

# Bridging Healthcare's Data Gap

Healthcare technology is rapidly expanding - with growing reliance on a disconnected suite of tools to meet the clinical, administrative and financial needs of your practice.

The critical challenge facing most healthcare organization is the meaningful exchange of data between these systems...

## XBridge maximizes your health tech investments.

We bridge the data gap between your applications through modern interoperability – delivering optimized financials, clinical workflow, decision-making, and patient experience.

### EMPOWERING YOU

Drastically improve your clinical & administrative workflows

Enhance the quality & timeliness of your reporting and financials

Unleash the synergistic power of your systems that aren't communicating

#### Easily Start & Manage

- Proven dynamic interoperability solution
- Tap into pre-built integrations

#### Protect your future

- Microsoft Azure's world-class infrastructure and security
- Healthcare know-how

#### Optimize your experience

- Improved clinical & admin workflows
- Easier decision-making capability & financial results

### Achieve an integrated view

Xbridge brings your healthcare applications together, aligning the data from multiple EHRs, and tightening the collaboration between EHR & Practice Management solutions.

### Equip your team to deliver

Connect your EHR to your productivity suite, combine patient data with care team interactions and unleash the power of EHR working in concert with other applications.

### Advance your organization

Tap into best-of-breed solutions while leveraging CRM, patient monitoring tech & financial packages, then use the technology to develop financial maturity & patient outreach strategies.

“ The XBridge interoperability platform is opening up new channels for our business and allowing our customers automation that previously did not exist.

**Jesse Shoplock**  
InstaMed – A JP Morgan Co.

“ Unleashing data has helped us operate more effectively. XBridge has helped us bring it all together while providing a clearer big picture view to inform better decisions.

**Jim Schafer**
