

# Accelerate Analytics With Automated Data Integration.

Fivetran data connectors continuously replicate data from your business sources into your cloud warehouse, so you'll always have the information you need — no matter how many apps you use or how many queries you run.

## The Fivetran Advantage

- Automatic adjustment to schema and API changes
- Zero-maintenance, fully managed replication
- In-warehouse transformations, with custom logic and views
- Prebuilt connectors
- Analysis-ready schemas
- Rapid data access via incremental loads
- Complete data and schema replication
- Rapid recovery from failure

## How Fivetran Powers the Modern Data Stack

# Data Professionals Choose Fivetran

"Now we spend less time on data plumbing, so we can focus on innovations like chatbots for lead qualification, and we've significantly elevated our infrastructure — a necessity for a \$20 billion public company."

**Guli Zhu**  
Head of Marketing Analytics, Square

"Bringing our data sources into our existing SQL Server warehouse would have taken three people two years and cost about \$425,000. Fivetran got us there in two months."

**Russell Stather**  
Chief Technology Officer, Ignition Group
