

# Data Estate Assessment

## Harness the power of data to gain a competitive edge

### Business challenge

Data has become the lifeblood of business — but even with its unlimited potential, realising the full value of data is a complex undertaking. Many businesses collect vast amounts of data, but storing and understanding it has become a manual challenge.

Traditional data platform solutions focus on governance and have a limited ability to serve agile business requirements that require accelerated time to market. Running a data estate assessment sets a pathway for the organisation to eliminate shadow IT initiatives and build an agility stream within their data platform.

### How we help

Insight's team of data analytics specialists will guide you through a two week engagement to provide a detailed analysis of your current data estate and subsequently develop a roadmap for achieving your Data Optimisation Strategy. During this engagement, we'll help understand and assess your business challenges, yielding the following deliverables:

- An assessment of your current data estate, outlining strengths & weaknesses
- A backlog of features needed to modernise based on best practices & growing needs
- An Executive Summary to socialise success & vision with your leadership
- A Data Optimisation Strategy with a modernisation roadmap highlighting next steps and key action items

Our experts will help to ensure you reap all the benefits of a proven data platform solution with best-of-breed data orchestration, exploration and visualisation tools from Microsoft® Azure.

**DURATION:** 2 weeks

### BENEFITS:

- Identify data assets that are important for business success.
- Create a strategy to address challenges in existing data analytics approach.
- Prioritise initiatives that will enable benefits from your data estate.
- Understand the benefits of Azure Data Services
- Build a foundation for AI & machine learning.
- Move beyond infrastructure to the cloud.

### RELATED OFFERS

- Data Modernisation Envisioning Session

- MLOps Accelerator

### Get started.

To learn about pricing and how to begin, contact [ANZ\\_DI\\_Sales@insight.com](mailto:ANZ_DI_Sales@insight.com)

## Preparing for transformation

To ensure you receive the greatest value from this engagement, our experts will need the following:

- Discovery workshop with your Business and Technical stakeholders to align on a definition of business and technical goals and assess current environment.
- An Azure subscription approved to receive data from your business systems

## What to expect

### Ideation & envisioning

We'll begin by exploring your organisation's business strategy in relation to use of data and analytics to understand your goals and prioritised pain points. We will meet with your Business Process Owners to identify your top three use-cases for your Data Optimisation roadmap.

### Rapid Assessment

We will review your current reporting use-cases and document your as-is architecture, data lake and data platform architecture. Through this process, we will identify shortfalls and opportunities for maturity improvement, including data security and governance.

### Outputs

An Executive Summary outlining your maturity assessment and People Change Management recommendations. We will also provide you with a tailored Data Optimisation Strategy report that includes to-be architecture, future use-cases, estimated Azure consumption and technology roadmap for next steps.

## Other Assessment services

### Cloud ROI

A comprehensive evaluation of the ROI to your business for undertaking a cloud migration.

### Cloud Governance

A tailored cloud cost and governance review aligned to your priorities, risk mitigation requirements and budget.

### Application Landscape

A detailed evaluation of your application environment and priorities for application modernisation.
