

Crayon Data Control Service

Adopt generative AI with ease of mind

Data governance is important

Any data that is accessible to a user is available to search and display via Copilot, even data that they shouldn't be able to see

\$180

Crayon Data Control Service

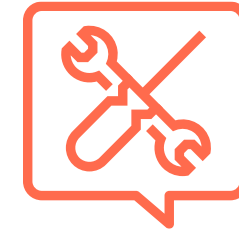

Overview

- Identify sensitive data
- Understand sharing patterns
- Define actions for data safety
- Strengthen control practices

Audience

- No data governance
- Preparing for M365 Copilot

Addressed Issues

- Lack of clear governance of M365 environment data
- Permission management and sensitive data protection
- Missing monitoring capabilities

How can we support?

- ✓ Identification of the most sensitive data
- ✓ Tool configuration
- ✓ Remediation assistance
- ✓ Monitoring

Identification

Define the sensitive data
– from legal perspective

Define internal sensitive
data

Define the sharing needs
and patterns

Configuration

Configure AvePoint Insights

Create containers

Set up definitions of risks

Create policies

Remediation

Apply policies

Protect sites and users

Revoke access

Monitoring

Aggregation of M365 Permissions and Security Data

Tracks high-risk activities

Critical issues prioritized

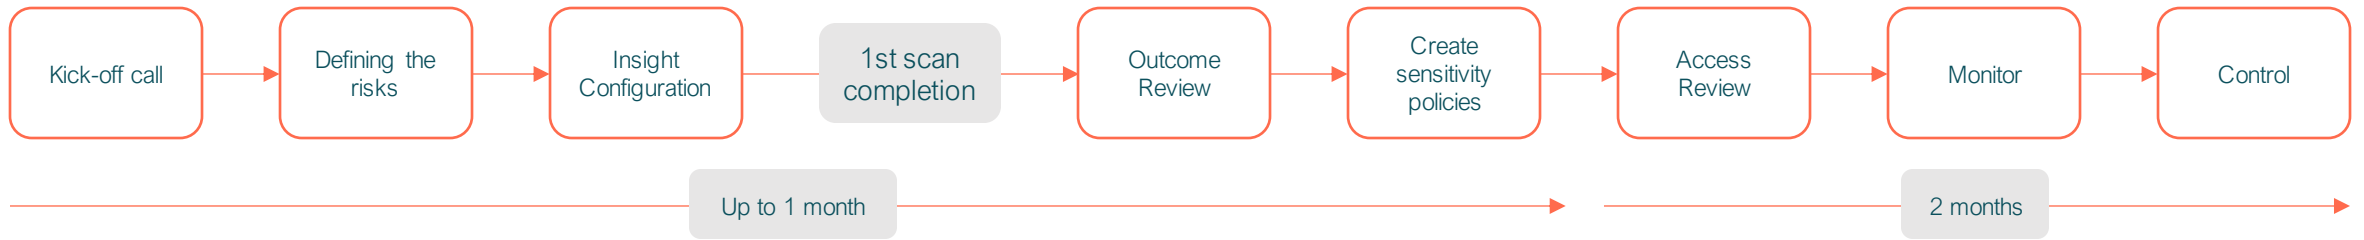

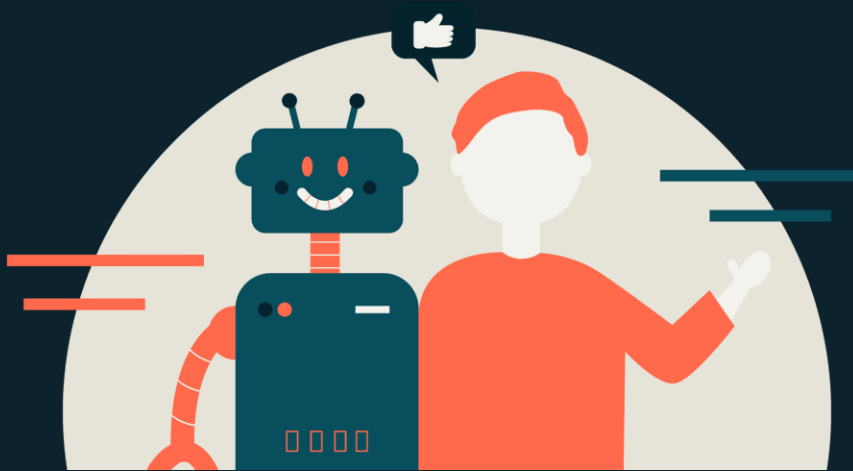

Select from Microsoft's Sensitive Information templates

Drill down into known or potential issues
