# PHOTO CAPTURE

- > Quick and easy vehicle identification
- > Guided image recording of the damage
- > Fast entry into the digital process

# ANALYSIS

- > Detection of damaged parts and type of damage
- > Based on OEM-data (detection of model-related differences)
- > Detailed description of the damage incl. different repair methods (smart repair, extensive paint work, etc.)

# CALCULATION

Real Time Calculation  
Current OEM Data  
SilverDAT Expertise

- > Holistic damage calculation (spare parts, labor, and paintwork)
- > Residual value prediction (determination of economic total loss)
- > Based on SilverDAT calculation and current vehicle and repair data
