

Azure Arc benefits.

Azure Arc-enabled infrastructure

Connect and operate hybrid resources as native Azure resources

Visibility - Windows, Linux, SQL and Kubernetes together in a single pane of glass

Compliance - Reduce risk and cost by establishing a single governance frame for all your workloads

Consistency - Simplify by using cloud-native technology and practices everywhere

Azure Arc-enabled services

Deploy and run Azure services outside Azure

Flexibility - Reduce risk and adhere to regulatory requirements by deploying cloud services on-premises

Latency - Deploy data services on-premises, close to your data sources

Always current - Get evergreen SQL and PostgreSQL Hyperscale on-premises
