

IMEC's Inspections solution is an easy-to-use mobile and web based module within the IMEC Safety Management solution to manage inspections and improve compliance. Use cases include managing inspections for Safety & Fire Equipment, Facilities, Vehicles, safety walk-arounds and many more.

Dashboards help you monitor and manage your audits and inspections. Use the Mobile App to perform Safety Walk-Arounds and generate corrective actions. Custom checklists allow staff use any Smart Phone or Tablet, iOS, Android, or Windows to carryout inspections, perform safety walk-arounds, both online and offline.

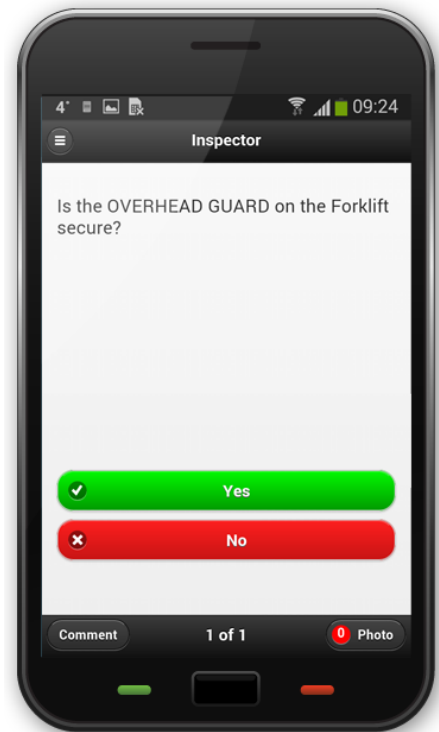

The key benefits are:

Compliance – Ensure inspections are carried out on time, manage corrective actions to closure.

Eliminate Paperwork - Conduct inspections faster and more accurately, eliminating paper work.

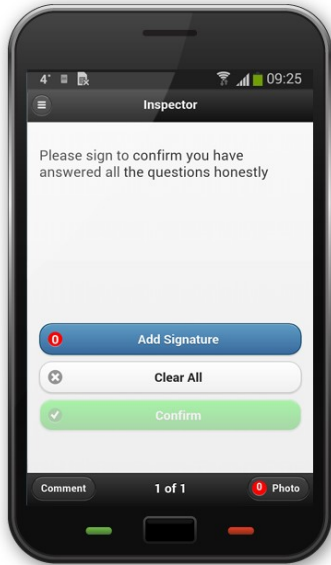

Reduce Risk – Powerful reporting and dashboards aid in the management of all your inspection processes

Audit Ready – Full inspection traceability and history.

- ⇒ Proactive Email Alerts
- ⇒ Manage Corrective Actions
- ⇒ Safety Observations
- ⇒ Safety Walk-Arounds
- ⇒ Powerful Dashboards
- ⇒ Barcodes & RFID
- ⇒ Uses Smart Phones & Tablets
- ⇒ Inspect by Routes
- ⇒ Data Stored Securely in the Cloud
- ⇒ Powerful Conditional Logic
- ⇒ Inspection Scheduling
- ⇒ Users To Do List Updated Automatically with Inspections and Corrective Actions
- ⇒ Online and Offline
- ⇒ Record GPS, Signatures, Photos

Inspections and Audits

Safety Inspections, Facilities, Fire Safety Inspections, Production Equipment, Site Inspections etc..

Performing Inspections - Collect numbers, text, dates, photographs, GPS and signatures as part of an inspection.

Barcode or RFID - can be used to verify the item being inspected is correct and at the correct location.

Proactive Email Alerts - provide notifications to users and managers of failed, upcoming and overdue inspections.

Checklist Based Inspections - Custom checklists with unique response lists, implement terms used in your business into checklists to reduce training, not just Yes/No etc.

Conditional Inspections / Logic - Build powerful logic into inspections to improve productivity.

Corrective Actions Management - Manage corrective actions, allocate each action to the person responsible based on rules, multi site and location, manage target completion dates with escalation, capture evidence of the resolution.

Users To Do List - Automatically add upcoming inspections to a users To Do List on the Mobile App.

Multiple Sites/Dashboards - Enterprise Reporting.
