

Customer Success Story

MINISTERSTWO
ROZWOJU

Ministry of Development, Poland

Using conventional ETL monitoring methods took a lot of time and that's why we decided to include Havran as a part of the solution for this customer. Havran is an easy to use, „click-&-see” monitoring solution that uses decorative visualizations.

Challenges: a lot of time spent by expert employees on collecting ETL data, inaccurate information about ETL processes errors that arrived too late

Win Results

Havran provides readable visualizations of ETL processes. The monitoring alerts about errors, so that your employees can react faster to them.

All the visualizations are conveniently available from one place. Havran has intuitive UX and decorative UI. Collecting the information about dataflows in your data warehouse is very easy.

The tool allows to monitor ETL processes using various technologies and browse their metadata. It also provides data provenance.
