2. SHIFT PRESENCE:

3. SHIFT Power Apps Implementation

SHIFT was created to provide best practices within Office 365, enabling faster business transformation within a safe common environment.

We put together experienced professionals to bring you best practices within state-of-the-art cloud-based solutions according to specific industry requirements, either through pre-packaged solutions or by creating a unique solution for you.

Leverage your business with our business-ready cloud solutions. Our cloud solutions are pre-configured environments to address specific business requirements. These solutions combine best practices, pre-built integration between the systems, and dedicated and contextualized support.

We help public and private organizations across a wide range of industries solving questions that matter.

Developing an app has never been easier with Power Apps. Nonetheless sometimes we all find ourselves at one time or another faced with a more complex application, blocked and would greatly benefice from having an online coaching or even an additional team to accelerate a new app.

At SHIFT, we provide you a multidisciplinary team available remotely spanning from certified personnel in Power Apps, Power Automate, Power Agents or Power BI or in other complementary competences such as UI/UX or change management to help you deliver a professional application.

We've an experienced and certified team working on the Power Apps since the beginning of this technology, delivering core applications to some of the largest organizations in the world.
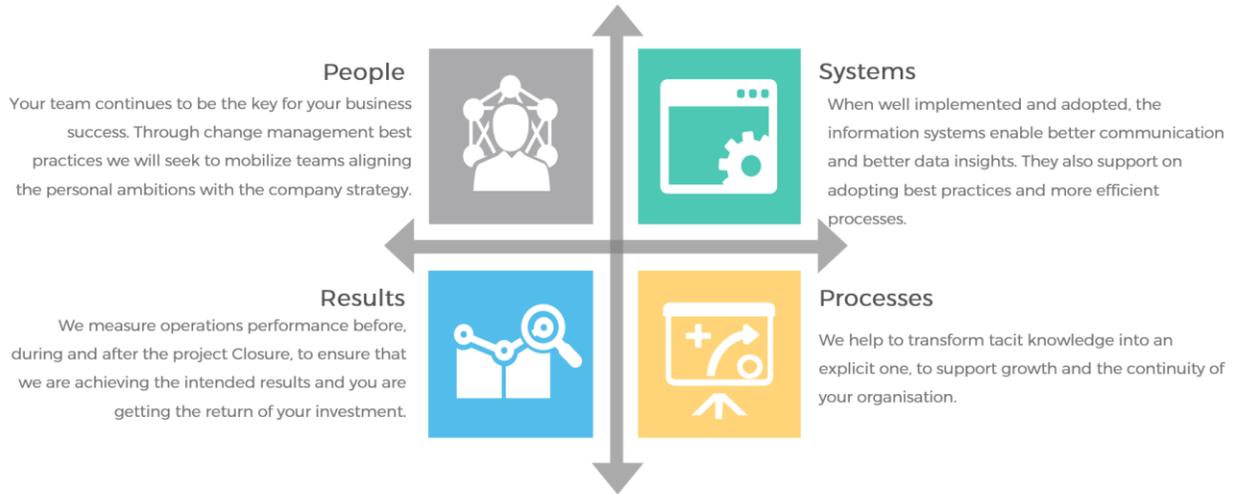

Contact us and step into high gear in delivering professional apps.

Agenda:

1. ½ day briefing to understand the scope
2. We will send you an estimated budget within a day
3. If you agree with the budget we can start development within a week

4. HOW WE WORK:

Generating project management results is just about having a best of breed tool, but it also about mobilizing people, training in the tool and best practices, defining processes and assisting in obtaining results.

People
Your team continues to be the key for your business success. Through change management best practices we will seek to mobilize teams aligning the personal ambitions with the company strategy.

Systems
When well implemented and adopted, the information systems enable better communication and better data insights. They also support on adopting best practices and more efficient processes.

Results
We measure operations performance before, during and after the project Closure, to ensure that we are achieving the intended results and you are getting the return of your investment.

Processes
We help to transform tacit knowledge into an explicit one, to support growth and the continuity of your organisation.

As part of the project online implementation services we also propose services for discussing best practices processes, training and mobilization as per the following deliverable list.

5. TECHNICAL CAPABILITIES:

Currently SHIFT designs and deploys solutions using the following Microsoft technologies:

- Project Online;
- PowerApps;
- Flow;
- Planner;
- Teams;
- Power BI;
- Dynamics CRM;
- Sharepoint.
