

Managed Security Services Microsoft Sentinel

By combining the power of Microsoft Security Intelligence with the industry leading cybersecurity services of Eviden, we provide you with options that best fit your unique security and business requirements.

What We Offer

End-to-End Solutions:

- Utilize proprietary IP and strategic partnerships for comprehensive solutions.
- Deploy tailored and complete solutions to handle unexpected challenges.

Global Capabilities:

- Access a worldwide network of 16 SOCs.
- Benefit from the expertise of 5000+ highly experienced and certified security professionals.

Intelligence-Driven Capabilities:

- Leverage Eviden's best-of-breed technologies and innovation.
- Stay ahead using big data, artificial intelligence, and machine learning capabilities in the evolving threat landscape.

Managed Security Services Microsoft Sentinel

How it Works

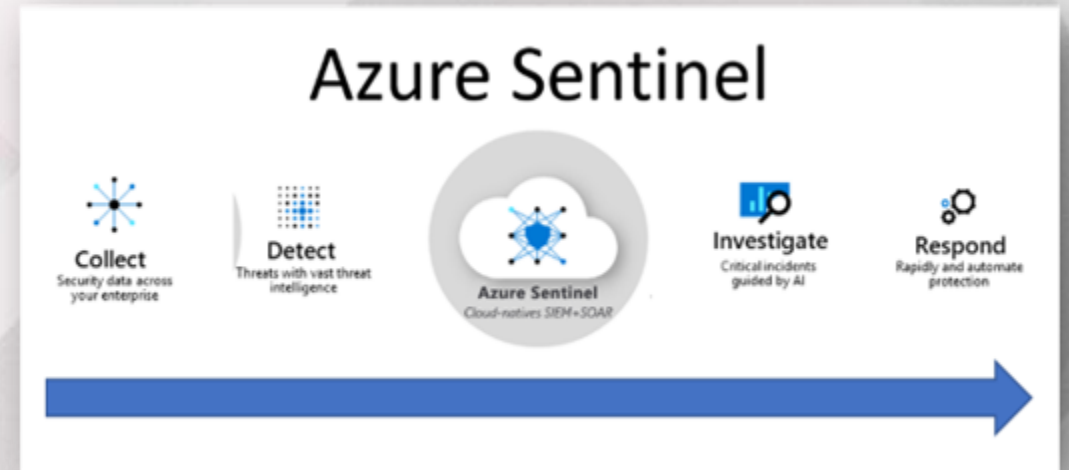

The solution employs an end-to-end strategy for cloud security through the Eviden approach and the Microsoft CloudSecOps Protection Platform, comprising three main components: Cloud Prevent, Cloud Protect, and Cloud Preserve.

Cloud Prevent deploys proactive controls for securing the cloud environment from build to run.

Cloud Protect automates Microsoft security controls to maintain a secure posture.

Cloud Preserve continuously monitors, detects, and responds to evolving threats.

Execution Strategies and Solutions

Managed Security Services Microsoft Sentinel

Customer Outcomes

Optimization for the log ingestion

Custom tailored detection use cases

SOAR playbooks that reduce SOC involvement

Customer Success

Company: Swiss Insurance Company

Solution: Azure Security Services

Outcome:

- Azure Sentinel
- SOC monitoring
- M365 Security
- MCAS
- Microsoft Defender for Cloud

Company: Workplace Pension Scheme

Solution: Azure-based infrastructure

Outcome:

- Microsoft Sentinel
- Azure Native DDOS & WAF
- M365 Security
- Microsoft Defender for Identity
- Microsoft Defender for Cloud
- SOC monitoring

Company: City project for Qatar

Solution: Azure Sentinel

Outcome:

- Alsaac MDR integration
- SOC monitoring
