- Enterprise-wide oversight with productivity and workforce control.
- Easily delegate tasks and define priorities.
- Team Collaboration and catch-up with your employees on their tasks.
- Integrate employee productivity monitoring into your business process seamlessly.

Industry specific uses - A Single Solution for All

IT Companies

With work from home culture being the new normal, IT Companies have tried to keep up their pace to offer clients, on-time delivery. With STARC, get accurate time-tracking and reports for increased visibility.

Healthcare companies

Hospitals have sensitive data about patients which needs to be secure in order to avoid misuse. With STARC, manage multi-tenant locations, teams, provide permissions to the suitable people and maintain compliance. You can also provide special access with the private mode for secure data management.

Government offices

Government offices are often misunderstood as the place where the pace of work is slow. Transform this belief into a positive one by adopting STARC. With analytical dashboards, data filled reports and management of non-productive apps/URLs, remote work becomes efficient.

Public Sector Units

Timely reports segregated into projects as per the employee prove to be a great boon for PSUs to maintain work efficiency, whilst avoiding unnecessary distractions by controlling non-productive apps/URLs. The saved time will amount to faster public service disbursals.

General

Do you worry about the time-taken for projects which may negatively affect your brand or hamper relations with the client, if your employees work remotely? Don't you worry!! With STARC, you can easily get reports on Productivity, Utilization, Break time, Idle Time, Login & Logout time on system and have a control over non-productive apps/URLs.
