Today's identity and access challenges

Accelerated growth of identities and apps, on and off the corporate network, requiring secure, user-friendly access.

Massive rise in identity attacks which requires advanced tools to discover and mitigate them as quickly as possible.

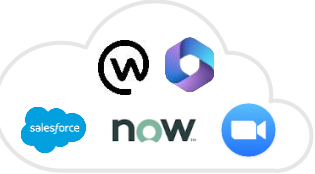

Evolving regulations and compliance requirements for protecting identities and auditing access rights.

Secure access for a connected world

-  Human identities
-  Workload identities
-  Customers
-  Partners
-  Devices

-  Data
- 

SaaS apps
- 

Cloud-hosted apps and resources
-  On-premises applications
-  Websites

Powered by trillions of security signals
