

everis

an NTT DATA Company

Habität

The cost-effective workspace optimization
by everis

Habität is an everis' technological solution that allows you to save significantly on general services and employee's safety.

an everis symphony product

What is Habität?

Habität is an online monitoring tool **that allows companies like yours to optimize the use of workspaces**, through incrementally scaling the degree of utilization of the workplace. In this manner, it helps to reduce the necessity of renting workspace per square meter, improving **efficiency and saving structural costs such as general energy**.

In addition, with the occupancy control of different areas and conference rooms, **this tool guarantees minimum social distancing**, and safety measures are adhered to, ensuring proper distance among employees is maintained.

Value Proposal

This is how Habität works for you:

- Habität works by performing **real-time monitoring of a company's resources**.
- The solution is made up of **everis' proprietary hardware** allowing for improved control and adaptability to the specific needs of your business.
- Running a **temporal analysis** of the use of workspaces, rooms, and building areas.
- Habität enables a network which in turn allows for the integration of **new IoT elements in the future and the ability to complement the network** with new functionalities.

Habität is a new concept in efficient occupation of workspaces that allows you to improve efficiency and reduce cost.

Benefits

The perfect tool to cover your company's needs:

- **Workspace optimization;** Habität can generate great savings both in structural and infrastructural costs.
- **Allows you to know the actual room and workspaces occupation** in real-time as well as capacity control by area.
- **Reduces the environmental footprint** of your company, thanks to the saving and control of resources
- **Increases the health safety of professionals** as it ensures there is enough space between them, controlling the accumulation of people and raising alerts in the case of an emergency situation.

Main Characteristics

- Reduction of infrastructure management cost of your company.
- The digital platform necessary for Habität will allow you to include new IoT functionalities in the future.
- Allows for optimal control of the workspace occupation.
- The perfect ally to guarantee the safest possible return to the new normal for your employees.

Why everis?

The IoT industry is having a tremendous impact on the **transformation of traditional business** processes, bringing new value to optimizing processes and increasing productivity.

In this way, everis has expertise over the entire IoT value chain, from an in-depth knowledge of technologies perspective, to the development of solutions and definition of applied business models.

As part of the NTT DATA group – one of the top-ten leading IT services companies in the world - **everis** has more than **20 years of experience**, being recognized as one of

the main actors in **digital transformation**. With more than 27,000 professionals around of the world, globally sharing our deep knowledge in business strategy, design, implementation, and management of technological solutions with the most significant companies and institutions.

Habität is offered by everis Syntphony, the platform for orchestrating product innovation and commercialization within everis. Syntphony leverages the talent and knowledge of everis professionals and our experience in delivering integrated, solutions that maximize the synergies of the products and technologies.

everis Syntphony is everis' product strategy.

Our goal is to orchestrate the synergies and transform them into a harmonious solution for our clients and partners. The talent and global business knowledge of the everis team and its experience in the integration of end-to-end solutions, come together in the Syntphony platform. Along with third-party solutions and alliances, we create innovative products that reach their full potential when combined. The perfect music for each listener.

Benefits

Experts in technology and industry knowledge

Our knowledge and experience have been focused on creating innovative products which foresee future needs, under the baton of the best conductors.

Better time to market

The readiness of our products along with everis' platform-driven integration and orchestration, allow optimal implementation rhythm.

Global reach

At Syntphony, we seek to achieve the same global vision that everis, as an NTT DATA group company, applies to the rest of its services. We can adapt to many different keys.

Synergies and maximum cost efficiency

The centralized management of products inside Syntphony creates synergies and allow us to combine them optimally like notes in a chord, so maximising performance and minimizing costs for our clients.

Excellence

We aim to excel in all aspects of product practice, from ideation and construction, to all the fields of commercialization: security, resilience, scalability, regulations, certificates, roadmaps... We seek harmony within the ecosystem.

everis: integrator and service provider

everis' expertise in technological consulting simplifies the integration of its own products, as well as offering complimentary support service for levels 1 and 2, to make our song richer and better.

Ecosystem

The Syntphony platform products have the ability to integrate and create synergies with each other, providing efficient solutions, in tune with business needs.
