Contracts 365®
For Microsoft 365

Contracts 365 is a purpose-built contract management SaaS application for Microsoft 365.

It leverages your existing Microsoft 365 tenant as a contract repository and your Microsoft cloud architecture as a cloud platform. Not only do you get more out of your existing IT investment – you'll enjoy an unprecedented level of security while retaining complete control of your documents and data.

A seamless, secure contracting experience.

People are surprised to learn that most contract management solutions keep your contract data in their cloud repository, a storage location over which the customer has very little control. Contracts 365 leverages your existing Microsoft 365 tenant as a contract repository and Microsoft Azure as a platform. So you keep all of your organization's security preferences, policies, and access definitions—and IT can easily control who sees what, and what permissions are granted, across your organization.

Make the most of Microsoft's world-class infrastructure.

With Contracts 365, your contract management software readily integrates with the Microsoft security infrastructure. From Microsoft Endpoint Manager to Microsoft Defender and Microsoft Sentinel, you organization benefits from Microsoft's unparalleled investment in cyber security.

> "Contracts 365 allows us to store our contracts and related documents in our own Microsoft 365 tenant. This solution provides us increased security and control over our contracts and builds on the strategic investment we have made in Microsoft 365."

Azeez Hayne
General Counsel, Urban Outfitters

Easier to manage

- ✓ No need to learn how to administer yet another application
- ✓ Users are created and managed in your Azure Active Directory
- ✓ Existing corporate security settings apply to your instance of Microsoft 365
- ✓ Retain ownership of all metadata and documents

Easier to use

- ✓ Users know Microsoft 365, so there's less training and easier adoption
- ✓ Compliance and security approvals are easier to attain
- ✓ Day-to-day access is easy; just use your existing Microsoft credentials
- ✓ Tightly integrates with Dynamics, Salesforce, Outlook, Teams, and Planner
