

INTRODUCTION TO **SHARE DO.**

AGENDA

- 1 Introductions
- 2 What is ShareDo?
- 3 Who do we work with?
- 4 Demo
- 5 Next Steps

WHAT IS *SHARE DO?*

ShareDo is the best-in-class adaptive case and matter management platform for enterprise legal firms

A 'low-code' platform that combines case & matter management, business insights and artificial intelligence

What is ShareDo?

HOW DO WE HELP *YOUR* *BUSINESS?*

Standardise work;
“Do more with
less” and increase
Performance

Reduce Unit Cost
of Matters to
become more
Profitability

Harness data to
Predict and
respond to change

=

Gain
competitive
advantage

Many *+1s* = Large Gains

What is ShareDo?

HOW DO WE HELP *YOUR* *LAWYERS?*

We make light work of your daily tasks, so you can focus on **maximising your "lawyering"**.

Sharedo adapts and caters for your individual work styles so you remain **highly focused and productive**.

Sharedo helps **Inform better judgement** and reduces "context switching" through actionable insights

=

Do more,
worry less

We provide a digital **assistant** for your lawyers.

What is ShareDo?

BE MORE **PRODUCTIVE,** WHATEVER YOUR STYLE

Matter Management or
Case Management

Light touch -> no touch

Shared service centres &
support teams

Paperless and digital
postrooms

- Litigation & Disputes
- Real Estate
- Commercial
- Employment
- Private Client

We **personalize** the experience for different practice group and clients work style.

What is ShareDo?

SUPPORTING CONTINUOUS PROCESS IMPROVEMENT

HIGH TOUCH -> LOW
TOUCH -> NO TOUCH

EVOLVE AND
AUTOMATED THROUGH
WORKFLOWS

Extend the platform to meet
your unique needs

OUR PLATFORM *KEY CONCEPTS*

WORK TYPES

- **Define key work types** and their specialisms
- **Build a Data Dictionary** through the work lifecycle
- **Inherit and compose your work types** from base types and features

CASE PLANS

- **Optimize Workflow** through process management and resource optimization
- **Automated** process steps through intelligent automation and allocation

PERSONAS

- **Define Participants** that are involved throughout the work processing and their involvement
- **Configure** secure portal access
- **Reduce data entry** through self service forms

MANAGEMENT INFORMATION

- **Pro-actively monitor** your work pipeline
- **Understand** resource bottlenecks
- **Define reporting models** for self service ad-hoc reporting

DATA MIGRATION

- **Data and document** loading framework

DOCUMENT TEMPLATES

- **Manage 1000's of precedents**

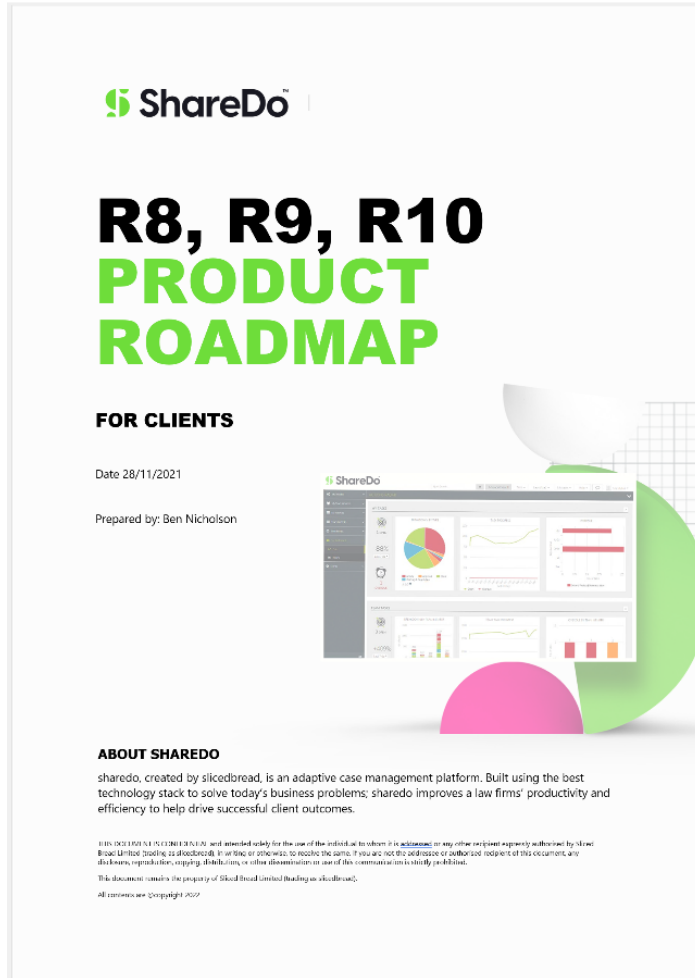

INTEGRATIONS

- **Out of the box** and extendable event model

CHANGE MGMT

- **Build tacit and implicit knowledge**

OUR TECHNOLOGY

A brief overview of the technical stack of sharedo

OUR TECHNOLOGY APPLICATION ARCHITECTURE HIGHLIGHTS

Sharedo public app tier

Sharedo UI

The main application UI

Sharedo API(s)

The HTTP APIs for the application

Sharedo identity

OAuth/OIDC Identity and authentication services

Sharedo client "apps"

Word Plugin

Document template authoring

Mobile

Apps (and open source framework)

Sharedo orchestration tier

Sharedo EE/CFG

The event engine configuration services

Sharedo EE

The event engine – asynchronous orchestration

Sharedo private app tier

Sharedo indexer

Read store sync / orchestrator

Sharedo microservices

Other microservice decompositions...

Application dependencies

Event store

HA, persistent, append only event store

SQL Server

Plus SSIS and SSRS

Exchange/O365

On-premise or office 365

Elastic search

Dedicated search/lists – also used for logs

DMS

SharePoint, O365, iManage, CE, etc...

Accusoft

Document Preview, Conversion, Redaction

Optional dependencies

Doc assembly

Hotdocs, contract express

SEQ

Structured logging and alerting

Power BI

Preferred reporting and discovery

Key Services

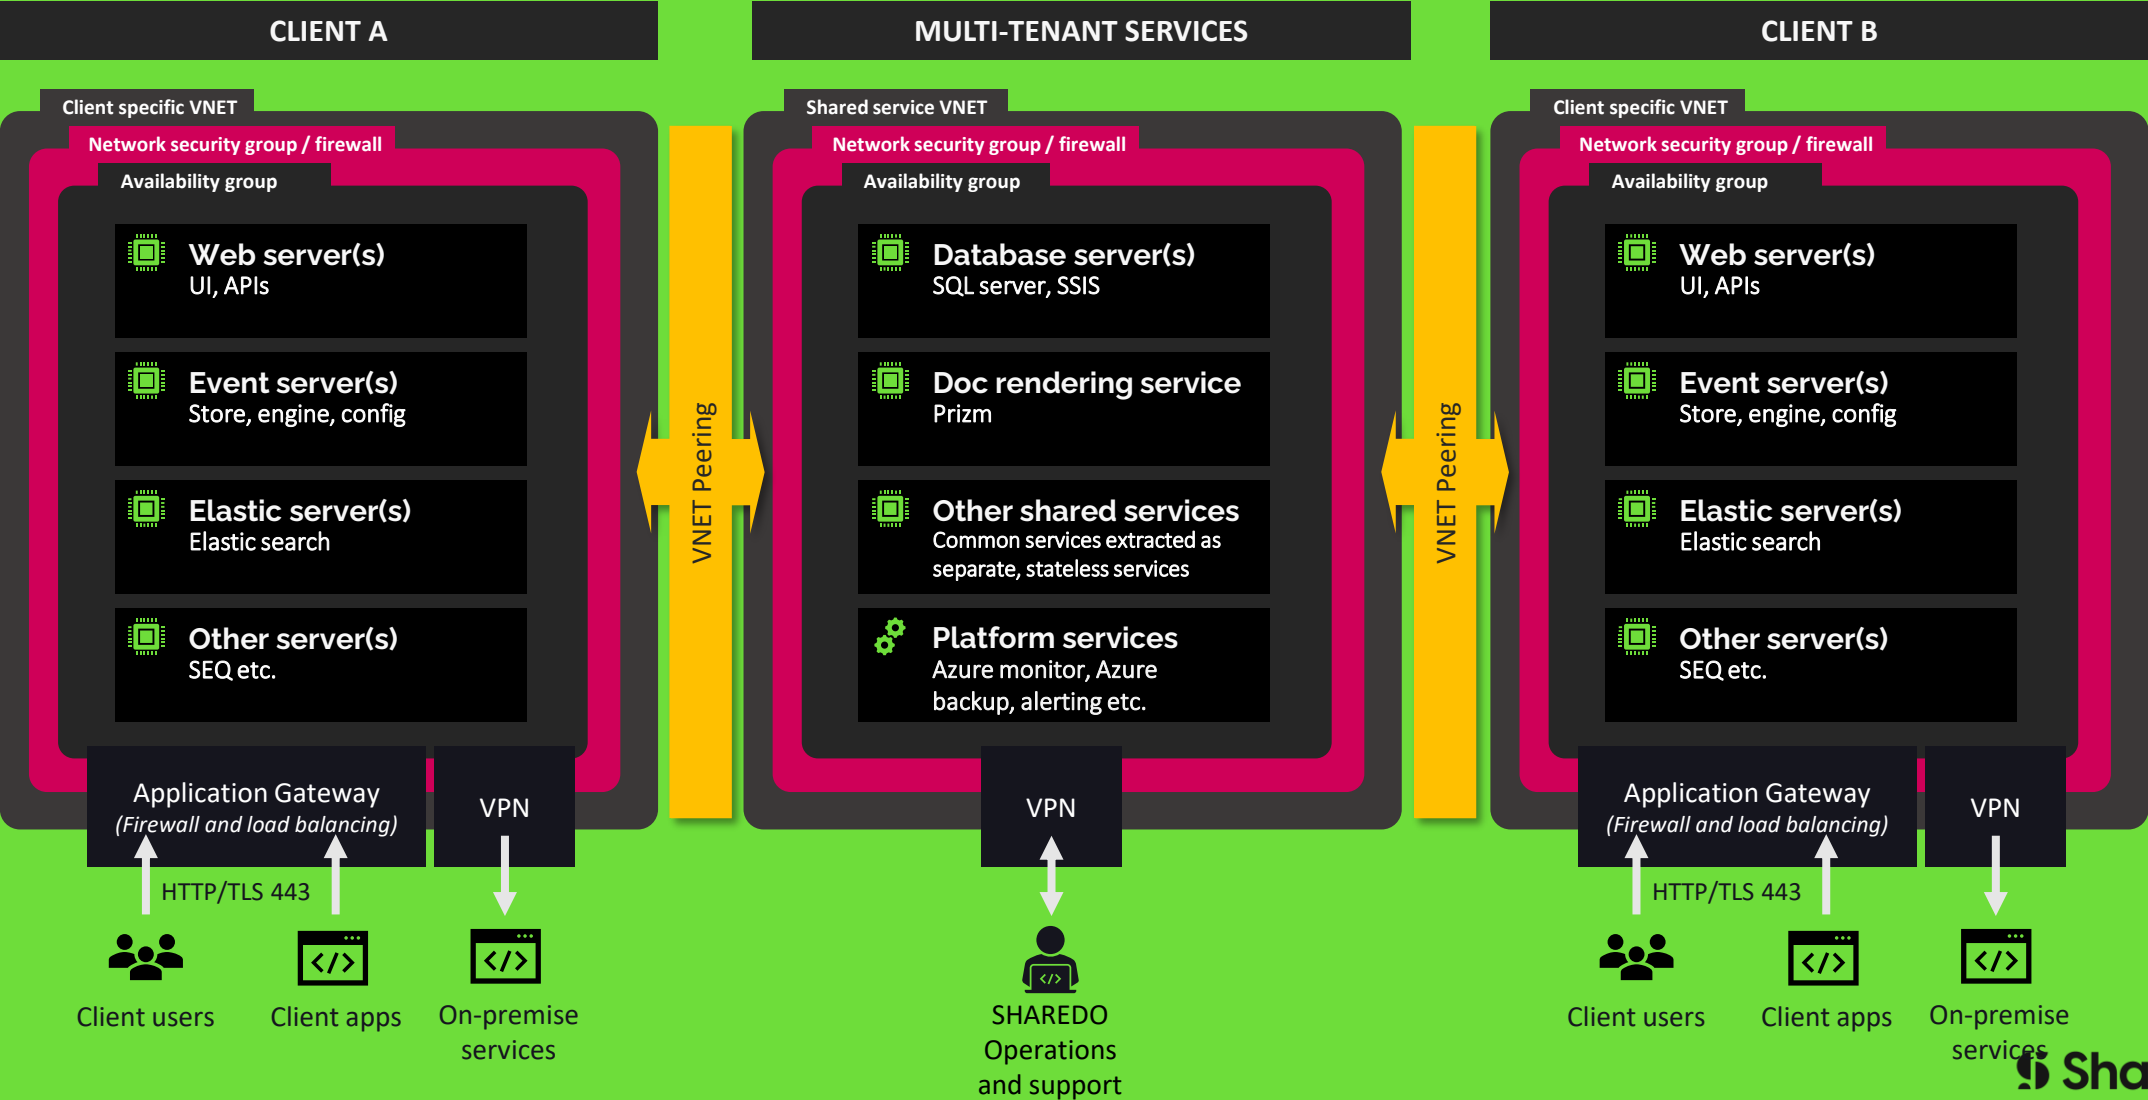

Address lookup, sms, companies house

Integrations

Integrate to/from anything

OUR TECHNOLOGY *TECHNICAL ARCHITECTURE HIGHLIGHTS*

SECURITY PLATFORM LEVEL SECURITY

Platform Security

Continually Monitored

Microsoft Defender for Cloud continually monitors the entire platform and advises on vulnerabilities and threats

Secure Application Gateway

Secure SSL access through Azure Application Gateway and Web Application Firewall.

Integrated with your Security

Fully integrated with your organisations login and MFA policies .

Integrated with your Systems

Use your own applications and security policies for Document Management, Finance and Compliance

Microsoft Defender for Cloud

Data Security

Data Encryption

Platform managed or BYOK

Data Anonymisation

Assess performance at production volume

Data Segregation

Full customer data segregation

Data Sovereignty

Choice of global locations for data storage

Security Walls

Restrict visibility of data within your teams

People and Process

Independently Tested

Annual penetration testing via a dedicated independent supplier

Continually Improved Security

Build and Release managed utilises OWASP recommended code vulnerability scanning software.

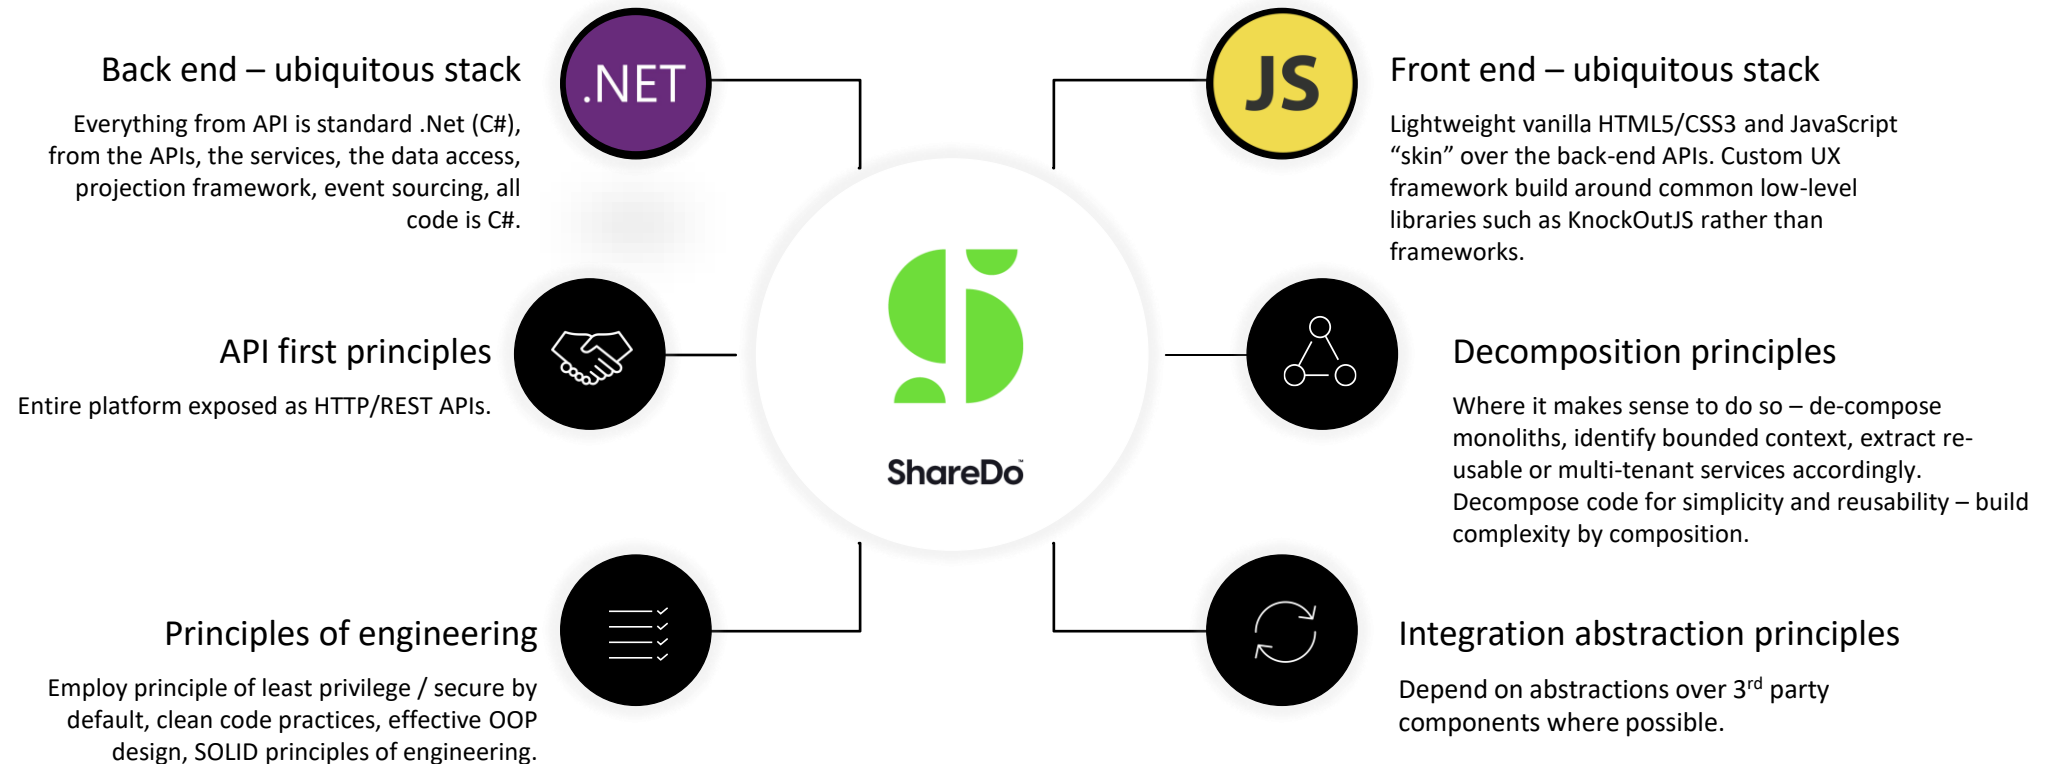

Audited Support

Support access through audited CAB process providing JIT access using SSO and MFA

Direct Management

Platform management fully in-house using permanent UK staff

OUR TECHNOLOGY SOFTWARE ARCHITECTURE HIGHLIGHTS

ShareDo leverages **ubiquitous** technology and **standard** software engineering practices

SECURITY APPLICATION LEVEL SECURITY – KEY CONCEPTS

Global Security

Authentication Provider

- Support for multiple providers with the same instance
- Oauth / AD / Forms

User Type

Personas

- Define the theme/ branding a user sees
- And layout and content of their portals

Permission Sets

- Define the set of global permissions that a user has.
- There are ~ 300 global permissions

Work Item Security

Work Item Permissions

- Access to every work item is controlled
- Lock down both access to the work item but also specific functionality
- Can vary permission by Phase

Participant Role

Security Barriers

- Create Rules to prevent accidental assignment of permissions to work items

Permission Hierarchical

- Define Permission Hierarchies and have them inherit through your matters and tasks

Subject Security

ODS Walls

- Create Ethical Barriers to prevent access to PID
- Assign walls automatically based on rules

People, Organisations

Subject Access Requests

- Use 360 degree views to export related information

Right to be forgotten

- Anonymise PID

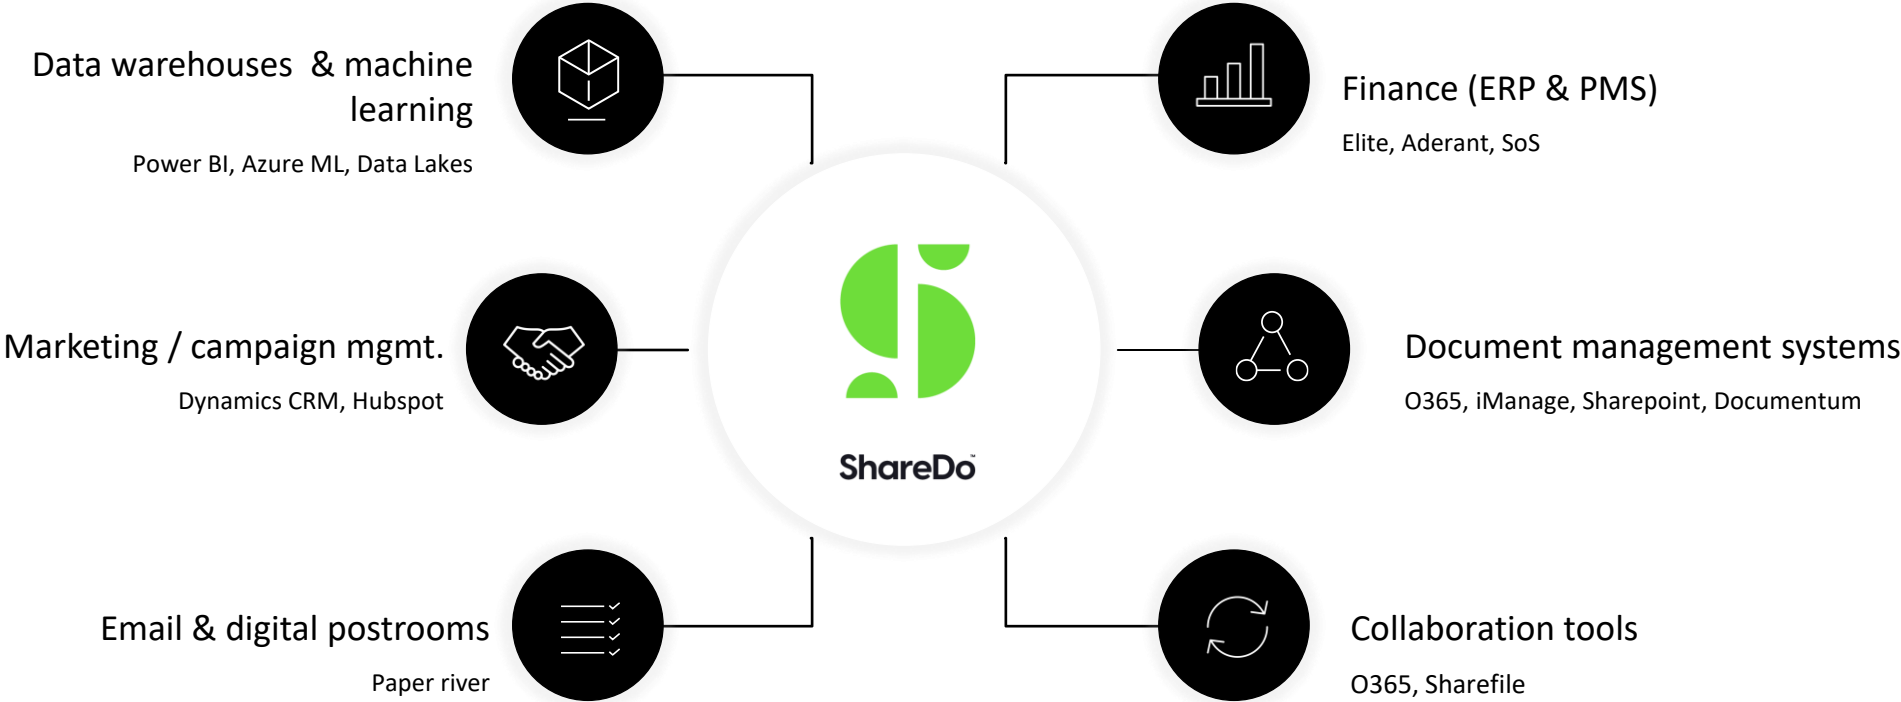

INTEGRATION

- *LANDSCAPE*
- *TOOLSET*

A brief overview of how ShareDo Integrates with external applications

OUR PLATFORM INTEGRATION LANDSCAPE

ShareDo **plugs** seamlessly into your existing

Microsoft Office Suite
Document Management
Legal Applications

*its designed API First as well!

INTEGRATION *DIGITAL MARKETING*

DIGITAL MARKETING

Hub Spot

- Manage your Digital Marketing spend with best in class tools such as Hub Spot
- Track the success conversion from Digital Channels to Landing Pages

LANDING PAGE

- Highly Optimised for conversion and easy data collection
- Typically custom build with “hooks” to ShareDo API
- Integrate Marketing tracking ids

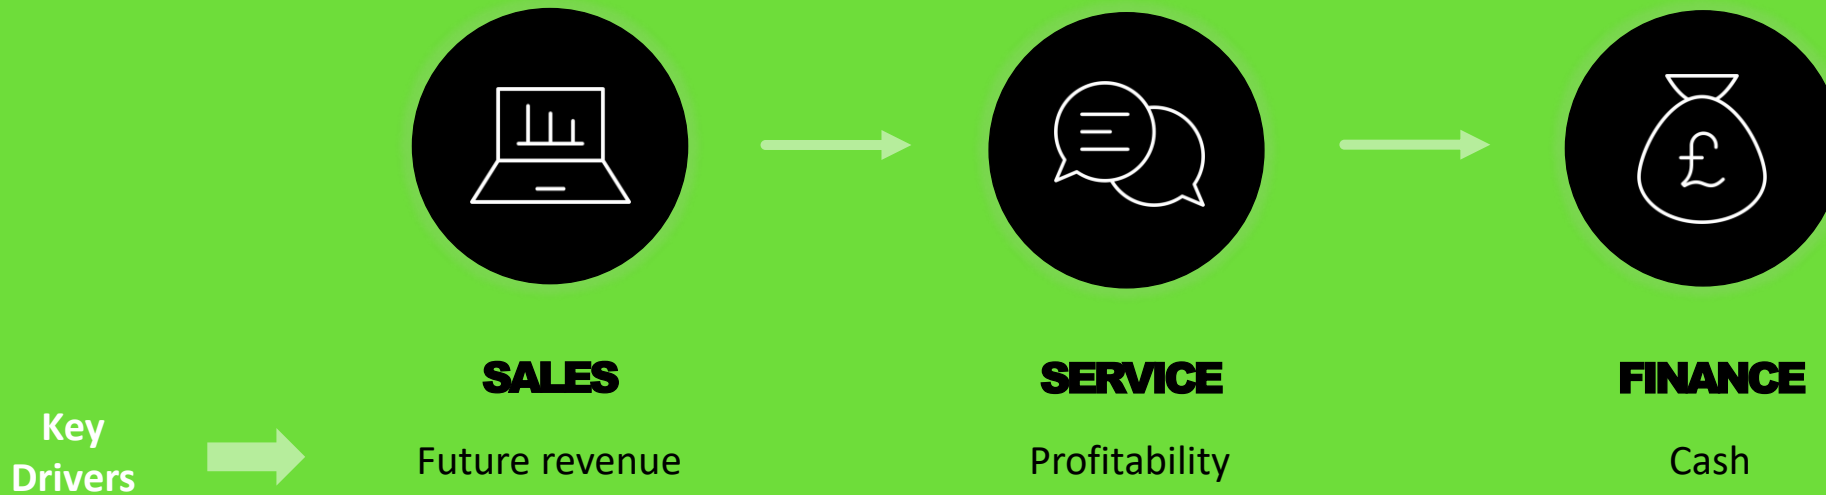

ENQUIRY PROCESS

- Optimised for case conversion
- Track Progress through Phases
- Manage nurture processes
- Add Marketing Tracking IDs
- Associate Lead Values

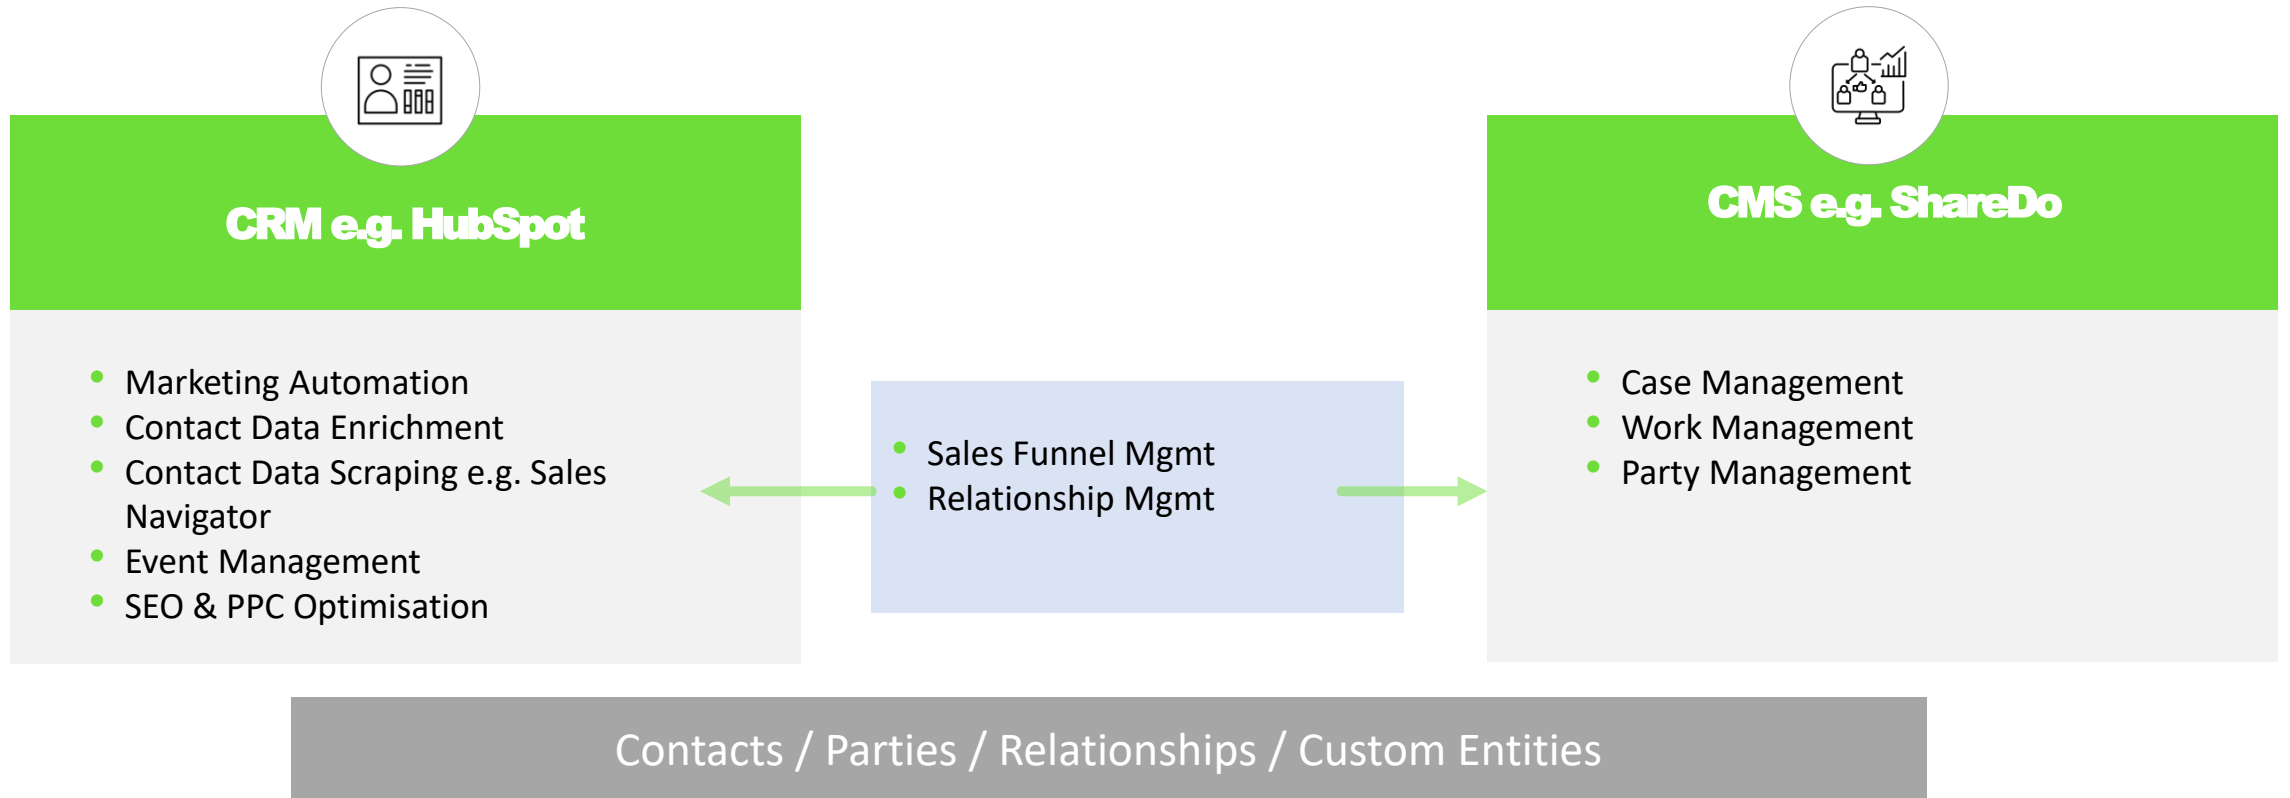

Single view of marketing effectiveness across the sales pipeline + optimisation of “drop offs”

A TYPICAL LEGAL *ENTERPRISE ARCHITECTURE*

The majority of Industries follow a standard pattern for Enterprise Architecture like the one above.

INTEGRATION CRM

WORK SMARTER *DEBT SOLUTION ACCELERATOR*

WORK TYPES

- B2C and B2B Debt Recovery + Defendant + Advice
- Litigation – England & Wales, Scotland
- Enforcements
- Debt Tranches
- Payment Plans
- Payments
- Purchase Orders

WORKFLOWS

- Investigation (STP)
 - Searches
- Pre-Action (STP)
 - Contact Slots
- Service
 - MCOL Integration
- Litigation
 - Enforcements

PERSONAS

- B2C Debtor Portal
 - View Matter Details
 - Exchange Documents
 - Make Payment
 - Complete Income & Expenditure
 - Complete PAP
- B2B Client Portal
 - View Progress
 - Manage Approvals / Authority

MANAGEMENT INFORMATION

- Pro-actively monitor your work pipeline
- Understand resource bottlenecks
- Understand Settlement Rates
- Monitor Contact Strategy Effectiveness

OUR PLATFORM *INTEGRATION TOOLSET*

INTEGRATION ARCHITECTURE - MODEL

«« Consume anything

»» Be consumed

All OAuth 2.0 grants and flows supported, including;

Implicit

- Sign on, identity only, no refresh token
- Execute APIs with user context
- e.g. Web based SPA

Hybrid and Auth code flow

- Sign on, identity and refresh tokens
- Execute APIs with user context
- e.g. Native app

Client credentials

- Sign on with client identity and secret
- Execute APIs without user context
- e.g. App to app integrations, background jobs etc
- Grant extensions:
 - Impersonate fixed
 - Impersonate any

THE PLATFORM

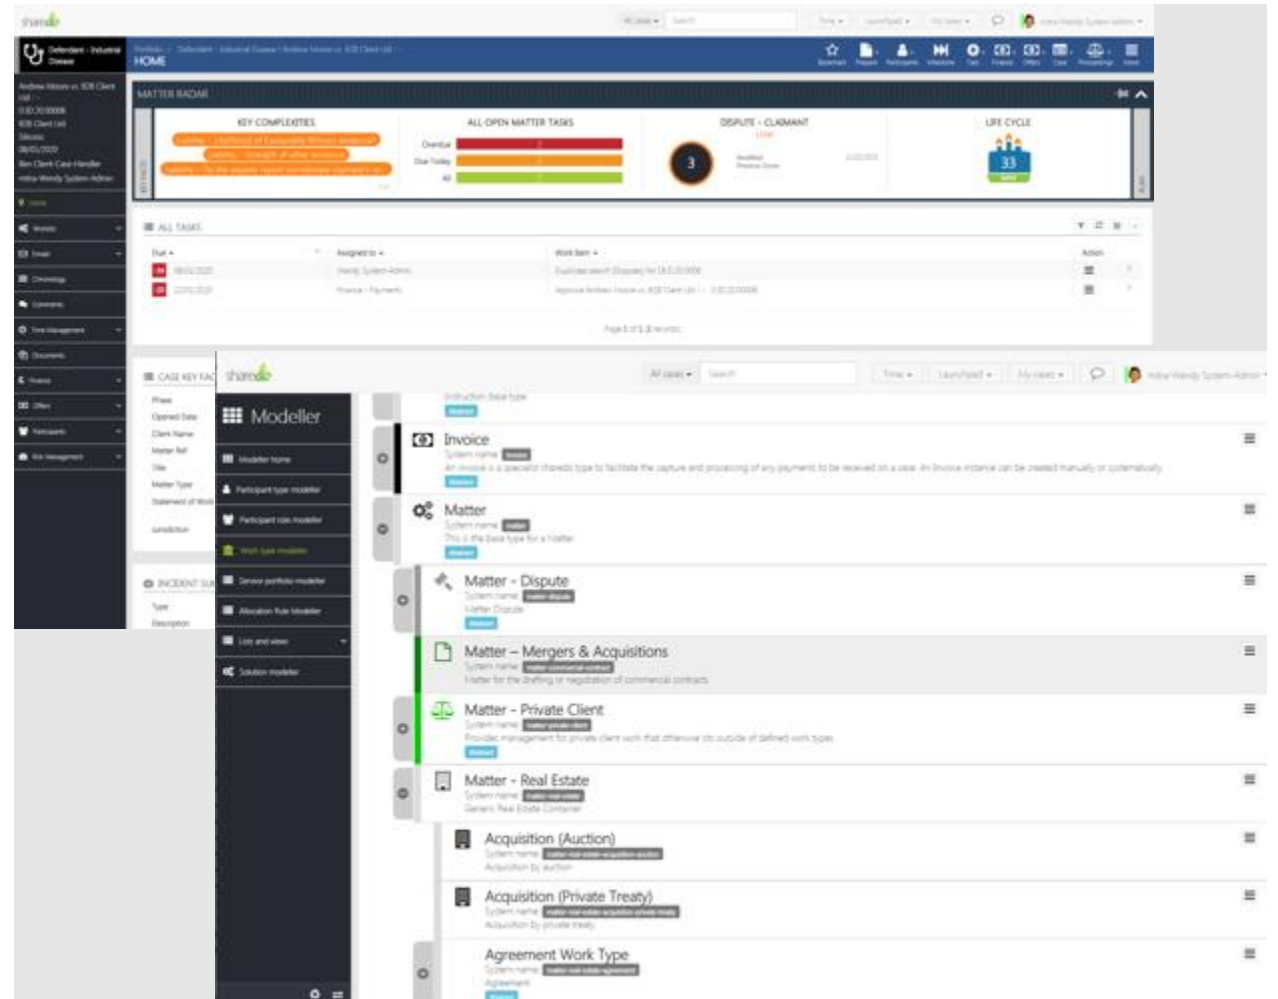

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

KEY FEATURES *MODEL UNLIMITED MATTER TYPES*

Within ShareDo you model unlimited work and matter types. These are defined as a “tree” enabling you to quickly specialise your configuration for different matter types or client specific needs.

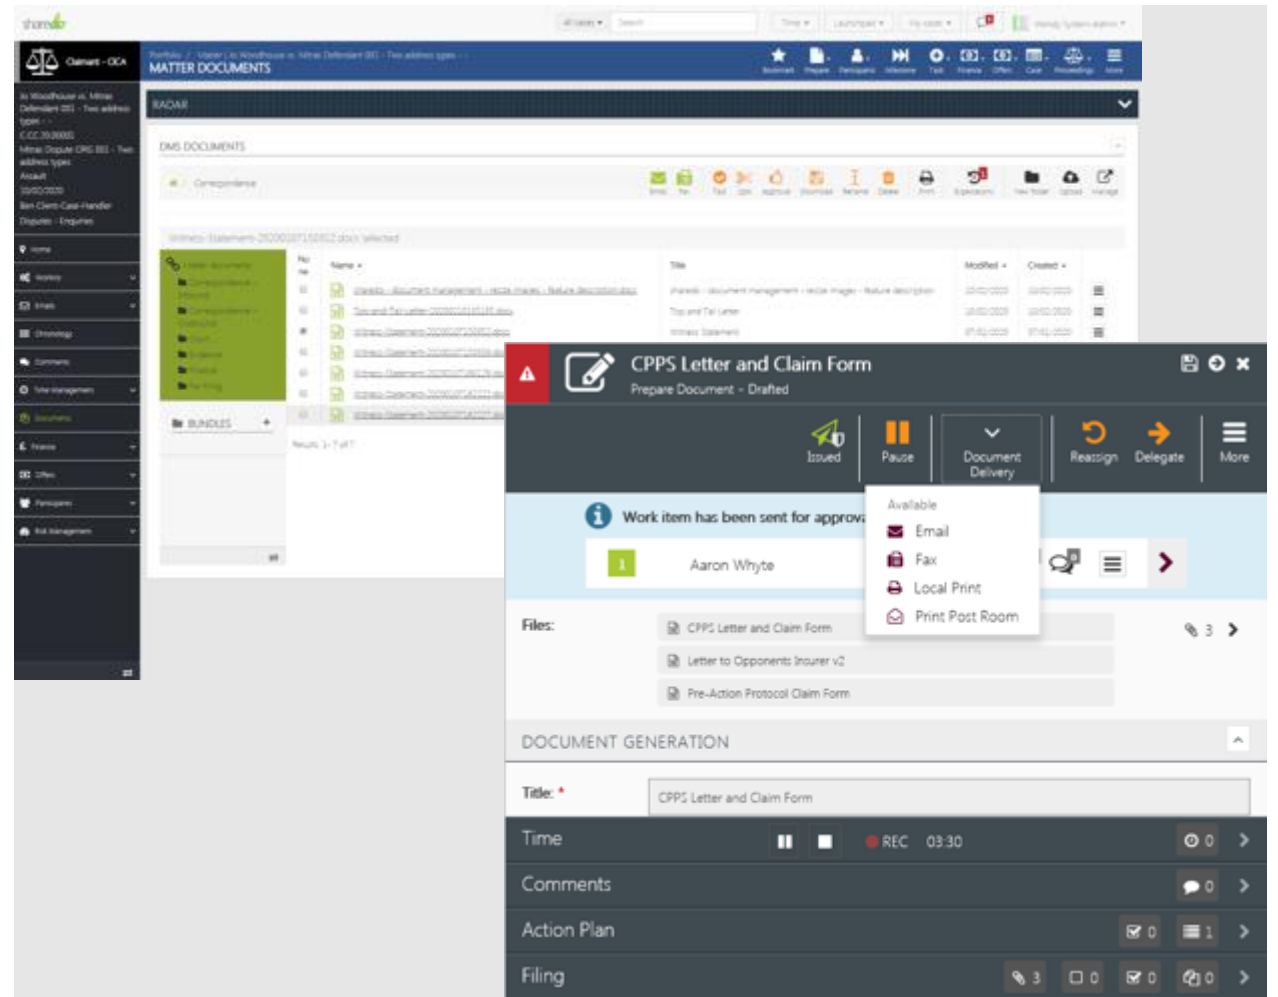

- Define unlimited work types
- Quickly specialise existing work types for bespoke processing requirements
- Assemble Matter types from component parts including
 - Finance
 - Scorecards
 - Parties
 - Case Plans
 - Documents & Precedents
- Define case and client specific data capture.

KEY FEATURES DOCUMENT MANAGEMENT & DELIVERY

Sharedo integrates seamlessly with your existing document management solutions such as iManage; providing a rich set of tools to manage, assemble, bundle and deliver documents to parties via numerous channels.

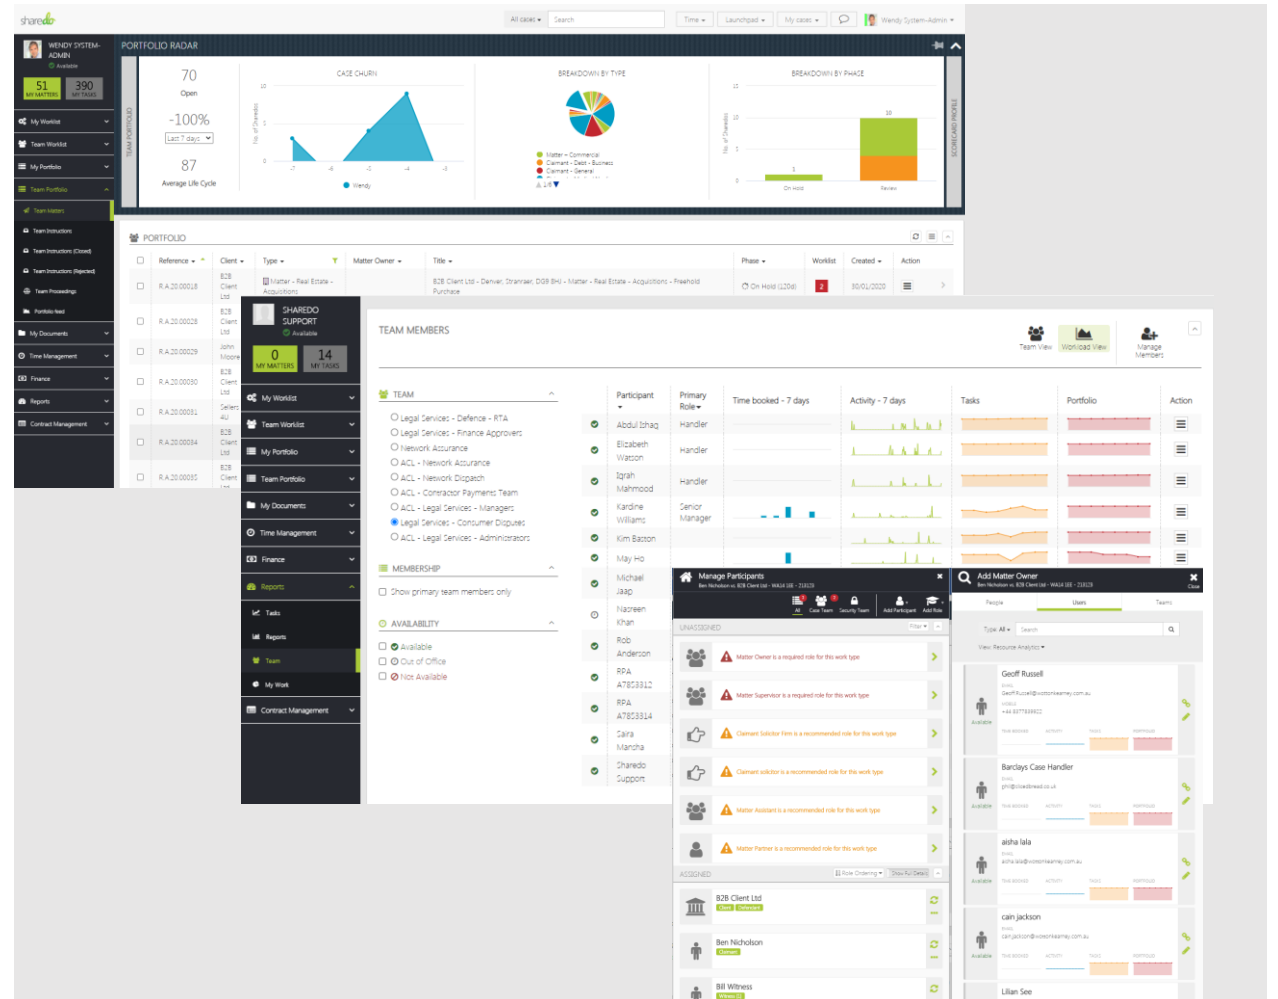

- Sharedo provides a live view of your iManage repositories. Your existing iManage plug-ins work seamlessly
- Assemble documents and emails automatically from templates using case data
- Produce and generate indexed court and disclosure bundles.
- Share documents via channels including;
 - Emails via Sharedo or outlook
 - VDR
 - Print (local or outsourced)
 - Portals
 - DocuSign

KEY FEATURES *LEGAL PROJECT MANAGEMENT*

Manage your matters as projects. Plan and manage tasks and SLAs against plans. View resource utilisation and select the right person for the job.

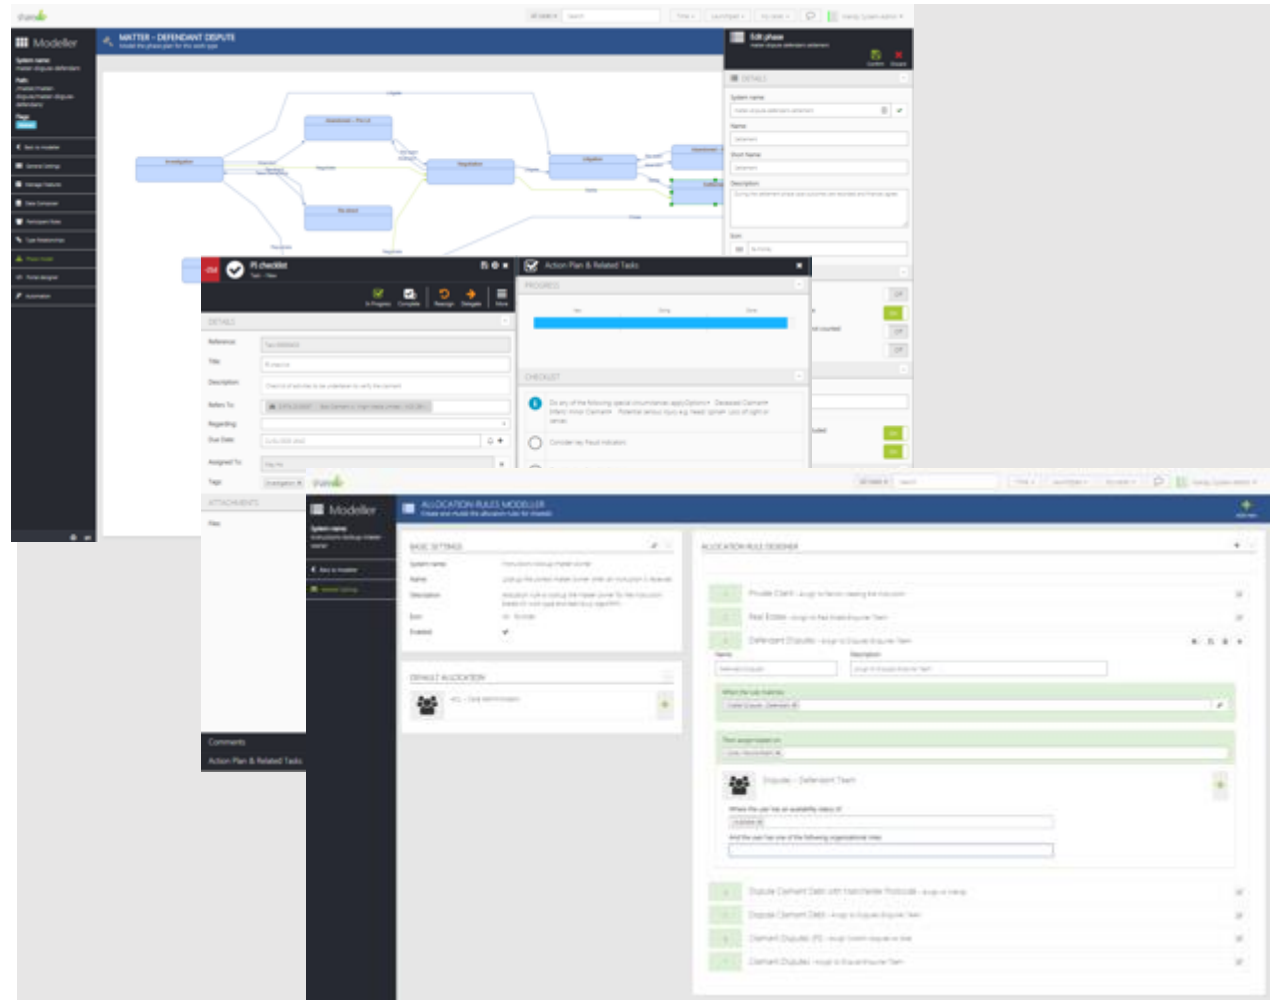

- Monitor & Automatically record time against activities to under cost to serve (you can use this for billing purposes also!)
- Plan your project activities against defined plans
- Define SLAs at case, activity and matter client levels. Receive notifications of any breach events
- Model your resource competencies and ensure that the right person is assigned to the right job
- Ensure that the right person is assigned to the right job through resource analytics and competencies

KEY FEATURES CASE PLANS & WORKFLOW

Adopt a continuous process improvement methodology by automating some of your key journeys.

- Define your top level matter plan for overall tracking purposes
- Model allocation rules to enable shared service centres and different disaggregation strategies
- Define automated workflows to streamline processes including
 - Automate Document Production and Delivery
 - Checklists & tasks
 - Calculate Fees
 - Schedule Appointments
 - And many more

KEY FEATURES AUDITABLE & INTERACTIVE CASE HISTORY

Whenever any party interacts with ShareDo audit events are generated enabling you to see a historic view of all of the activities that have happened on your matter.

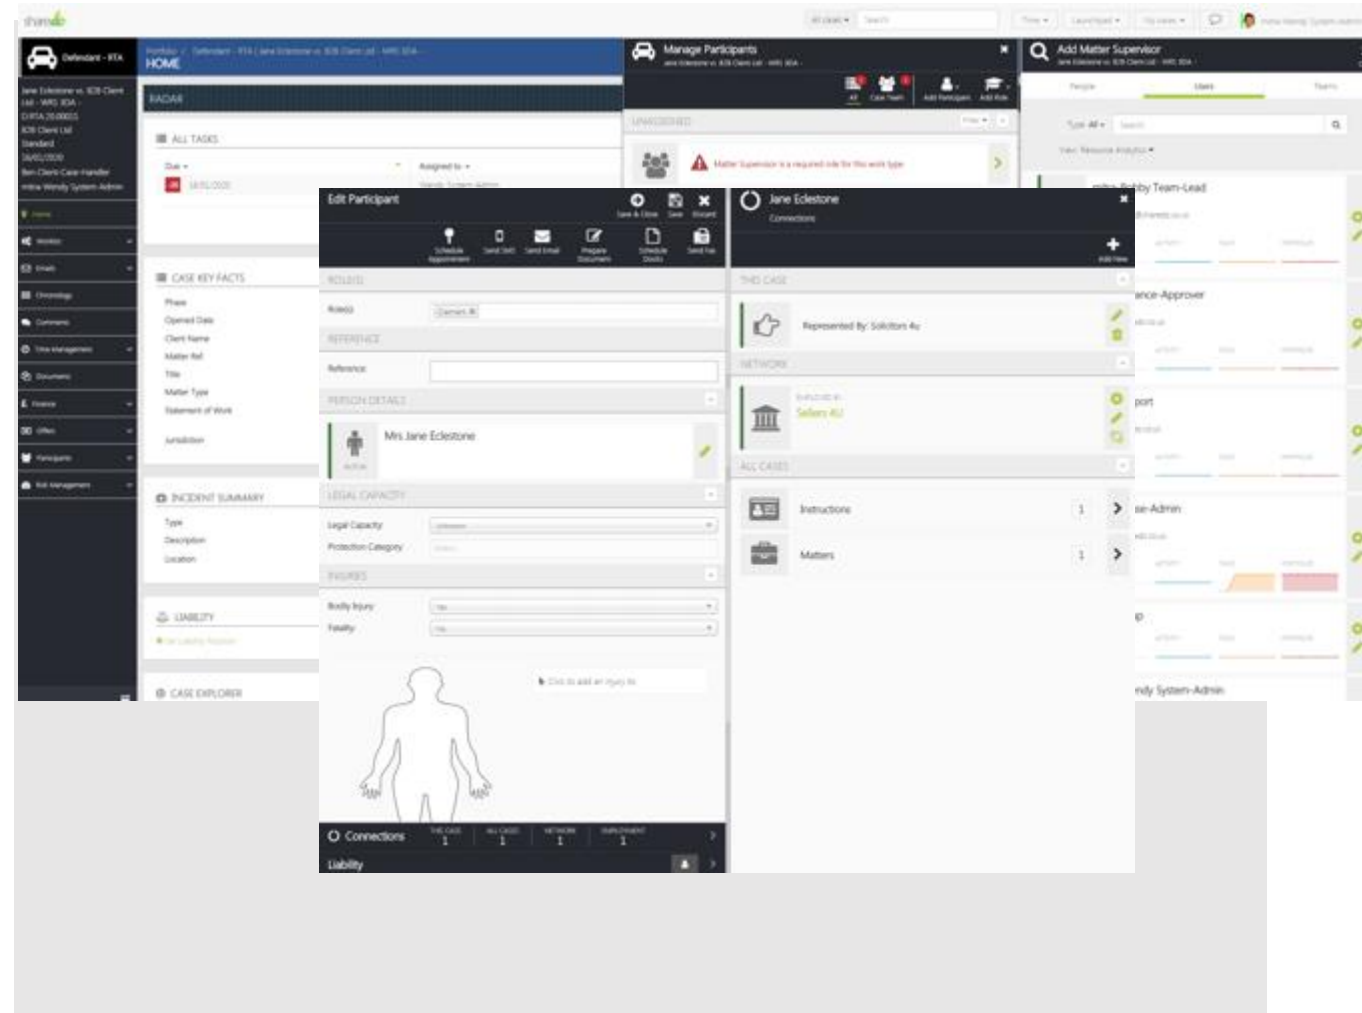

- View fine grained audit or an interactive case chronology
- Quickly slice data by
 - Date
 - Party
 - Point of Interest
 - Tag
- Click through chronology cards to
 - View Documents or Emails
 - Interact with the activity.

The screenshot displays the ShareDo application interface. On the left is a dark sidebar with navigation options like Home, Worklist, Email, Chronology, Comments, Time Management, Documents, Forms, Office, Principals, and Risk Management. The main area is titled 'CHRONOLOGY' and shows a 'MATTER CHRONOLOGY' timeline for the case 'Jo Woodhouse vs. Mirwa Defendant 001 - Two address types'. The timeline includes a 'Document Expectation' card dated 16/02/2020. Below the timeline are sections for 'PARTICIPANTS' (listing Jo Woodhouse and Intra-kenedy System-Admin), 'TAGS', and 'POINTS OF INTEREST'. On the right, a 'Preview document' window shows the document 'Top and Tail Letter' with details like subject, case reference, and document title.

KEY FEATURES PARTIES & CRM

ShareDo acts as a pseudo customer relationship management system for your matters and other work items.

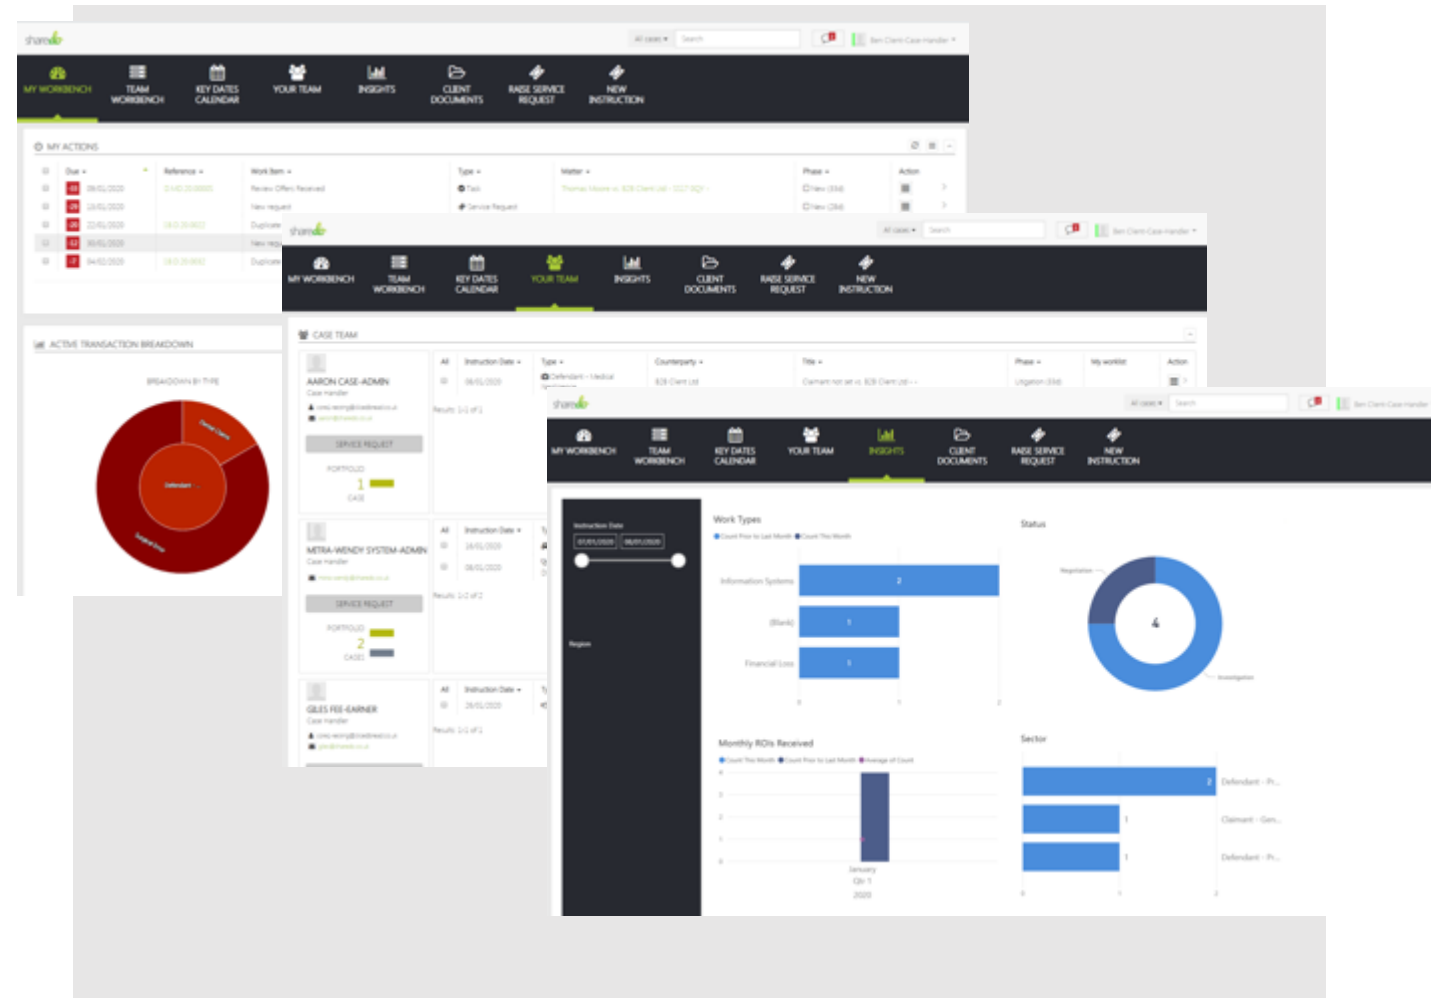

- Manage a master database of all contacts across the solution
- Segment these by Party type to enable specific analysis of types of parties
- Define custom data capture for your parties
- Provide a 360 degree view of a parties interactions across matters
- View a chronology of all of your interactions with a party across the system
- Quickly contact your parties via SMS, Email, Fax, Post or Portal

KEY FEATURES COLLABORATION & CLIENT PORTALS

ShareDo makes no material distinction between internal and external participants. You define the “personas” that specific people use to access the system and how they view key information.

- Define different “persona” views of the system such as
 - Fee Earners
 - B2B Clients
 - B2C Clients
- All persona views enable a “live” view of Matter information subject to the visibility and access controls that you define
- Model case plans to maximise your interactions with clients via portals to minimise re-keying and streamline processes.
- Enable access to key reports via portals
- Send automated notification to portal users to direct them towards key information

KEY FEATURES MATTER FINANCIALS

Manage a case account to understand the different financial aspects of your matter including budgets, fees, invoices, payments and settlements

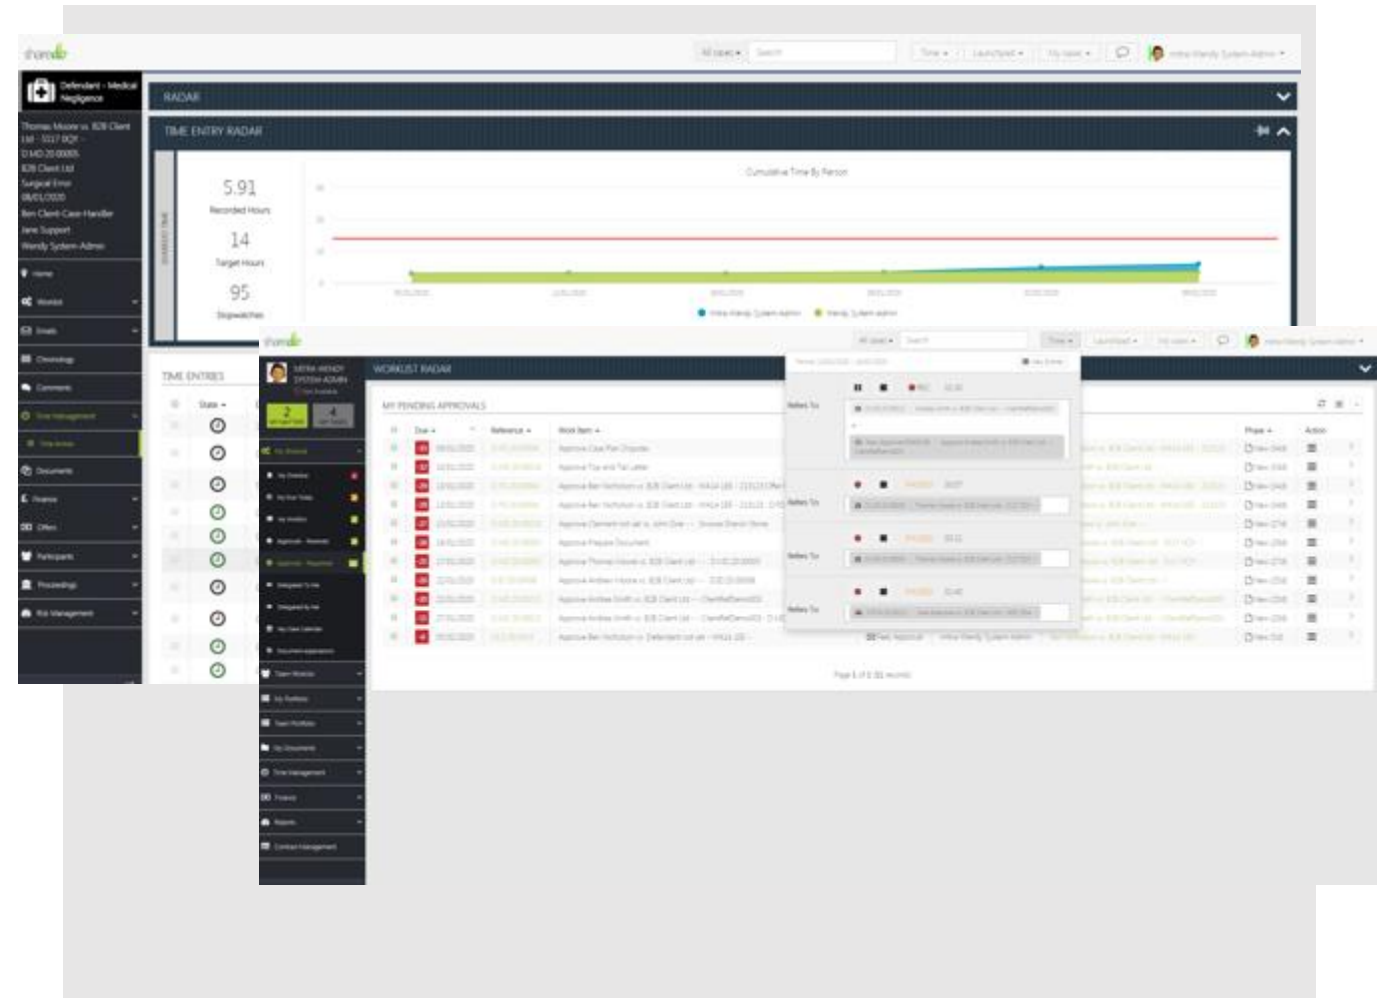

- Configure and visualise your case financials for different use cases
 - Disputes
 - Real Estate
 - Matter Management
- View and record payment requests and manage payment approval processes subject to authority limits
- View and record Payment Expectations and manage through approval processes
- Capture your matter budgets and see erosion of these through transactions.
- Record Fee Structures, version control and collaborate with clients on estimates and actuals to reach agreement

The screenshot displays the ShareDo financial management software interface. The main area is titled 'PAYMENTS' and contains a 'PAYMENT SUMMARY' section with a table showing 'Costs and Disbursements' (Incurred: £0.00, WIP: £1,090.00, TOTAL: £1,090.00) and a 'Payment Category Summary' bar chart. Below this is a 'SCHEDULE OF CASE' table. To the right, there are sections for 'CLIENT SUMMARY' (showing client name, matter ref, title, matter type, and arbitration), 'INCIDENT SUMMARY' (showing type, description, and location), 'LIABILITY' (showing 'Share Liability Position' as 'Pending'), and 'FINANCIAL SUMMARY' (showing 'Damage - Special' and 'Damage - General' amounts). A 'KEY DATES' sidebar on the far right lists various dates like 'Incident Date', 'Instruction Date', 'File Review Date', and 'Tribunal Date' with their respective counts and dates. The bottom of the screen shows a 'CASE EXPLORER' section with 'RELATED CASES'.

KEY FEATURES *TIME RECORDING & COST TO SERVE*

Configure ShareDo time recording either for the purposes of billing or to understand the cost to deliver a matter type.

- Configure ShareDo time recording to work in either a passive or active mode
- Passive time capture can be configured to work completely behind the scenes with no user interaction.
- Active time capture can be configured with a full range of time and billing codes for complex client billing requirements
- Define time targets at a matter, personal or team level.
- Track time against targets; trigger alerts and workflows when targets are missed or in danger of being missed.

KEY FEATURES OMNI CHANNEL

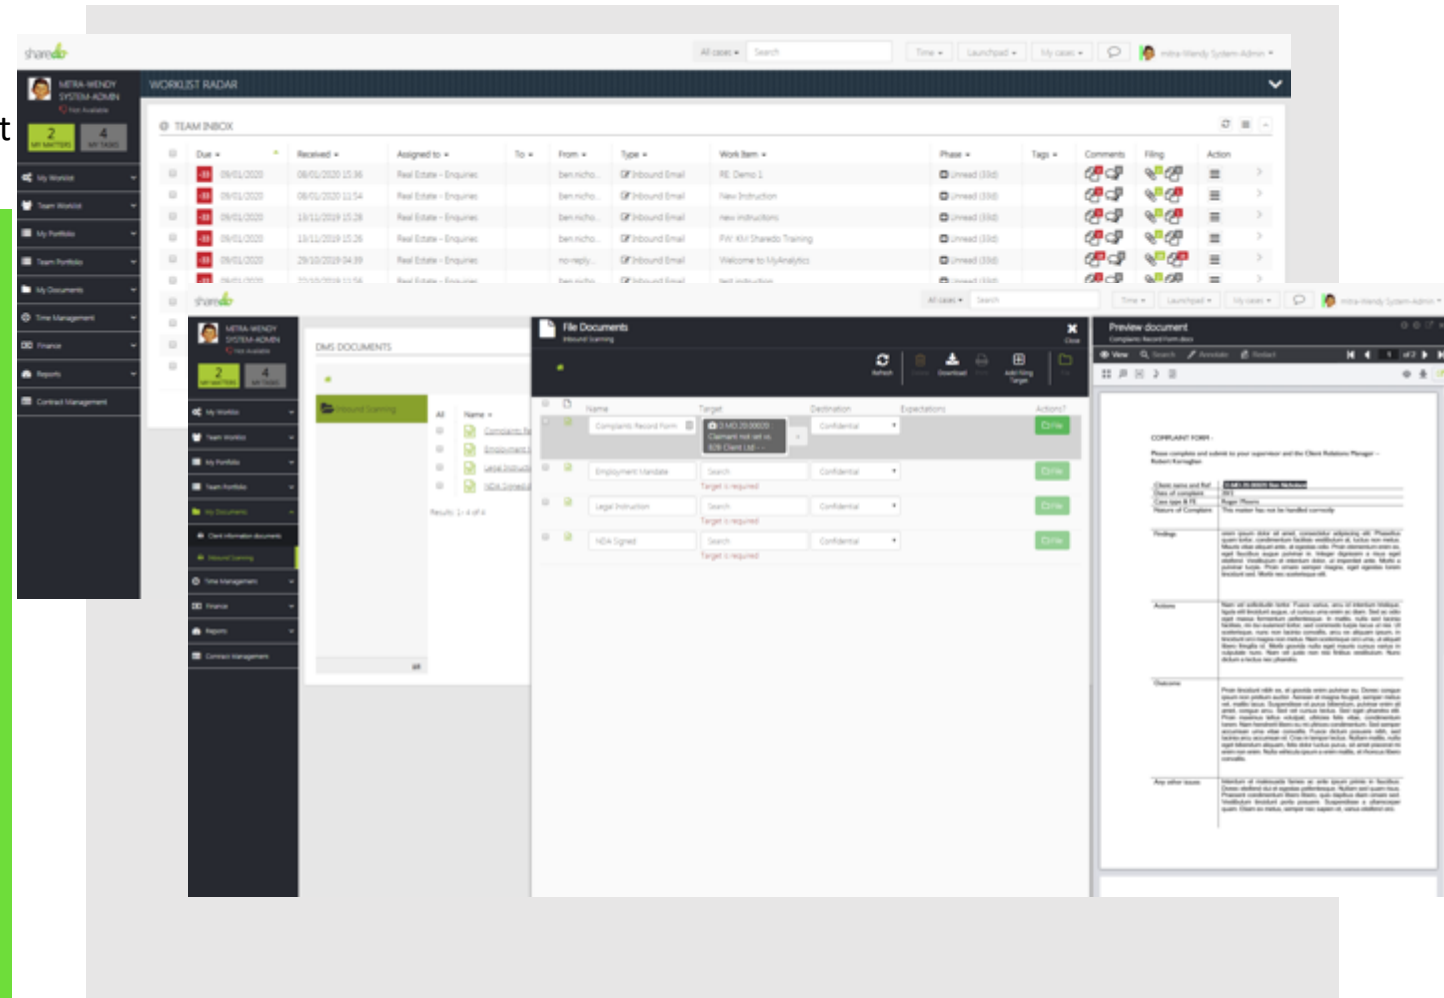

Sharedo enables you to manage all of your inbound and outbound channels through a single interface regardless of whether the communication is received via SMS, Email, Fax, Post or the like.

Inbound

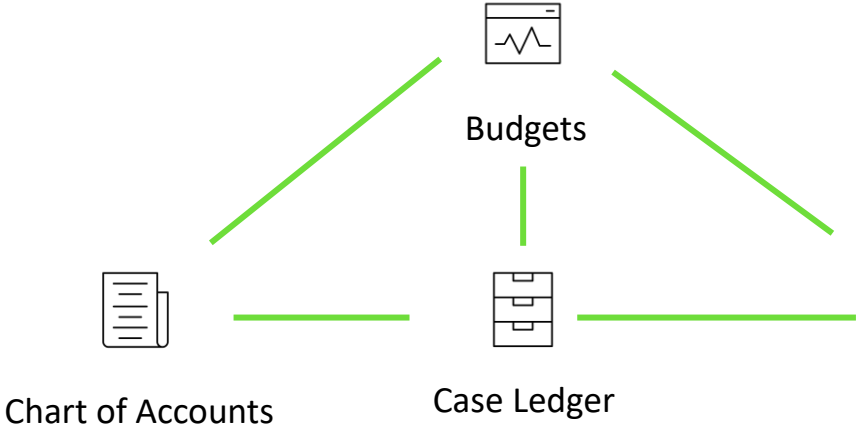

- View your inbound communications through a single inbox.
- Configure allocation rules to route inbound comms to the appropriate team or person
- Integrate your MFD scanners into Sharedo to enable rapid filing of post

Outbound

- Quickly send communications to nominated parties via SMS, Fax, Email, DocuSign or Post
- Quickly configure post; full support for both internal and outsourced post rooms.

KEY FEATURES FINANCE

Finance Transaction Types

-  Account Adjustments
-  Payments
-  Invoices
-  Invoice Payments & Payment Plans
-  Offers
-  Time
-  Fees

Supporting Features

-  Multi Currency
-  Goods & Services
-  Units of Measure

KEY FEATURES *FINANCE ROADMAP*

Enhanced cost budgeting support

Budgets

Client Office Account Management

Account Adjustments

Internal cost calculations

Invoices -> Fees / Disbursements

Invoices

KEY FEATURES *PREDICTIVE MODELS*

Data Quality Rules

Data Projection Framework

Train Model

Deploy

- Cycle Time
- Cost to Supply
- Busyness
- Allocation
- Sign-offs
- Time Codes
- Awards / Reserves
- Fees
- Risk Scores

1

Data Preparation

Designed to maximise data quality and intelligently extract sets of this data for ML Models

2

Model Preparation

Azure Machine Learning

3

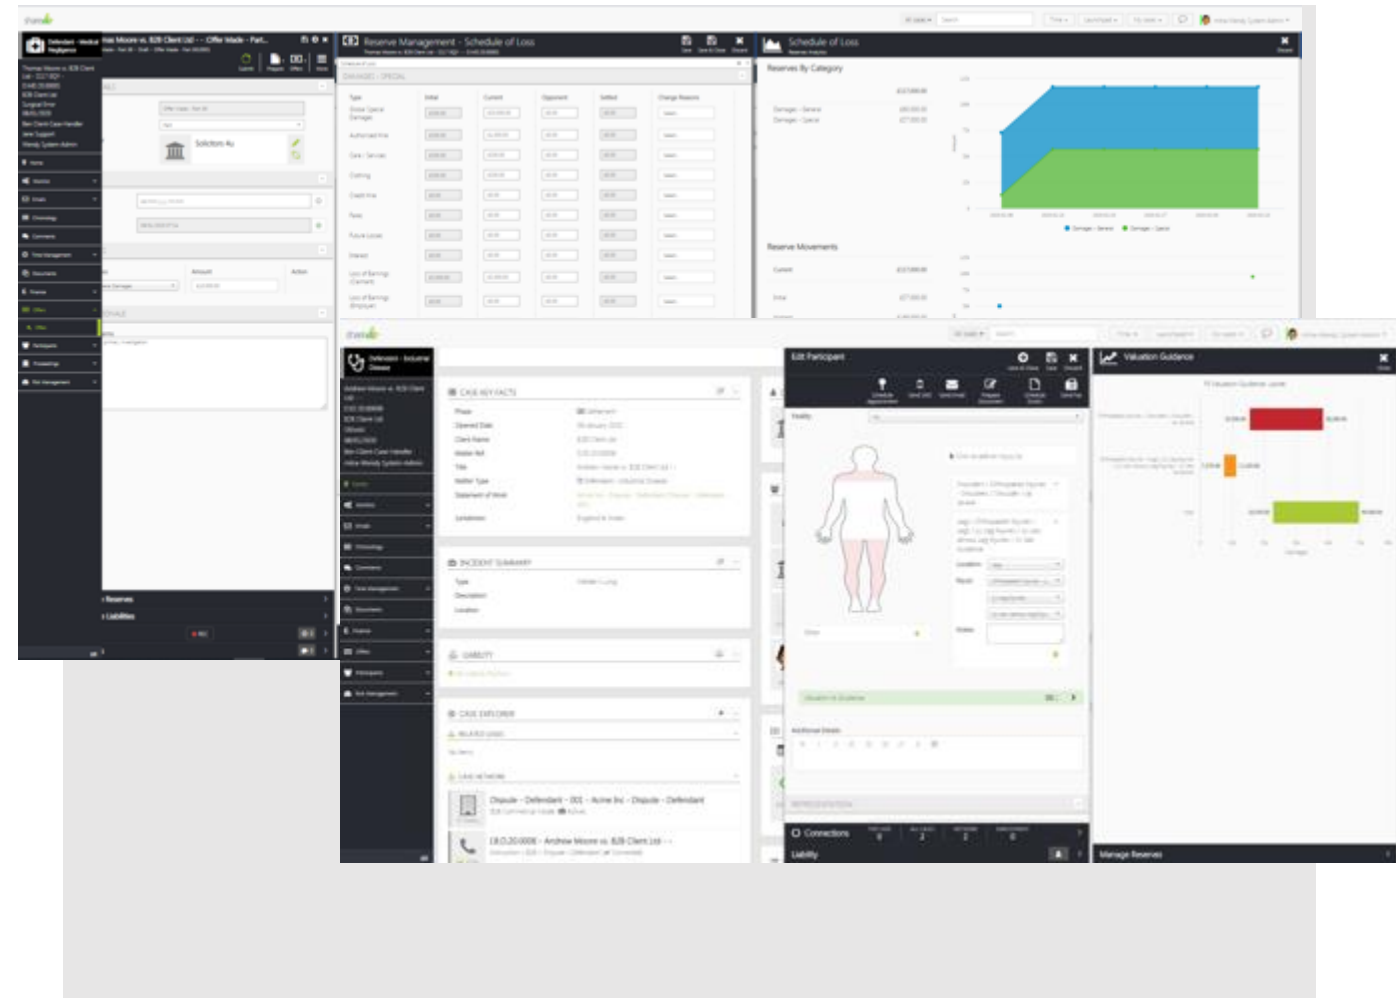

Model Consumption

Provide easily accessible “hooks” in which the application can ask questions of models

KEY FEATURES *DISPUTES & LITIGATION*

Over and above its core matter management functionality ShareDo provides extensive support for Dispute Matter types whether they be claimant or defendant; volume or bespoke.

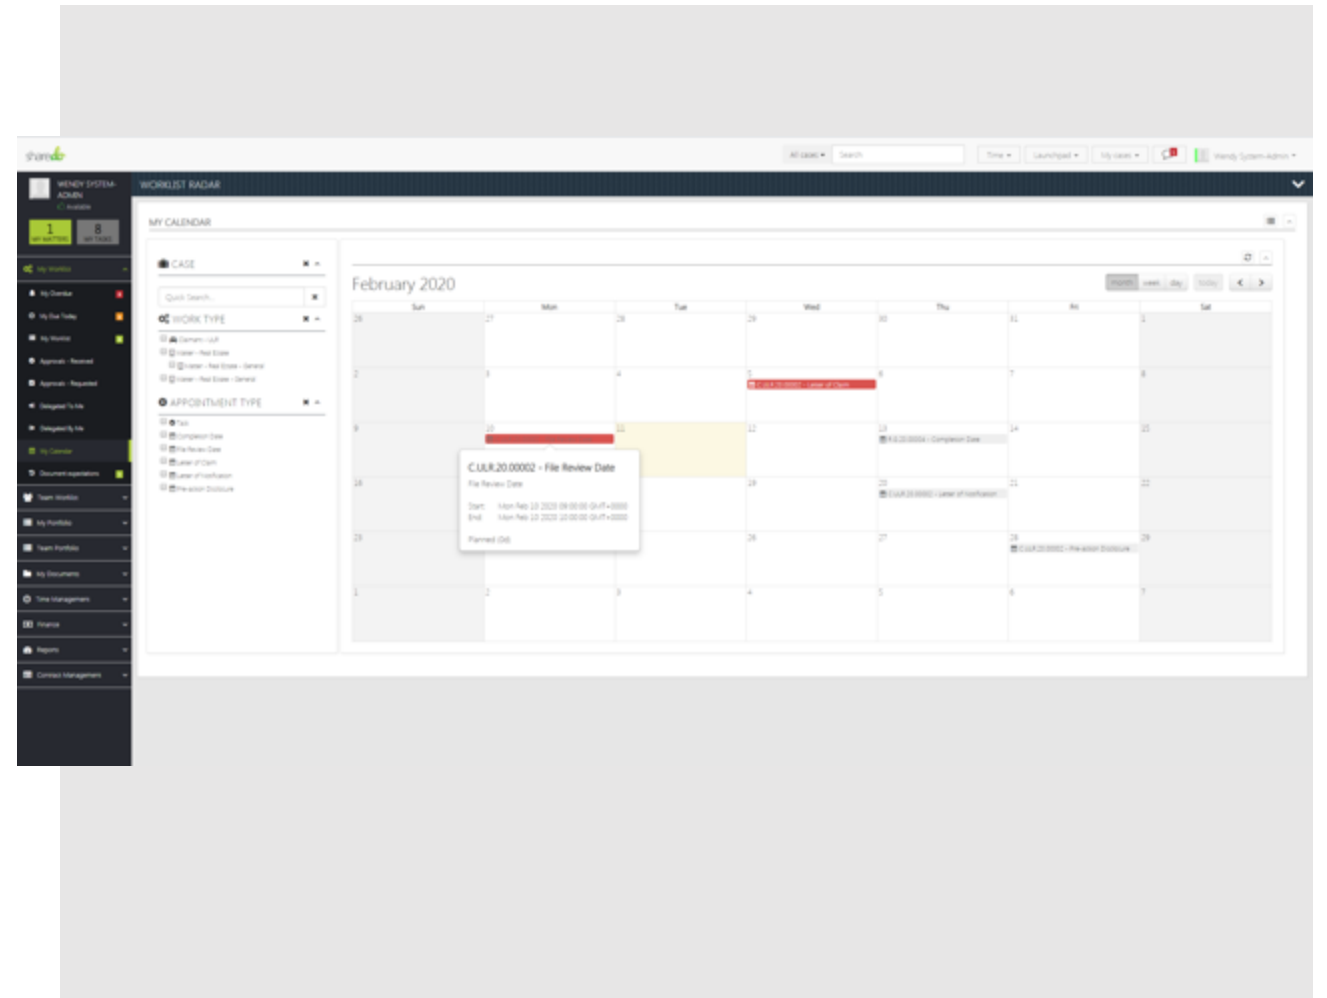

- Extensive support for litigation including
 - Witness Citations
 - Court Time Tables
 - Multi Jurisdictional
 - Hearings
- Manage complex multi claimant / defendant relationships including multiple positions on liability.
- Build and track positions on Reserves and Awards; measure and advise on these based on Valuation providers e.g. LawTel.
- Manage offer lifecycles and provide guidance to users on appropriate valuations.

KEY FEATURES *EMAIL WORK THE WAY YOU WANT TO*

Sharedo works alongside your existing outlook and iManage environments enabling you to work the way you want to.

- Configure Sharedo to work with personal or team email boxes.
- Drag and drop emails into Sharedo and have them filed and routed automatically. No outlook plugins are required.
- Track emails through luggage tags
- All access to outlook or exchange environments is entirely end user permission driven.
- Synchronise key dates and other appointment information to your outlook calendars.
- Works in conjunction with existing iManage plugins

THANK YOU *FOR LISTENING.*
