QuineCore

Production Fabric

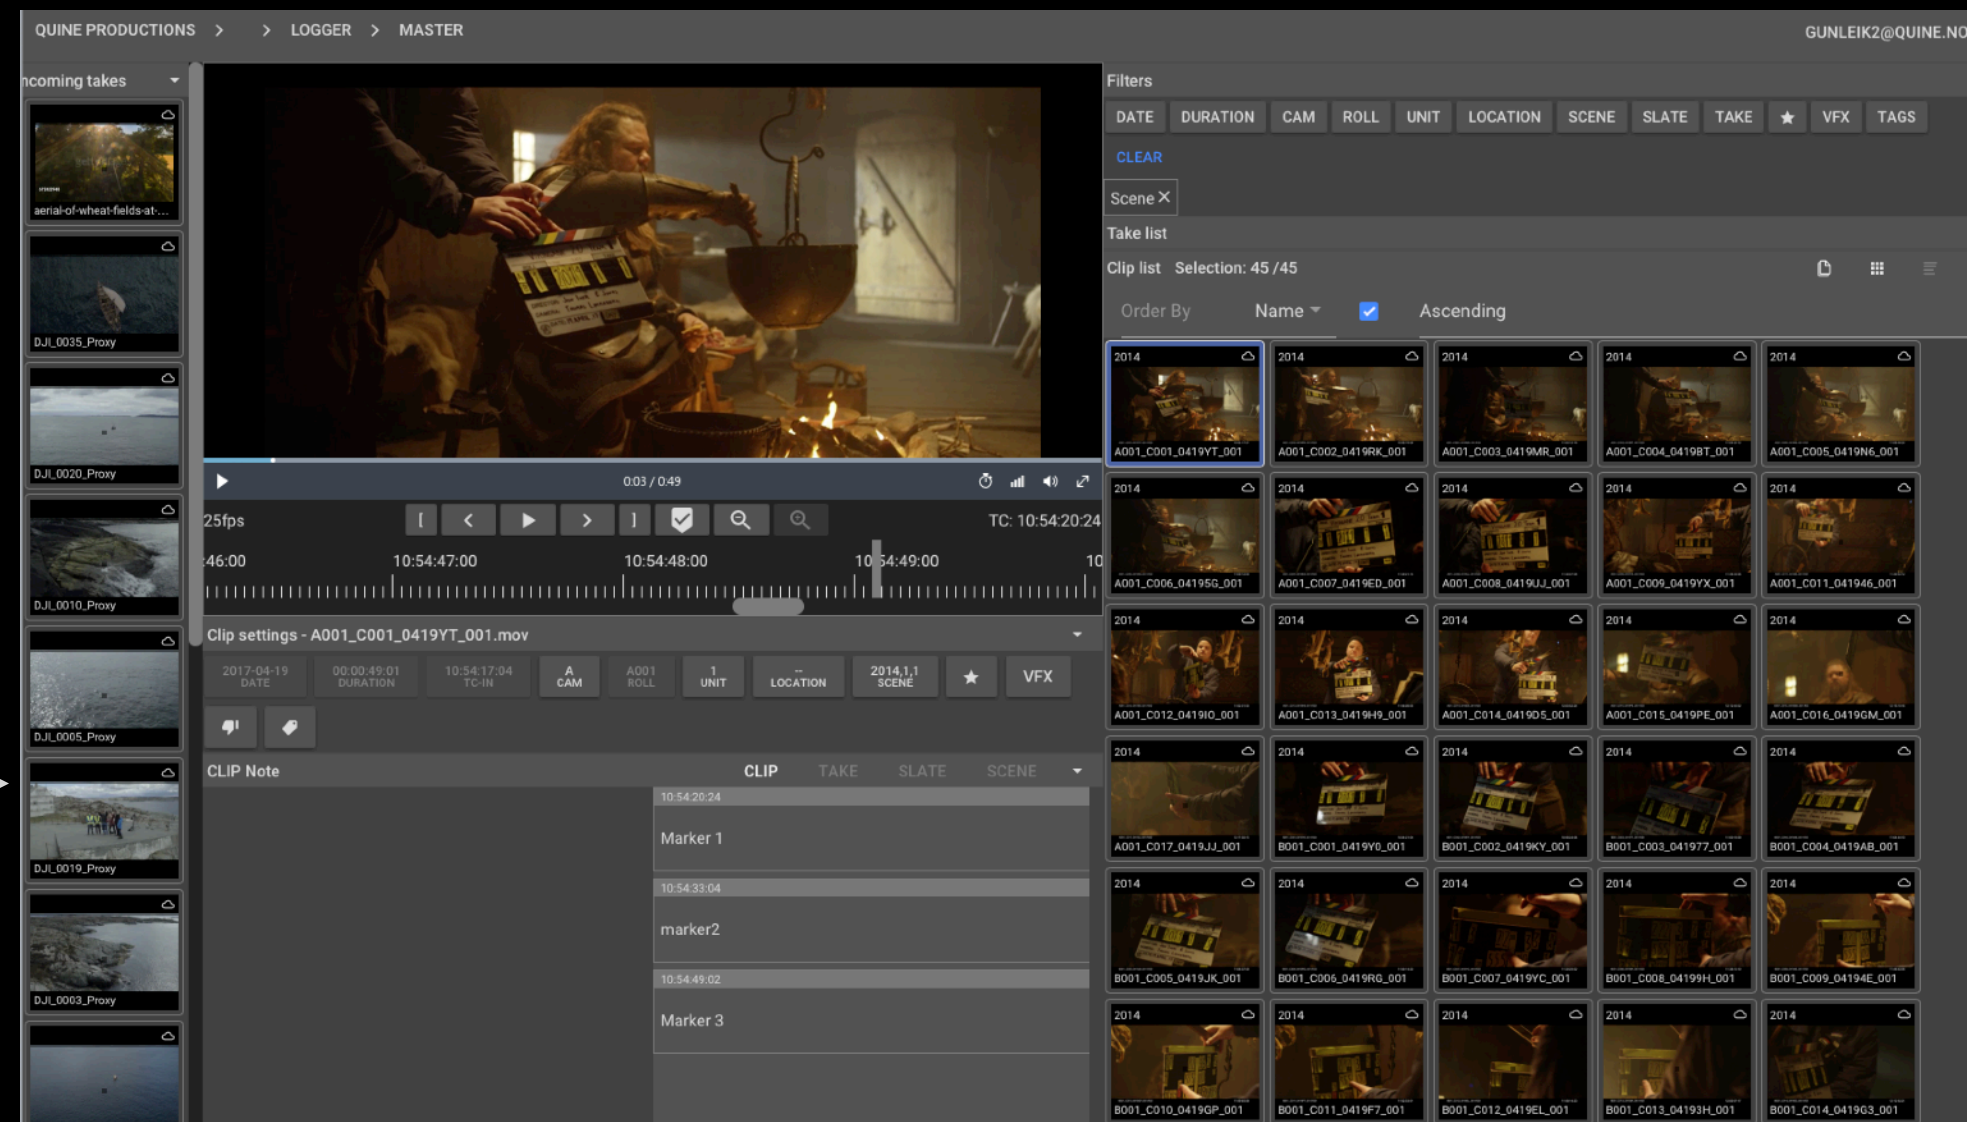

QB: Instant Dailies & Editorials

QI: Ingest & Transcode

QC: Dailies & Sharing

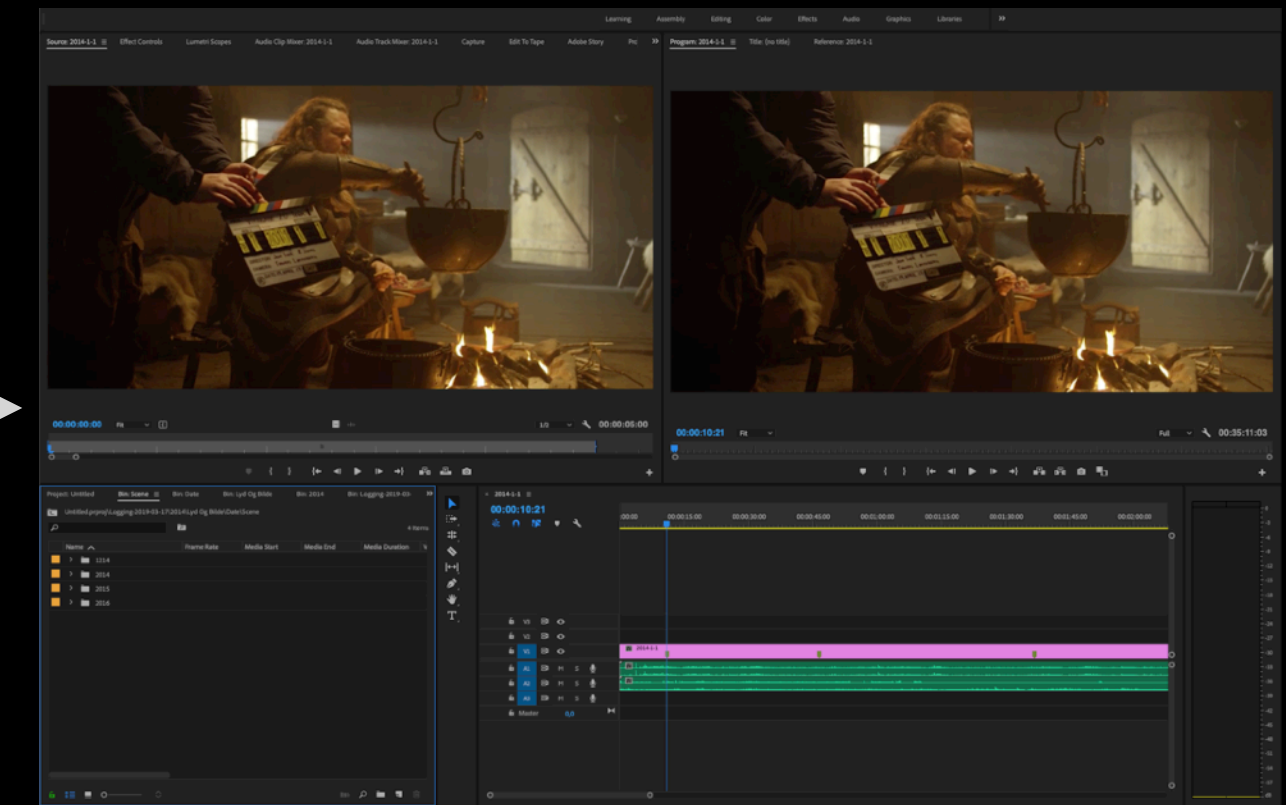

QC: Log, Sync & Conform

Ground-breaking, fast and connected Production Asset Management System (PAM) for distributed production.

- Immediate on-set and cloud based dailies and editorials from **QuineBox™IoT**
- Ingest and transcode of all files, sync with main storage and cloud with **QuineIngest**
- Dailies, logging and project communication in **QuineCore**
- Sync files and metadata with multiple external editors and partners with **QuineCore**

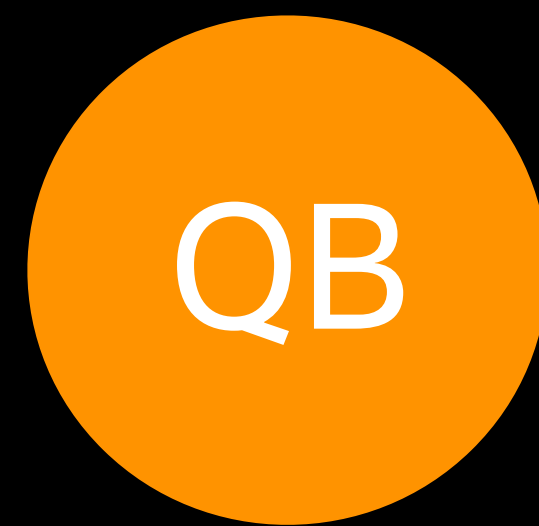

Private or public cloud.

Edit: Premiere & AVID MC

Quine Solutions & Services

True automation and connectivity, from set to editor, through the entire production.

QuineBox IoT

Realtime creation of dailies and editorials shared on-set, and automatically sent to QuineCore and shared with stakeholders worldwide, as you shoot.

Shoot = Edit

Quine Ingest

Automated ingest transcode of all files to cloud and on-prem storage.
Sync-back to local editors or VFX houses all over the world.

Quine Core

Project Asset Manager for all production data. Dailies, logging, select & process. Project communication.
Direct integration with Premiere
