

## Internal Penetration Testing

Internal Penetration Tests are designed to provide insight into the potential risks posed by a compromised internal host or malicious employee. *Are you secure?*

### Internal Pen Test

- Purpose - Simulates a compromised internal host or malicious internal user
- Goal - Obtain credentials, escalate privileges, gain administrative access or access to sensitive data
- A pen test box will be shipped on-site to facilitate the ability to perform an on-premise pen test
- Pricing is based on a percentage of total internal IP addresses
- Pricing is based on a percentage of total internal IP addresses
- Wireless Pen Test (optional) - Assesses strength of WPA2-PSKpre-shared keys

### All Pen Tests Include

- Dedicated Project Manager
- Fully detailed deliverable report with remediation recommendations at the conclusion of the project
- Detailed WebEx presentation of the full report by the penetration tester at the conclusion of the project
- All tests are done 100% remotely with no on-premise visits required

*“We get Pen Tests every year and Sentinel’s test results and report was more impressive and thorough than any we’ve ever seen.”*
