardian, Ansel, watches over your digital landscape 24/7/365.

Threat intelligence

We natively integrate advanced threat intelligence data to enrich our detection and response capabilities.

Custom data connectors

Your security relies on access to all your data. We'll work with you to build any custom data connectors.

Multi-cloud protection

AWS, Google, Azure, and private cloud protection solutions with bespoke use case development.
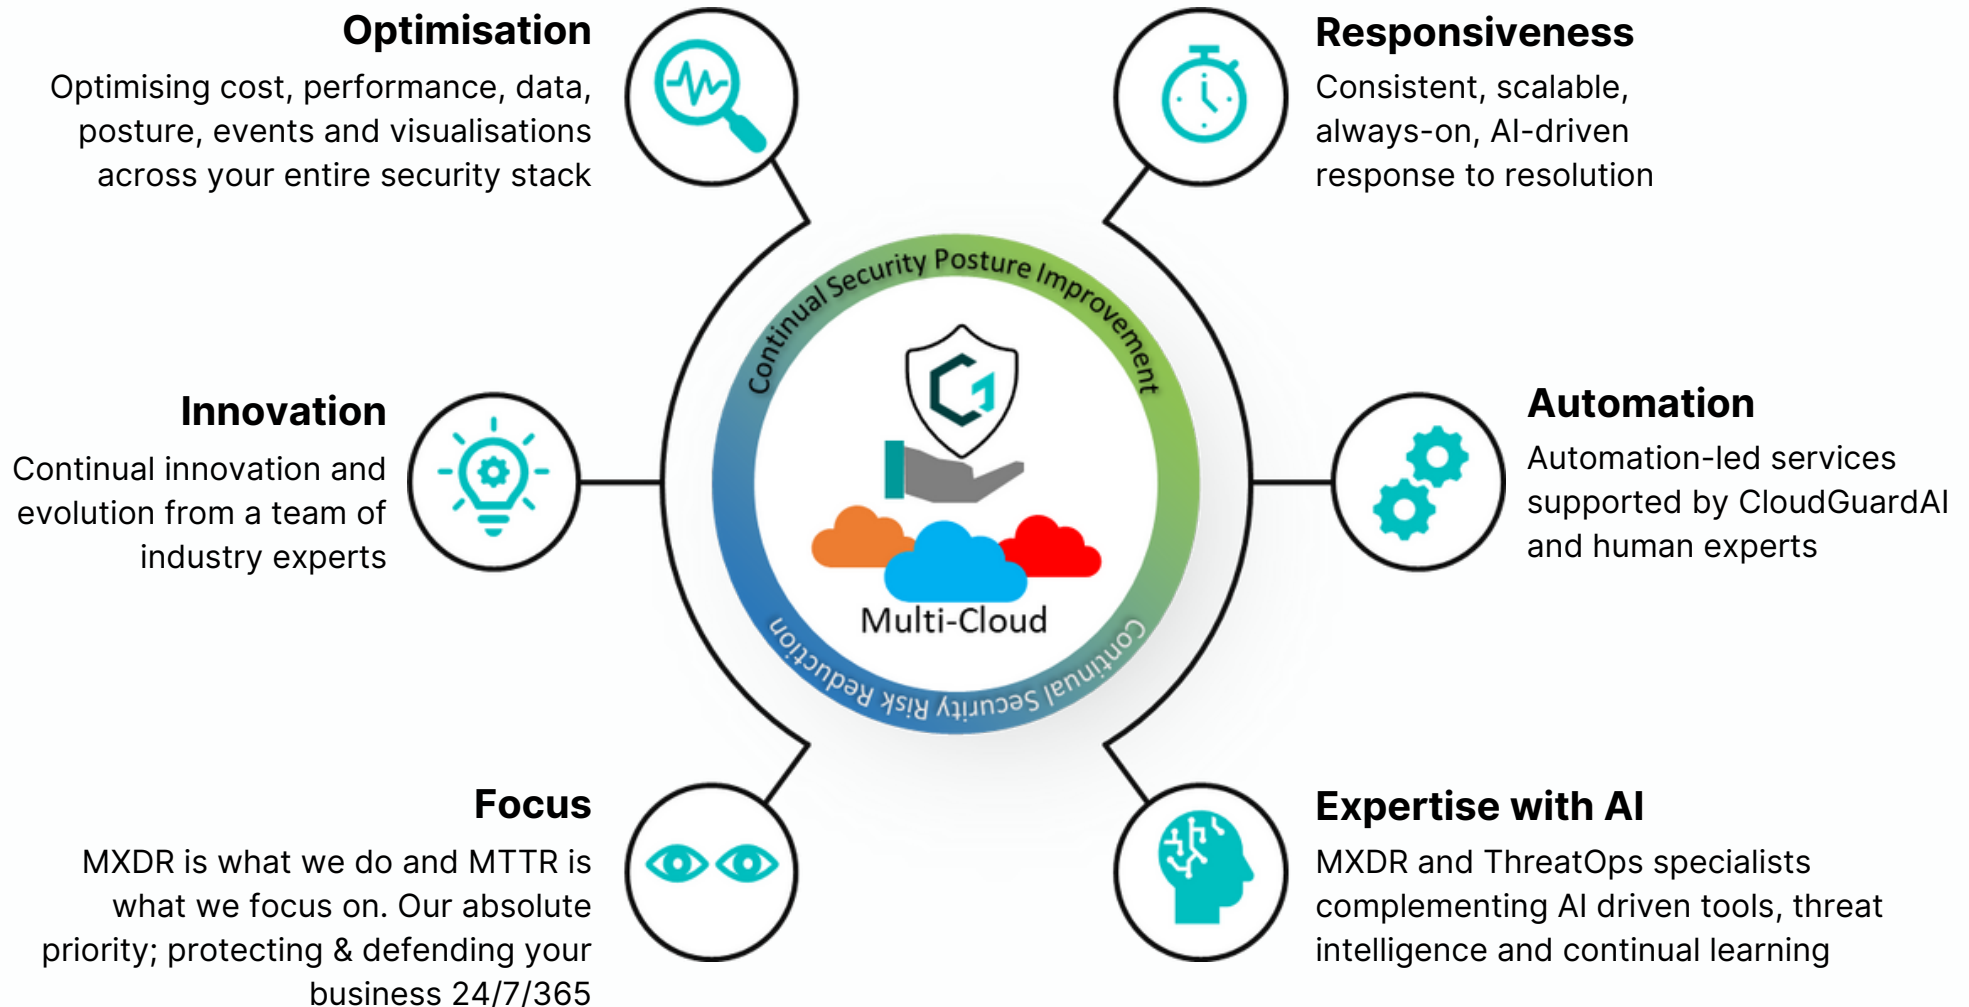

CloudGuard dashboard

Real-time reporting and alerts, including cost optimisation, vulnerability status and more.

CLOUDGUARD

The CloudGuard MXDR service

Optimisation

Optimising cost, performance, data, posture, events and visualisations across your entire security stack

Responsiveness

Consistent, scalable, always-on, AI-driven response to resolution

Innovation

Continual innovation and evolution from a team of industry experts

Automation

Automation-led services supported by CloudGuardAI and human experts

Continual Security Posture Improvement

Multi-Cloud

Continual Security Risk Reduction

Focus

MXDR is what we do and MTTR is what we focus on. Our absolute priority; protecting & defending your business 24/7/365

Expertise with AI

MXDR and ThreatOps specialists complementing AI driven tools, threat intelligence and continual learning

CLOUDGUARD

Our Sentinel expertise sets us apart

We are a Sentinel-focused automation specialists backed by more than 20 years' service in IT security management. We have built a business based on the leading SIEM solution Microsoft Sentinel. We've enhanced their security solution with our expert MXDR support and automation teams. Our focus is continually improving the cybersecurity posture of each of our customers through client success focus and our solution expertise.

- Flexible, responsive security services focused on continually improving security posture and reducing risks
- One-hour, one-click deployment for immediate best practices ahead of tuning
- Incident Response services
- CloudGuard's platform has been developed by Microsoft Sentinel automation expertise focused specialists
- Supported by industry-leading ThreatOps specialists
- World leading, native threat intelligence integration
- Automated 24x7x365 incident alert monitoring across all connected services with human escalation as required
- Security alerts generated across your entire estate and via Sentinel and presented via Customer Dashboard
- In-house development of customer specific Sentinel use cases, analytical rules and workspaces
- Multi-cloud support and visualisation of all business security incidents
- Sentinel connector health monitoring and management
- Customised KQL threat hunting playbooks for customer processes and sensitive data
- Access to our MXDR expert support and Guardians
- A Client Success Manager to understand your changing business needs and augmentation of CloudGuard services to align

CLOUDGUARD

Rapid security incident response

Incident Response is a core part to the CloudGuard MXDR service. Alongside the available playbooks, we work in partnership with customers to build customer-specific Incident Response playbooks and processes and connect these to Microsoft Teams, Azure monitoring and Office 365.

HUNT
Proactive threat hunting

We don't just sit back and wait for attacks to happen. We integrate valuable threat intelligence feeds into our MXDR service, so it can proactively hunt and protect you against new and upcoming threats.

FIND
Advanced threat detection

Artificial intelligence unlocks so much potential in cybersecurity. It enables advanced threat detection by scanning for threats across your entire organisation in real-time, far faster than any human possibly could.

STOP
Rapid incident response

Our automation-first approach guarantees rapid incident response times to any security incident. We're always developing new automation rules to improve security operations, helping to reduce service costs.

GROW
Continuous 24/7 protection

Our MXDR service is always on, meaning your business has next-level cybersecurity protection 24/7. With your cybersecurity taken care of, you can focus on the important task of growing your business.

CLOUDGUARD

What customers say

" *I am impressed by the expertise and customisation of CloudGuard's solution and services. As a digital sustainability bank, we at Radicant are breaking new ground and focusing on innovative solutions. With CloudGuard, we have a strong partner at our side who follows this mindset with the appropriate tools and specialists in the information security area.*

Christine Fahlberg, CISO at radicant bank

" *With CloudGuard, we deployed Microsoft Sentinel which now delivers automated protection, detection and resolution for our systems, our cloud platform and tools - we recommend CloudGuard to our customers in enabling an end to end secure experience."*

CLOUDGUARD

Meet CloudGuard

Our founders

CloudGuard is a global Microsoft Sentinel specialist.

Our approach is based on helping SMB and SME organisations realise and continually improve security posture using an automation-led approach with the Microsoft Security stack.

We develop, implement and maintain a wide array of custom Sentinel connectors into AWS, Google, Salesforce, network and storage technologies, as well as our extensive library of automation tools.

The CloudGuard team is completely customer focused, as well as being highly certified across the Microsoft security portfolio.

Whatever your cyber security maturity and goals, our experts are here to help and support continual improvement.

CloudGuard CEO – Matt

With more than 30 years' IT industry experience mostly in IT security and application development, Matt is both a CEO and Board advisory to a number of businesses. He is familiar with business challenges and building ROI investment cases, as well as optimising cyber strategies across all industries.

CloudGuard CTO – Javid

With more than 20 years' IT industry experience, mostly in cloud and Infrastructure services management, Javid has worked as a partner and consultant in leading advisory businesses. He is familiar with emerging cyber security challenges in multi-cloud services, as well as building and optimising XDR capabilities using automation.
