

Managed SIEM

Defend Today to Secure Tomorrow – Your AI-Powered Managed SIEM Solution

Our Managed SIEM service, powered by SCC's Aegis platform and our security operations team, offers round-the-clock protection across your estate. Gain a complete understanding of your environment, people, processes, and risks with our rapid incident detection so your team can concentrate on what truly matters.

Our entire SecOps team is equipped with our proprietary technology to deliver future-proof security solutions for your unique needs. This approach ensures faster resolution times, lower security costs, and smarter proactive prevention tactics.

Key Benefits of Managed SIEM

Always-On Security

We protect your organisation 24/7/365, giving you peace of mind that you are secure.

Focus on what matters most

Increase your team's productivity by freeing up their time and resources to focus on core business activities.

Filter out the noise

Minimising false positives and focusing on genuine security threats, reducing the workload for in-house teams.

Enhance threat visibility

With advanced automation, threat intelligence and real-time analysis, our service offers end-to-end visibility across your entire environment.

How Does It Work?

Why SCC?

At SCC, we redefine cybersecurity by seamlessly blending reliability, expertise, and a commitment to your journey in the digital landscape. Our comprehensive solutions are tailored to your organisation's needs and its maturity level, ensuring a robust defense against ever-evolving cyber threats.

Moving beyond today's security paradigms, we're architects of a new era—one where security isn't just a measure but a culture. Our people make the difference—through collaborative partnership, and proactive support, we create the confidence to push boundaries securely. With expert guidance tuned to your growth ambitions, we help clear obstacles, accelerate outcomes, and embed effective security principles across people, process and technology.
