

Azure Cloud Transformation

4 Weeks Assessment

“Elevate your enterprise with our brief, expert-led Cloud Evaluation, emphasizing Governance for peak performance.”

Process:

- **Discovery and Analysis:** Inventory on-premises assets and assess scalability and performance metrics.
- **Business Alignment:** Collaborative discussions to define business requirements and set expectations.
- **Cloud Service Selection:** Expert evaluation to identify the optimal cloud fit for your needs.
- **Cost Analysis and ROI:** Transparent TCO comparison for potential savings and ROI visualization

Deliverables:

- Current State Assessment of infrastructure.
- Cloud compliance strategies.
- Performance analysis and resource utilization.
- Business requirements and objectives.
- Cloud service selection and cost analysis.
- Migration strategy and risk assessment.
- Observability & Monitoring Strategy.

Goals

- Guided by the Azure Cloud Adoption Framework, our experienced consultants establish governance with documented policies and schedules.
- Our approach aligns with five key disciplines: Operational Excellence, Performance Efficiency, Cost Optimization, Reliability, and Security.
- Company policies are seamlessly applied to Azure cloud, ensuring adherence to best practices.

- **Migration Strategy:** Tailored plans for data migration, minimizing downtime and ensuring integrity.
- **Performance and Security Optimization:** Design robust, secure, and compliant cloud architectures.
- **Continuous Monitoring:** Implement real-time monitoring and automated scaling for seamless operations.
